

CAPENA

Swimming pools

~ in its most beautiful form

Move the seaside to

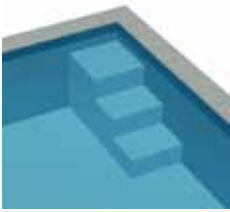

your home...

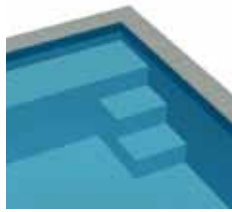

Feeling like you are by the sea or at the lake but you're really only a few steps away from your home – it's possible with a swimming pool from CAPENA. No matter what size or shape, with a natural or a luxury design – a pool in the garden improves quality of life and extends a personal living space.

CAPENA offers a large variety of choices of the most beautiful swimmingpools. You will be surprised how fast and smoothly the installation of your pool will be at an amazingly low cost. Together we can design the best solution for you, innovative and individual to the last detail depending on your wishes.

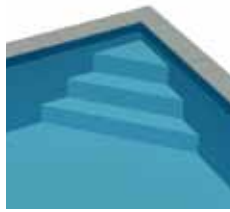

Look forward to your CAPENA swimming pool and all the wonderful moments you will enjoy by your pool.

At CAPENA, a step is much more than a simple step. It creates the feeling and shape of your swimming pool. Thanks to the modular system, you can select from our wide range, a style and size that suits you. Whatever shape you choose, the liner will fully cover your pool (including the step), ensuring a perfect colour match and a perfect fit. For those who love curves: the water surface will appear larger with a Roman step, giving your garden a touch of Hollywood. For all who love clean defined design, straight steps are ideal whether square, diagonally or running down the long side of the pool. CAPENA has your step solution and you will find something to suit your style!

Beautiful variations...

You love aesthetic design? Then you will enjoy the elegant swimming pools of CAPENA.

Regardless of the surrounding the swimmingpool will make a extraordinary look.

Just perfect...

With a perfect design, aligned modules and complementary features Capena will turn your dreams about a swimming pool into reality.

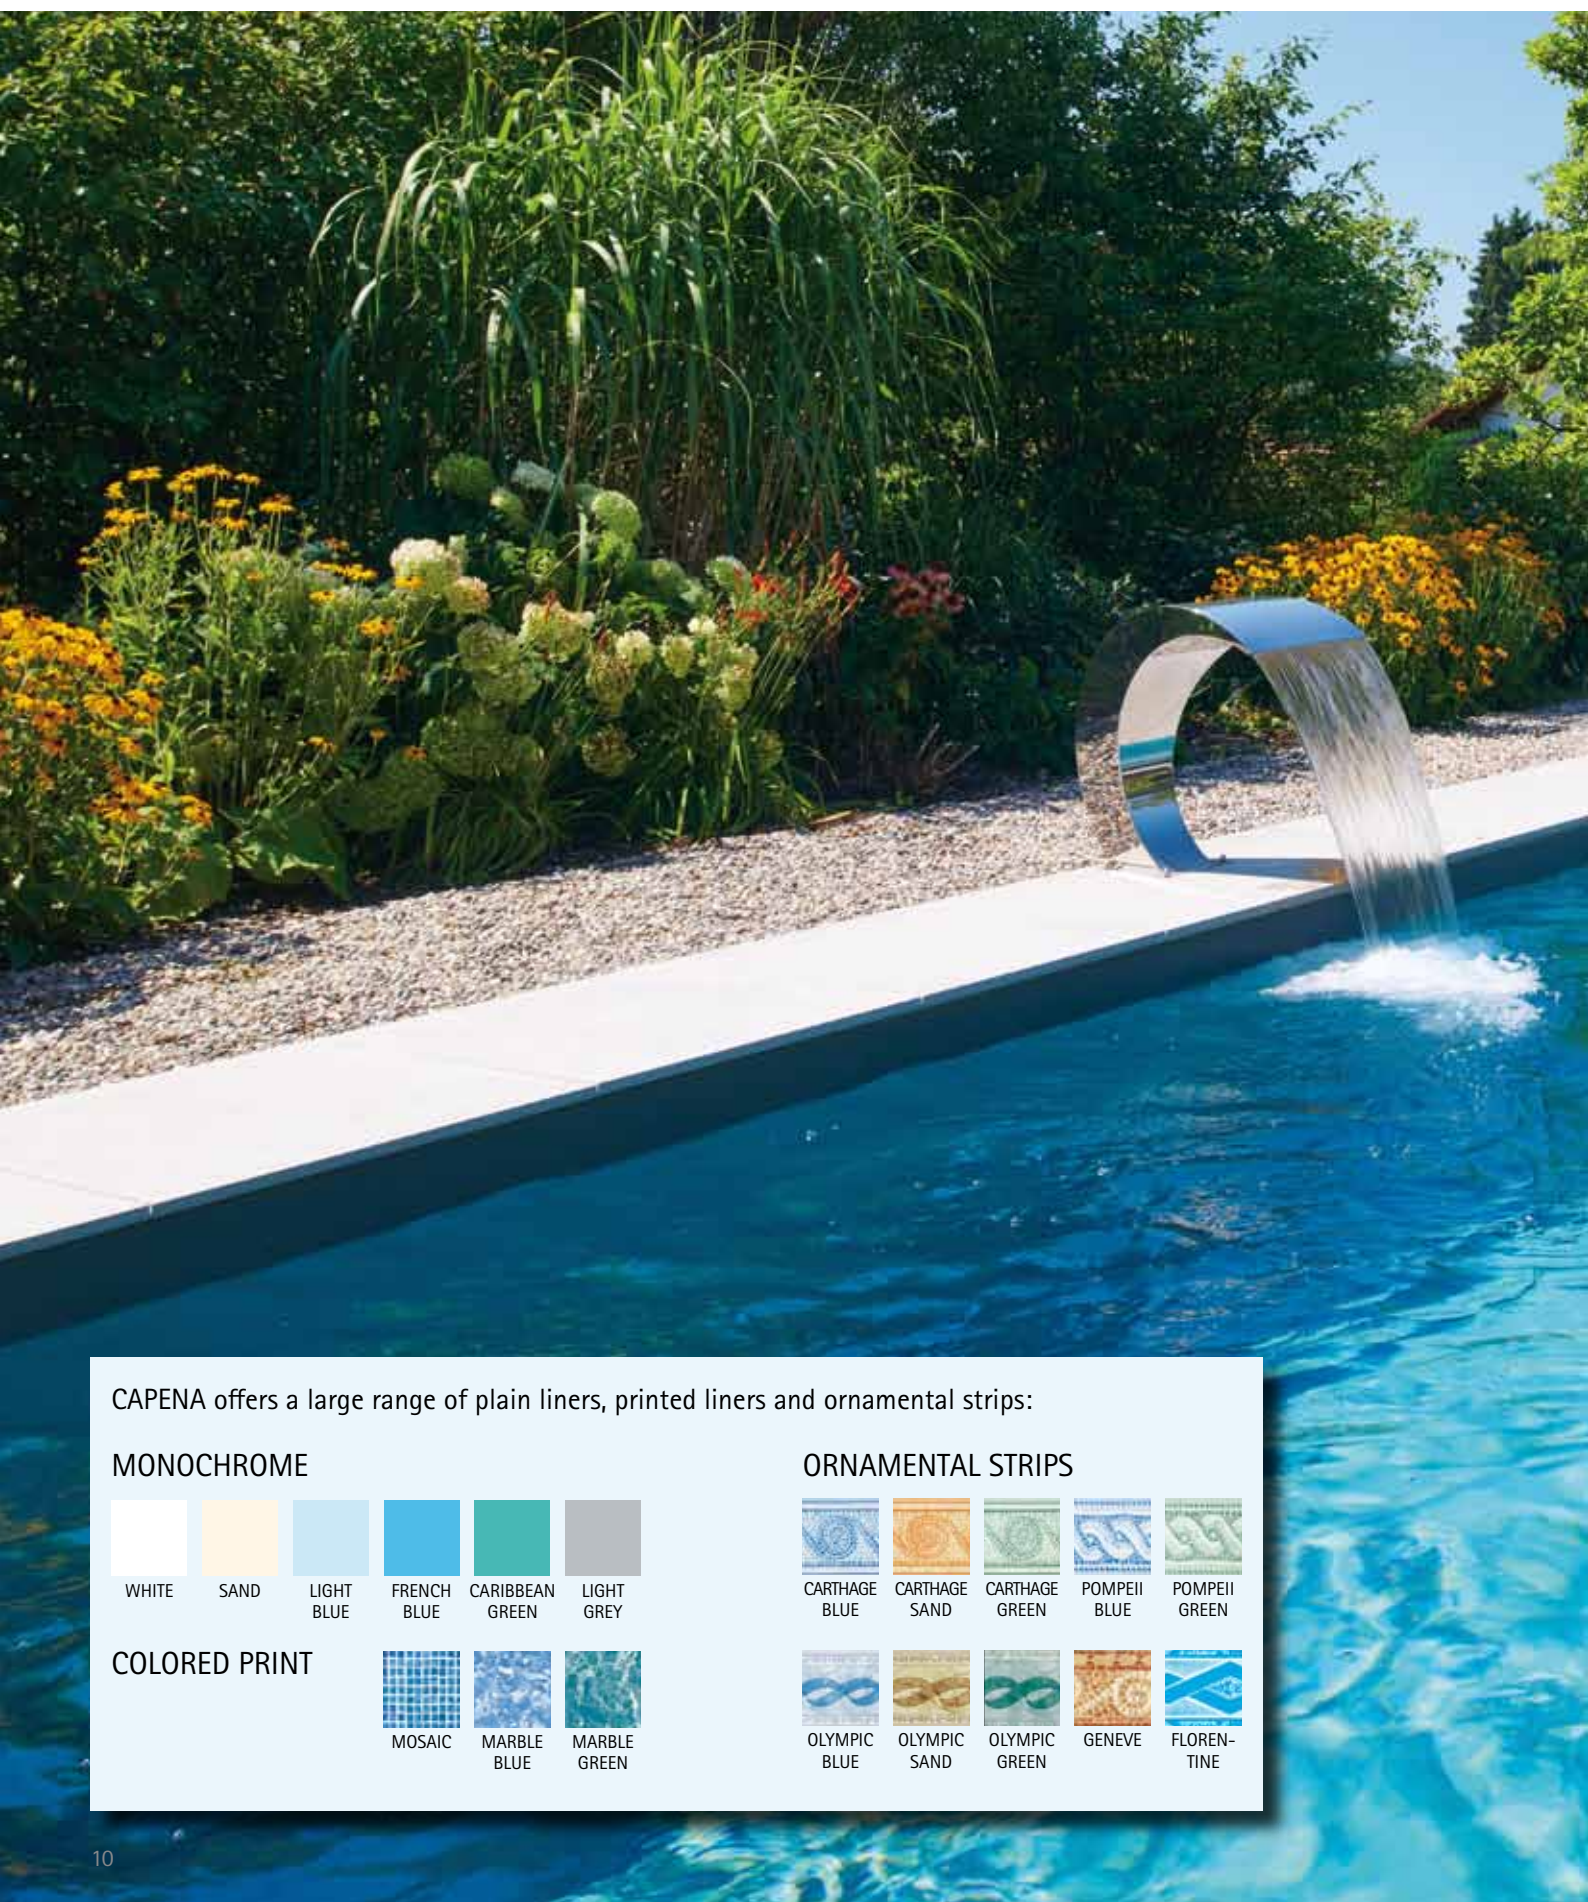

The membrane is manufactured in one piece and completely covers the base and sidewalls of the pool. A special fixing strip on the walls guarantees easy replacement at any time. Foam on the sidewall and a felt layer on the bottom of the pool creates a pleasant feeling as soon as you touch the smooth pool membrane, which is of course slip resistant. CAPENA offers you two different variations for the base of your pool:

Convex base

Flate base

Design:

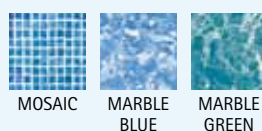

CAPENA offers a large range of plain liners, printed liners and ornamental strips:

MONOCHROME

COLOR PRINT

ORNAMENTAL STRIPS

Sophisticated details

A lot of possibilities

Original and extravagant

CAPENA offers a variety of genuine and extravagant swimming pools.

We would be also pleased to help you to realise your own individual ideas for your personal swimming pool.

... we make your dreams
come true

Water created
in its most beautiful form,
pure and crystal clear

Innovative solutions: The detail makes the difference

Reinforced concrete structure

Wall and bottom are poured in one.

The step made of reinforced concrete

There is a large variety of different shapes: roman, diagonal or straight.

Minor excavation work

As the CAPENA structure is self-supporting, there is no need for reinforcement. The building construction of the pool involves only minor excavation works, which guarantees a neat building site and your existing garden remains tidy.

The membrane

Factory cut and factory assembled. Easy installation of the membrane with fixing strips ensures the membrane can be removed at any time without the necessity take off the coping stones.

The coping stones

The coping stones sit directly on the reinforced concrete wall and are slip resistant.

Filtration

A powerful sand filtration aligned with the size of the pool ensures clean water. Technical enclosure near the pool on request.
