100% SaaS platform enabling Zero Trust Network Access.

NIS2 READY · ISO 27001 CertSed · GDPR Compliance · SOC2 COMPLIANT

Remote access and BYOD
Device security enforcement with device inventory and posture checks.

Multi-factor authenticati
Unified MFA solution for all critical systems, including legacy applications.

Identity-based access control
Zero-Trust Architecture enabling control of all access by identity (SSO/SCIM).

Network encryption and
Segmentation at maximum granularity radically reduces the attack surface.

Full control and visibility
Security logs and reports from across the entire organization with SIEM integration.

Zero Trust: Modern secure access from anywhere

GoodAccess is a network-based security platform (SASE/SSE) deployable over any infrastructure and critical applications.

|		
Dedicated cloud Gateway	Device posture check	SSO/SCIM
Zero-trust access control	DNS filtering	Central dashboard and reporting
SIEM integration	Multi-factor authentication	Access logs

and many more...

CASE STUDY

"Compliance is a big thing for us and, with NIS2 coming, it's only going to get bigger. GoodAccess is ideal for this because it's EU-based like us, and their support is stellar."

Adam Konopásek
Head of Group Cybersecurity
