

WILLTRON

Company Introduction

2026

Founded in 2009 in Taiwan, Willtron is a leading provider of TFT-LCD modules, displays, and touchscreen solutions, with over **16 years of expertise**. Evolving from a trading and distribution business to a professional total solution provider and manufacturer, we deliver reliable, high-quality, and customized display solutions.

Our experienced team partners closely with clients, offering innovative design, strict quality control, and comprehensive support from development to mass production. We have earned strong customer trust, especially in highly customized touch display applications across handheld devices, automotive, medical, and HMI sectors. Willtron is committed to long-term partnerships and growing together with our clients.

” Industry expertise meets design & customization for unique display solutions”
