

SINBRAN® – SINTERED MEMBRANE FILTRATION

SINBRAN® PERFORMANCE OVER CARTRIDGE

DURABLE • SUSTAINABLE • BETTER

Service life ↑

- Conventional filters become clogged over time and have to be changed frequently
- Innovative round filter geometry significantly extends the replacement interval
- Large filter surface with ePTFE membrane reliably filters finest dust, e.g. sanding residue or carbon dust

Less waste ↓

- Filters do not need to be vacuumed or changed
- Easy to clean with compressed air
- Low ecological footprint
- Cost savings
- Reduced inventory

Productivity ↑

- Improved occupational safety
- No system downtimes
- Permanently constant volume flow
- Flange design individually developed for optimal use in existing filter systems

recommended for • **Automotive industry** • **3D printing** • **Metal processing**
