

REACTIVE VIDEO

TECHNOLOGICALLY ADVANCED SHOOTING TRAINING SYSTEM

Practice real-life situations

with your own gun,
or test another
one

Real weapons

live ammunition

Compact, easy-to-carry system,

comes in a carry
container

Automatic

"Justified shooting"
decisions and
feedback

Various training situations

Shot-interactive live
videos

All you need is

a shooting range
with bullet trap
– the rest is
provided

INCLUDED IN THE SYSTEM:

Customized computer

to run our self-developed
training software (No internet
access needed)

Loudspeakers

to reproduce conversations
and ambient sounds

Microphones

to accurately detect
shooting

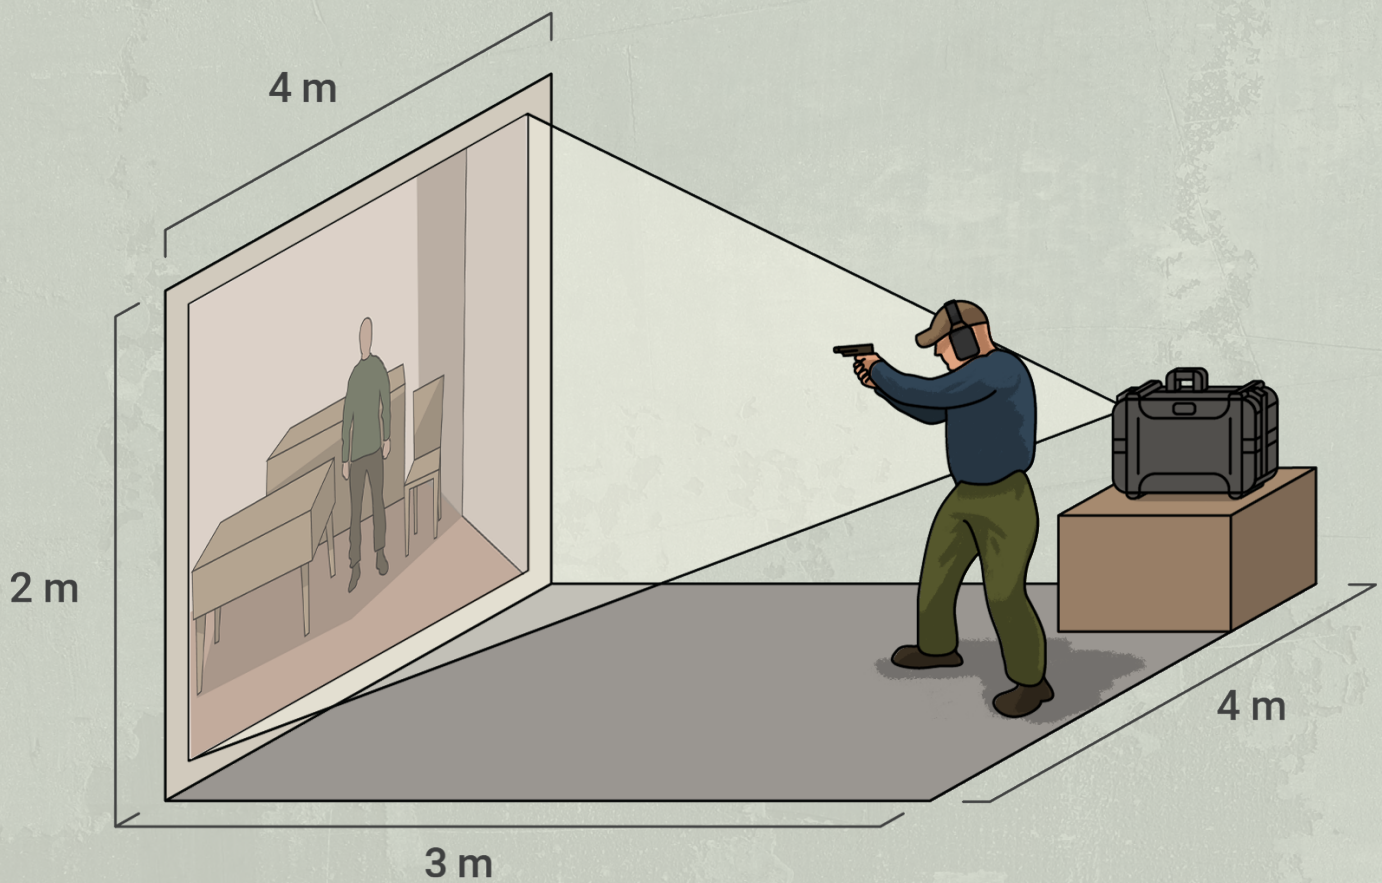

Wireless controllers

for the operator

Beamer

to project videos
on the screen

EXPAND YOUR TRAINING POSSIBILITIES

- Design and set up situations that best suit your needs
- Use the extensive built-in library of real-life video scenarios
- Create your own videos and training scenarios – we help you film and code in the system
- Map environments and situations that are difficult to use for training – then use it in your library (e.g. inside of an airplane, attackers in the subway, shooting out of a moving vehicle) these videos have to be recorded only once, than they are infinitely reusable

LOW COST OPERATION

- Use traditional ammo
- One training supervisor is enough to operate the system
- Video is projected onto a paper screen – shipped together with the system
- Holes can be covered with patches for extended screen life
- Projecting and processing equipment is dust-isolated
