

Company Profile

UNIWIN SMART PTY LTD is a high-tech R&D manufacturing and sales company based in Australia. We possess three key technologies - infrared thermal imaging system, video image processing and electro-optic systems integration. We develop various infrared products such as Infrared thermal imaging sight, handheld infrared monocular, infrared thermometer, infrared monitoring system, etc.

Our milestone product iAiming Smart Thermal Rifle Scope not only provides high-quality thermal imaging, but also comes with globally patented First Shot Auto-Zero feature and innovative single scroll-knob guided operation. First Shot Auto-Zero is a revolutionary step forward in the firearm scope history, which allows the user to easily zero the device with one simple shot. No prior experience required, and no wasted time or bullets. The single scroll-knob guided operation also significantly enhances user experience as it minimizes the risk of mis-operations compared to multiple-button control system. iAiming turns any ordinary shooter into a great marksman, a true helper for your hunting trip.

UNIWIN SMART products are widely used in outdoor and hunting activities, as well as in professional fields such as public security, electricity, water, transportation, geological exploration, bushfire prevention, driving assistance and healthcare. We are leaders in key aspects of artificial intelligence, image processing algorithms, and low-power consumption.

Product Introduction

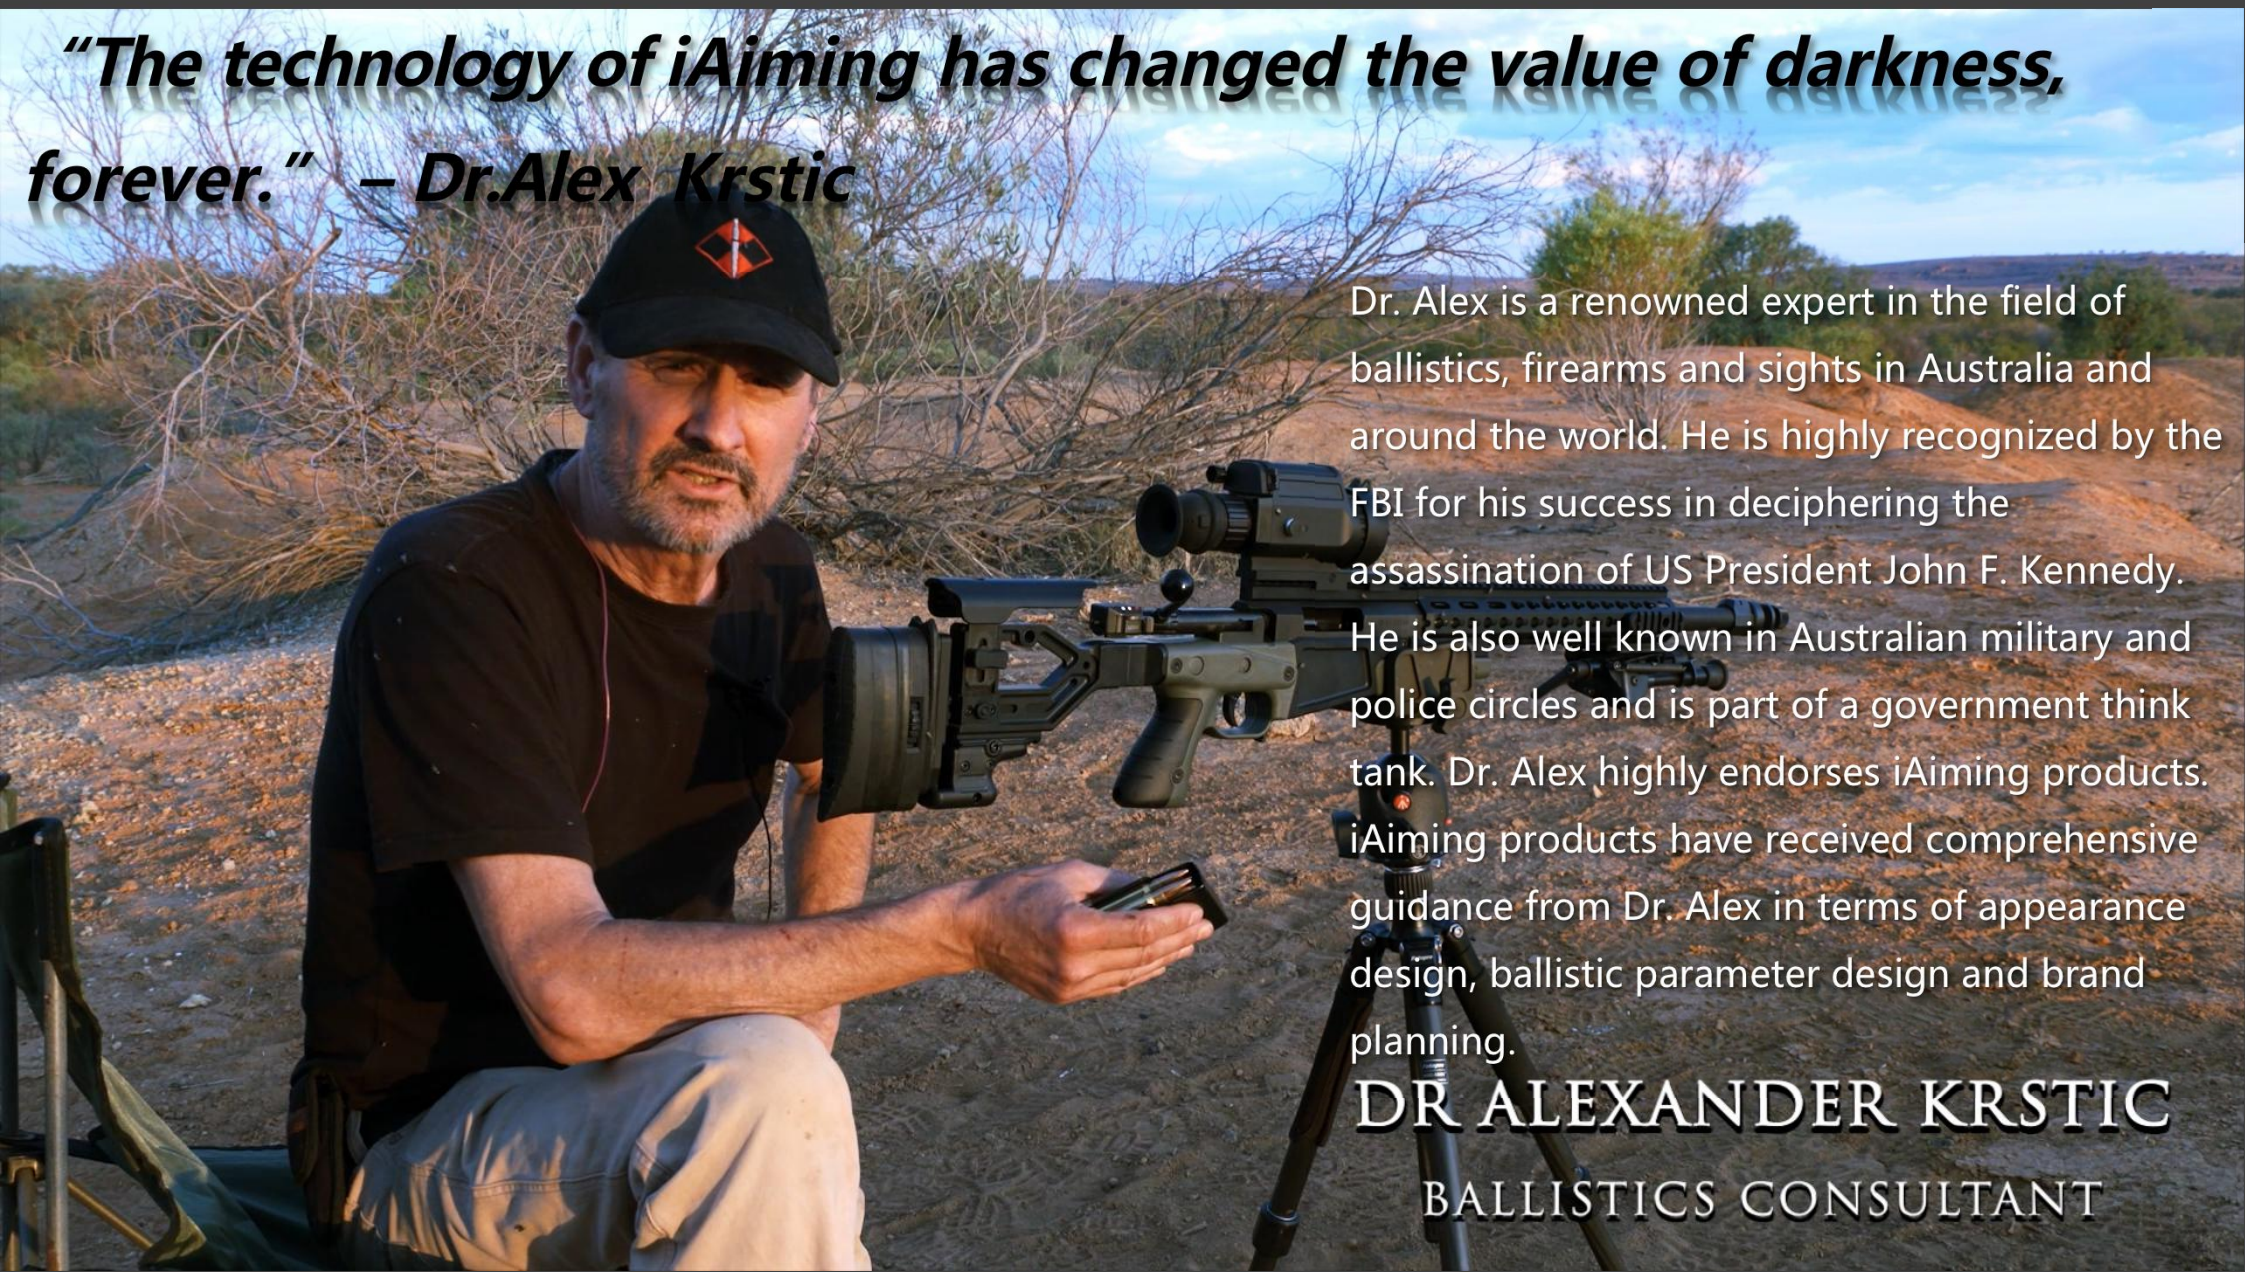

iAiming thermal scope developed by UNIWIN SMART PTY LTD provides globally patented **First Shot Auto Zero** feature throughout the entire product line, easy and automated sight-in is achieved. iAiming's artificial Intelligence design, utilizes **single dial-knob** to control the scope, First Shot Auto Zero technology saves time and bullet, and does not rely much on shooter's experience.

Key Advisor

iAiming

"The technology of iAiming has changed the value of darkness, forever." – Dr. Alex Krstic

A man with a beard and a black cap with a red logo is sitting in a desert-like environment. He is holding a small object in his hand. A rifle with a scope is mounted on a tripod next to him. The background shows dry bushes and a clear sky.

Dr. Alex is a renowned expert in the field of ballistics, firearms and sights in Australia and around the world. He is highly recognized by the FBI for his success in deciphering the assassination of US President John F. Kennedy. He is also well known in Australian military and police circles and is part of a government think tank. Dr. Alex highly endorses iAiming products. iAiming products have received comprehensive guidance from Dr. Alex in terms of appearance design, ballistic parameter design and brand planning.

Key Revolutionary Innovations

First Shot Auto-Zero

**Anyone, anywhere, anytime,
one shot zero, in one minute.**

No helper is needed, no tools required, all done by a simple click of the shooter. No more waste of bullets, time, and no need of prior experience.

Single scroll-knob guided operation

**Minimized operational risk with
simplism**

One Scroll-knob menu operation made control of the thermal scope so easy. You may operate the unit with gloves on. Operation guide in menu will assist you to choose the right option every single time, so, relax and shoot.

Applications

- Sport Shooting
- Hunting
- Industrial Thermal Measurement
- Search and Rescue
- Military, Law Enforcement and Medical epidemic prevention etc.

Our Revolutionary Inventions Shaped the Future of Thermal Scope

We constantly strive to improve and meet customer needs. Our Artificial Intelligence and First-Shot Auto Zero technology will rapidly transform Anyone into an excellent sharpshooter, Anywhere, Anytime.

Single Scroll-knob menu operation made control of the thermal scope so easy. You may operate the unit with gloves on. Operation guide in menu will assist you to choose the right option every single time, so, relax and shoot.

First Shot Auto-Zero

With one simple shot, the thermal sensor detects the spot bullet landed, and the algorithm automatically calibrate the aiming point and impact point. Zeroing is completed by one click, in one minute.

Single scroll-knob guided operation

All operations can be completed through a single scroll-knob control. Users no need to locate various buttons and can easily operate in day and night, with gloves. This minimizes the operational risk compared to a multiple button system.

A soldier in digital camouflage gear and a black cap is seen from behind, holding a black rifle. The soldier is looking out over a vast, mountainous landscape under a dramatic, cloudy sky. A small body of water is visible in the distance on the left.

**We aim for the best user experience,
and never stop our endeavor in improvements**

User friendly, for extreme environments

The aircraft grade aluminium housing combines simple operation with strength, elegance and rigidity in a compact, lightweight design. The hard-anodised coating provides an attractive, scratch free, chemical resistant surface that is easy to maintain. All components in the scope, including battery, are designed in accordance with IP67 standards, High reliability and structural strength ensures flawless function under extreme environmental conditions ranging from -40°C to $+50^{\circ}\text{C}$. The fully waterproof design handles all working conditions, even if the thermal weapon sight is exposed to water for an extended period.

iAiming Launches in Australia

May 2021, Australia: iAiming has partnered with NIOA, Australia's largest supplier of firearms, hunting optics, ammunition, and shooting accessories, to launch its range of Smart Thermal Rifle Scopes in the Australian market.

With the high-quality of the device and the excellent performance of the First Shot Auto-Zero feature, our products have seen rapid growth in the sales, and are well received by dealers as well as end users in Australia. Users have actively shared their experience and positive feedback via YouTube and Facebook. For test and review videos, please search “iAiming” on YouTube or Facebook.

Not there are several things that I did not like about this scope and these are just my personal opinions and I am sure once you get used to them they would not be a huge issue. There were also many great features as well as the quality of the image and scope in general that makes it worth the money.

I've had this scope for a few months now and put it through its paces. Just want to put this out there to help you make a more educated decision when you are doing your research before spending all your hard earned cash on a thermal. They are expensive but definitely a game changer.

Good Feedback and Reputation

I had the pleasure of being invited by [Downrange Perth](#) to spend saturday evening with a few other select gentlemen testing out the new @iAiming_official thermal scope units with a couple of reps from NIOA at the fine [First Strike Consultancy](#) Kievi Farm Lodge. It was a great night and very informative as we all had a quick play with the scopes in live fire scenarios during the night. Here's a few pics from the night I thought I would share with the group.

iAiming 612 arrived and thrown straight on 22-250, auto zero at 25m and manual zero at inch high at 100 and 200m, no time to set up profile so used 223 in the pre settings for the first night, hare shot at 280 yards and fox straight up the clacker at 240, ouch, fallow deer with 270 at 190 yards, very happy with clarity but video with a free app so not as clear, other than stupid battery box lid and hours to work out how to convert video it's very clear.. not much info in manual either, removed and re fitted scope and held zero. 38g 22lr profile was spot on at 50m after auto zero but 12" high at 100m.. so will have to manual zero to get on with that.. once sorted will post some more video 🙌
