- [14] Large hook-and-loop and MOLLE hook-and-loop areas inside

Daypack for bushcraft and everyday use (Everyday Carry) with individual expansion options. The EDC Pack 23 BC made of robust Cordura® material complements the bushcraft collection from Tatonka with a handy 23-liter-daypack. It has a side pocket with volume expansion, a side pocket for bulky equipment and two front pockets with zippers. Thanks to the modular fastening system on the front, it can also be supplemented with additional pouches (e.g. Universal Pouch, Art. 3032, 3033, 3034, 3035; Tool Pouch BC, Art. 2890, 2891, 2892). The main compartment can be opened completely for easy packing. Inside, hook-and-loop areas offer the option of attaching small pockets and thus organizing the equipment clearly. The EDC Organization Set, Art. 2015, is available for this purpose. The Notebook Sleeve, Art. 2016, can also be hook-and-looped in.
