CONSTANTLY HIGH QUALITY WITH EVERY
BITE AND IN EVERY PRODUCT

The well-being
of our furry
friends is our
top priority.

Filled chew bones

THE HEALTH OF YOUR DOG IS OUR TOP PRIORITY

That's why our chews are made from 100% natural ingredients with lots of love and care for our four-legged furry friends.

WHAT MAKES OUR CHEWS SO SPECIAL?

FILLING

A composition that has been carefully analysed and selected to provide the best nutritional values and high palatability for our four-legged friends.

NATURAL INGREDIENTS

The natural composition ensures the best possible flavour and the best possible health-promoting effect for dogs. The natural air-drying process over several weeks and the natural odour make the chew irresistible for dogs.

SAFETY

No sharp elements that could injure the dog. Our filled chews are firmer than normal snacks and are made from thick beef hide. This helps to rub plaque off the teeth and can therefore support your dog's dental and gum health.

NATURAL COMPOSITION

The natural composition ensures the best possible health-promoting effect for your dog and tastes the best.

NUTRIENT RICH SOURCE

Beef hide is an excellent source of valuable proteins and is a natural source of collagen. It is also low in fat and rich in nutrients!

DENTAL CLEANING

Chewing on the chew rolls can help to rub the plaque off the teeth and support the dog's dental health, as well as strengthening the jaw muscles!

STRESS REDUCTION

The chew rolls banish boredom, provide a meaningful activity and reduce stress while chewing.

HIGH QUALITY RAW MATERIALS FROM EUROPE

For a good chew roll you need good raw materials. That's why we only use the best, high quality raw materials, 100% of which come from Europe.

Chews for dogs with food sensitivities

Nutritionally sensitive dogs often need special chews that are tailored to their needs.

Chews made from horse hide and deer hide are good options for dogs that are prone to allergic reactions to conventional chews. They do not burden the dog's digestive system and at the same time provide important nutrients.

100% NATURAL INGREDIENTS WITHOUT ADDITIVES

The chews for sensitive dogs are made from 100% natural deer or horse hide, without any additives such as artificial flavourings, colourings, binding agents or preservatives.

HIGH PROTEIN AND NUTRITIONAL VALUE

Deer and horse hide contain many important nutrients, including protein, calcium, phosphorus and collagen. These nutrients are important for the healthy development of a dog's bones, muscles and tissues.

SUPPORTING DENTAL HEALTH

Chewing on the bones stimulates the dog's saliva flow, which helps to reduce plaque and tartar build-up. Chewing also strengthens the dog's jaw muscles.

100% Natural chew bones

DEER HIDE

5-piece set, available in 12 or 17 cm

Deer skin is very well tolerated and is often recommended for dogs with food intolerances and allergies. The chew bones are low in fat and have an exceptionally delicious flavour. A special and hypoallergenic solution for dogs that like to chew.

Contents: 5 chew bones in a polybag with press stud.

Composition: 100% deer hide.

Analytical constituents: crude protein 94,4%, crude oils and fats 1,4%, crude ash 1,5%, crude fibre 1%.

Made from
natural ingredients
and free from artificial
flavourings, colourings and
preservatives, these chews
are an ideal addition to a
balanced diet.

Chew bones for puppies & senior dogs

Our tasty chew bones speciall for puppies and senior dogs are made from granulated beef hide, what makes the bone softer. Thanks to the natural source of protein, the chew bones are well digestible for dogs.

WHAT MAKES A BONE SPECIAL FOR PUPPIES AND SENIOR DOGS SO PARTICULAR?

SAFETY

No sharp elements that could injure the dog. The softer texture compared to the filled chew bones makes this chew bone particularly easy to chew for puppies and senior dogs.

HIGH QUALITY

The chew bones are partly handmade and undergo a natural drying process. The chews are grain- and gluten-free, contain no preservatives and are completely free from chemicals. We use high-quality, natural raw materials that come 100% from the EU.

HIGH ACCEPTANCE

Your furry friends will love our chew bones!
Careful natural air-drying over several weeks and the all-natural ingredients guarantee not only the best possible flavour, but also a high level of acceptance among your beloved fluffy friends.

100% Natural chew bones

A special
chewing pleasure for
puppies and older dogs!
These chew bones made from
granulated beef hide are not too
hard, but hard enough for use by
dogs' teeth in a species-
appropriate way.

Chew bones with Cistus Incanus

IMMUNE SYSTEM SUPPORT

The polyphenols contained in rockrose (*Cistus incanus*) can support the dog's immune system.

ANTI-INFLAMMATORY PROPERTIES

The anti-inflammatory properties of rockrose can help to reduce pain and inflammation in dogs.

SKIN AND COAT

Cistus contains nutrients that can support skin health and make the dog's coat look shiny and healthy.

DIGESTION

Some studies suggest that rockrose may also support digestion, which could help dogs with gastrointestinal problems.

NATURAL INSECT PROTECTION

Cistus contains natural ingredients that can help to repel pesky insects, which can provide the dog with additional protection against bites.

100% Natural chew bones

Beef hide with Cistus Incanus and CHICKEN

Chew bones for small breed dogs

MOUTH-FRIENDLY CHEW BONES FOR SMALL BREED DOGS

Just because some dogs are small doesn't mean that their appetite and need to chew on a chew bone is. Small dog breeds have a faster metabolism than their larger comrades and therefore burn off the energy they are given more quickly. The increased energy requirement demands more nutrients. The DOGBOSS chew bones specially designed for small dog breeds are rich in high-quality proteins that support the energy metabolism and provide the necessary energy for the active days of small dogs. These mouth-friendly chew bones are not only tasty, but also healthy and ensure that even small furry friends can go through the day full of vitality and joy.

SPECIES-APPROPRIATE

Specially developed for small dog breeds to meet their specific requirements. Each ingredient is carefully selected to meet the needs of small pets. Extra small chew bones for sensitive mouths.

PROTEIN SOURCE

Beef hide chews are a perfect source of protein. They contain many important nutrients that are essential for the growth and development of small dogs. Beef hide is also an excellent source of collagen. It is also low in fat and high in nutrients!

SAFETY

There are no sharp elements that could harm the dog. This chew bone is easier to chew due to its softer texture compared to filled chew bones, which encourages small dogs to fulfil their natural chewing instincts.
