## **Designed for you: Tailor-made solutions – continuously improved**

**At Fensterbau Frontale 2026, GEALAN will present its extensive portfolio of innovative surfaces, design-oriented systems, and useful services – continuously adapted to the requirements of partners and purposefully developed for international markets.**

From March 24 to 27, 2026, the focus at the **GEALAN booth 5-203** in Nuremberg will be on high-quality system and service solutions, as usual. On approximately 900 square meters, GEALAN will focus this time on targeted further developments for modern living and the special requirements of international markets.

Oberkotzau, JAN / MAR 2026

Based on the motto **“Designed for you”**, the GEALAN exhibition stand will once again be structured thematically and spatially according to target groups. New for 2026 is a main street through the exhibition stand, where visitors can get a first impression of the diverse possibilities for taking the entire window and door value chain to a new level. And in the areas around the central golden cube, they will also get a first glimpse into the future of tomorrow's window and door solutions.

## **Leading the way in surfaces – GEALAN showcases diversity, innovation, and customization**

GEALAN sets standards in the market when it comes to the surface design of windows and doors. With a unique range of technologies, colors, and structures, solutions are designed for a wide variety of architectural requirements and personal preferences. The GEALAN booth at Fensterbau Frontale 2026 deliberately focuses on its diverse and high-quality solutions:

At the forefront is GEALAN-acrylcolor®, a particularly resistant and durable surface. The innovative acrylic glass technology ensures a scratch-resistant, color-stable, and easy-care profile surface that retains its brilliance and quality even after years of intensive use. As will be impressively demonstrated at the trade fair stand, architects, manufacturers, and builders benefit from a wide selection of modern colors and surface structures that meet both classic and trendy design requirements. A highlight at the trade fair stand: the GEALAN acrylcolor® experience trail, which really brings home the diversity and innovative power of colored surface technology.

## **Modern design, high-quality function – GEALAN combines aesthetics and performance**

Attractive and contemporary design is a central component of product development at GEALAN. The profile systems used in the elements of the various cubes show how functionality and design go hand in hand in the design of modern architecture. New, more sustainable materials and technical developments clearly demonstrate how GEALAN thinks and designs with the future in mind. System solutions that enable optimal working in international markets show that GEALAN knows and takes into account the needs of customers in different countries with its portfolio expansion.

Oberkotzau, JAN / MAR 2026

Particularly striking product highlights at the GEALAN booth are the design-oriented and, in some cases, newly conceived solutions for modern windows and doors. Implemented in the GEALAN-KUBUS®, GEALAN-KONTUR®, and GEALAN-LINEAR® systems, they not only combine sophisticated aesthetics with technical innovation and comfort, but have also been further developed to be user- and installer-friendly. The new GEALAN-SMOOVE sliding solutions are sure to be a particular eye-catcher. Visitors to the trade fair can also experience innovations in the form of country-specific solutions from the above-mentioned systems for Italy, France, and the USA, which will be presented to the public for the first time at Fensterbau Frontale.

Designed for you: GEALAN systems enable high-quality windows and sliding solutions for new buildings and renovation projects (source: GEALAN).

GEALAN rounds off its product portfolio with well-thought-out building connection solutions from the GEALAN windowfit range, the advantages of which can also be seen at the trade fair stand.

## **Services and digital tools – GEALAN supports you in your daily business**

Modern profile systems are GEALAN's core business – but for several years now, GEALAN has been thinking holistically about service along the window and door value chain: in addition to competent contact persons who provide comprehensive advice to architects, dealers, and manufacturers, GEALAN specialist partners and customers also have access to digital tools for planning and visualization in their daily business.

At its trade fair stand, GEALAN is presenting and explaining the new and innovative Tendoo tendering platform, which digitizes and simplifies the tendering process for windows and doors. Manufacturers, planners, and fabricators benefit from fast, transparent, and convenient processing – from product selection to requesting a quote.

Another GEALAN innovation in the halls of Fensterbau Frontale 2026: GEALAN is introducing a new product configurator, initially for lift-and-slide doors. In the future, this will make planning and selecting suitable sliding solutions even easier and more efficient.

To bring the digital window planning of the future to life, the proven planning software will also be on display at the **“Designed for you”** booth. Visitors can use this sophisticated tool to see the added value of

GEALAN's multi-award-winning BIM (Building Information Modeling) data for themselves.

Modular showroom solutions for dealers round off the GEALAN service portfolio at the trade fair stand and demonstrate that GEALAN thinks ahead and works with its customers.

### **Solutions for all trends – GEALAN helps you sell more windows**

Visitors to the GEALAN trade fair stand at Fensterbau Frontale will encounter extraordinary solutions: on the one hand, strikingly large elements that meet special structural requirements. On the other hand, variants will be shown that enable barrier-free passageways and transitions. But also those that ensure comfortable living and working through smart, automated support. GEALAN will thus be presenting exactly the trends that are currently in demand and desired by customers on around 900 square meters. This enables window manufacturers to produce precisely to these needs.

### **Further developments and internationalization – GEALAN grows with the requirements**

What the **“Designed for you”** presentation at Fensterbau Frontale will impressively demonstrate: GEALAN constantly reviews its products and services, expands and improves its portfolio in a meaningful way, and optimizes it – with forward-thinking solutions, new surfaces, and variants that take international characteristics into account. Sustainability is a central theme across all developments: Resource-saving materials and recycling concepts are already taken into account during product development.

## About GEALAN

The GEALAN group is one of Europe's leading manufacturers of PVC profiles for window systems and doors.

GEALAN profiles are designed, manufactured and distributed in-house. They are the basis for making window systems, doors and modern sliding solutions that are strikingly beautiful, exceptionally robust and particularly secure – and equipping them with top thermal insulation values. GEALAN manufactures the extrusion tools used for profile production in its in-house, highly automated tool shop.

As an innovative system provider for PVC window and door profiles, GEALAN can offer its partners a comprehensive range of services. Our architectural consulting and construction engineering services support architects and planners in their everyday work. Intelligent tools simplify planning and tendering. Training courses and seminars bring our partners up to date with the latest GEALAN solutions.

Across the world, GEALAN employs more than 1,700 people and generated an annual turnover of EUR 320 million in 2024. Since 2014,
