XINNIX

The name “Xinnix” (pronounced “See-Nix” – a name that means “see nothing”) aptly describes the effect that our door frame systems help you achieve: seamless, invisible doors.
This flush, minimalist look is achieved with the Xinnix patented aluminum frame system, complete with gaskets, magnetic locks, and 3D adjustable concealed hinges.
The Xinnix pre-lacquered frame is available in white (RAL9016) or black (RAL9005) and can be painted to meet the aesthetic needs of your project.
Adjustable, concealed 3D hinges easily provide flush alignment of the door to achieve the ultra-sleek design that Xinnix is known for.
The patented Xinnix frameless door systems are designed to accent the beauty of your sleek, minimalist interior design.

FLUSH PULL OR FLUSH PUSH

LEFT DOOR

CLOCKWISE

PULL

PUSH

Xinnix uses the European standards to identify the opening direction.
During the installation of our universal door frames you can decide if it should be a flush push in or flush pull out door. After the walls are finished you can't see the difference between a push and a pull door.

The frames can be universally used in every wall type, brick wall or stud walls, in every wall thickness and with a variety of possible wall finishes.

WALL FINISH

Our universal door frames can be finished with diverse materials.

Some examples:

» Plaster
» Gypsum board
» Laminated wall
» Veneer
» Tile
» Stone
» Glass
» Mirror
» Specials
» ...

INTEGRATED DOOR CLOSERS

Xinnix offers a wide range of door closer systems that can be integrated in the universal door frame.

From integrated soft open and close systems, to self-closing doors to fully automatic doors. The closers are installed within the Xinnix door frame and remain invisible.

XTREME DOORS

Xinnix also has solutions for unconventional doors; extreme heights, widths or heavy doors.

We have specialised hardware in our range that can carry doors up to **200 kg**.

NO HANDLE

Doors with integrated handles are up and coming. These are operated with our magnetic roller lock NZ.

These can be locked with a hook lock, which can have the same finish as the frames, allowing privacy where necessary.

LOCKING SOLUTIONS

Next to our standard range of magnetic locks we also have a whole array of other locking solutions.

This includes but is not limited to:

» Multipoint locks: manual or electrically operated
» Access control powered by badge reader, fingerprint reader, home automation,...

PLINTHS

To continue the sleek design of the doors we also have integrated plinths in our range.

These can be finished with a (lacquered) aluminium cover that clicks inside of the base profile. Alternatively you can also fit a stone or HPL piece inside to create an infinity effect matching with the floor.

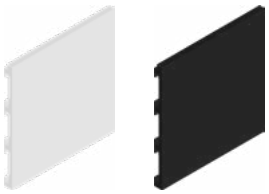
XP50.04



FINISHING PROFILE

The finishing profile XA-FIN allows you to easily finish the walls regardless of the wall thickness.

The profile features an integrated aluminum corner bead, which speeds up the finishing process and reinforces the corners.
