

HYBRID SERIES

Dry technology innovation,
uncompromising efficiency

WHY W-TECH?

01 INNOVATIVE MATERIALS

- Magnelis®: superior corrosion resistance.
- Design that extends your system life.

02 ENERGY EFFICIENCY

- Reduction in energy consumption from 20% to 80%, compared to air systems.
- Lower operating costs.

03 ENVIRONMENTALS SUSTAINABILITY

- Over 95% recycled water.
- Reduced environmental impact thanks to lower energy consumption.

04 TAILOR-MADE SOLUTIONS

Each solution is designed to suit your needs, ensuring tailor-made performance.

05 FULL SUPPORT

From pre- and post-sales consulting to maintenance, we stand by your side for every need.

OUR CERTIFICATIONS

HYBRID TECHNOLOGY: WHAT IS IT?

At the heart of the innovation is an additional copper and aluminium finned battery, strategically positioned above the machine. Here, a fluid pre-cooling process takes place, which significantly reduces the thermal load that the standard evaporative system has to dissipate.

This advanced architecture allows the system to operate mainly in dry mode during cold seasons, taking advantage of low ambient temperatures and minimising water and electricity consumption.

01

SMART PERFORMANCE FOR A
SUSTAINABLE FUTURE

02

MAXIMUM EFFICIENCY,
MINIMUM IMPACT

03

ADVANCED TECHNOLOGY,
CONSCIOUS ENERGY

ADVANTAGES OF THE **HYBRID** RANGE

ENERGY EFFICIENCY

Lower electricity demand for cooling, consumption optimisation.

ANTI-FOG FUNCTION

Finned battery located at the top of the evaporative system can also heat the outgoing air flow, eliminating the plume effect typical of towers in certain environmental conditions.

SUSTAINABILITY AND SAVINGS

Less water, less energy, more respect for the environment.

FULLY APPLICABLE TO THE **W-TECH** RANGE

Hybrid range is compatible with the entire range of W-Tech condensers and evaporative coolers.

WHY CHOOSE **HYBRID**?

With Hybrid, you're not just buying a system: you're investing in intelligent performance, optimised resource management and future-proof solutions.

HYBRID MACHINES

● AXIAL INDUCED

● AXIAL FORCED

● CENTRIFUGAL

● CENTRIFUGAL LOW PROFILE

● HIGH EFFICIENCY
