WATER CONDITIONER

Z1 PLANARIAN & HYDRA CLEANER

Product Code: Z1

Aquarium Bio Protector is made from plant extract that can clean planarian and hydra quickly. It will not impact water quality and nitrifying system, also it's harmless to fish, shrimp and plant by following the recommended dosage.

Volume: 10, 100 (g)

Z2 ALGAE REMOVER

Product Code: Z2

Z2 Algae Remover is made from plant extract that can clean the majority of algae quickly. It has no impact on water quality and nitrifying system, also it's harmless to fish, shrimp and plant by following the recommended dosage.

Volume: 10g

Z3 BLACK BEARD ALGAE REMOVER

Product Code: Z3

This product is a fresh water black beard algae remover that can help to get rid of filamentous algae, brown algae, blue algae and black beard algae. Our special formula can slow down the metabolism of algae and eradicate the spores. It will not cause damage to the plants and fish by following the recommended dosage.

Volume: 20mL

WATER CONDITIONER

GH CONDITIONER FOR FISH & SHRIMP

Product Code: v3-R

Various essential minerals can strengthen skeleton and cartilage through absorbing by mucosa, skin and gill cells. High quality trace elements can improve pigmentation and brighten fish color and improve the survival rate. Adjusted for neutral freshwater fish, apply to Arowana, Blood Parrot, African Cichlids, Guppy, Goldfish and Tetra Fish.

Volume: 250, 500 (mL)

GH CONDITIONER FOR BEE SHRIMP

Product Code: v3-G

Various essential minerals for bee shrimp will enhance shell formation and improve molting process. High quality trace elements can increase the Astaxanthin of shell and pigmentation, which will brighten the color and improve the survival rate of shrimplets. Adjusted for Bee Shrimp environment, apply to all kinds of Bee Shrimp.

Volume: 250, 500 (mL)

KH CONDITIONER FOR FISH & SHRIMP

Product Code: v3-KH

The high quality minerals and electrolytes can prevent pH dropping or changing sharply. Various essential minerals for water creatures help shrimp molting and improve metabolism. High quality trace elements can increase pigmentation, which will brighten the color and improve the survival rate.

Volume: 250, 500 (mL)

NITROACTIVE FOR FISH

Product Code: v3-CSF

Nitroactive can efficiently establish nitrogen cycle system of microbes to achieve ecological balance, make water limpid, restrain growth of hair algae and other harmful algae. Apply to all kinds of ornamental fishes, especially sensitive species.

Volume: 250, 500 (mL)

NITROACTIVE FOR BEE SHRIMP

Product Code: v3-CSS

Nitroactive can efficiently establish nitrogen cycle system of microbes to achieve ecological balance, make water limpid, restrain growth of hair algae and other harmful algae. Apply to all kinds of bee shrimps environments.

Volume: 250, 500 (mL)

WATER CONDITIONER

NITROACTIVE FOR SULAWESI SHRIMP

Product Code: v3-CSSU

Nitroactive can efficiently establish nitrogen cycle system of microbes to achieve ecological balance, make water limpid, restrain growth of hair algae and other harmful algae. Apply to all kinds of bee shrimps environments.

Volume: 250, 500 (mL)

PS BACTERIA

Product Code: v3-PSB

The organic wastes in water would transform to Ammonia, Nitrite and Hydrogen Sulfide. PS Bacteria can converts harmful compound to essential nutrients without consuming oxygen.

We add vitamins, coenzyme and carotenoid to help aquatic to resist deaseses.

Volume: 250, 500 (mL)

STABILIZER

Product Code: v3-W

All-in-one Stabilizer is a requisite product for new tank setup and water quality maintenance. It can effectively remove Chlorine (Cl_2) and Chloramine (NH_2Cl) from water. EDTA is specially added as chelator to lower density of heavy metal ion, helping aquatic animals adapt to new environment, ease tension and simultaneously raise survival rate.

Volume: 250, 500 (mL)

STABILIZER MINERAL+

Product Code: v3-GW

This product is a multifunctional mineral stabilizer, which can effectively reduce the stress levels in your animals by removing chlorine (Cl_2), chloramine (NH_2Cl) and heavy metals from water. It also lowers the ammonia (NH_3), nitrite (NO_2) and nitrate (NO_3) levels to achieve stable environment. MORE Stabilizer Mineral+ also provides minerals to freshwater shrimp and fish.

Volume: 250, 500 (mL)

AQUARIUM NUTRITIONS

DARKEXTRACT FOR FISH

Product Code: v3-DEF

Simulating water property of tropical rain forest to form buffer system. Can reduce the impact of carbon dioxide on pH level to stabilize the quality of water.

With chelation, heavy metal ions will be removed.

Darkextract can brighten color in fish and increase breeding rate.

Volume: 250, 500 (mL)

DARKEXTRACT FOR SHRIMP

Product Code: v3-DES

Simulating water property of tropical rain forest to form buffer system. Can reduce the impact of carbon dioxide on pH level to stabilize the quality of water.

With chelation, heavy metal ions will be removed.

Darkextract can improve shrimps' health, keeping them safer while molting.

We also add multiple vitamins in it to improve shrimps' health.

Volume: 250, 500 (mL)

AQUAVITAL FOR FISH

Product Code: v3-VTF

MORE AQUAVITAL contains multiple water-soluble vitamin and lipid-soluble vitamin. It's applicable to both freshwater and marine fish. Applicable to: Arowana, Stingray, Angelfish, Cichlid, Goldfish, Clownfish, Guppy, Betta, Tetra Fish.

Volume: 250, 500 (mL)

AQUAVITAL FOR SMALL FISH

Product Code: v3-VTSF

Vitamin can be absorbed directly via gill.

MORE AQUAVITAL contains multiple water-soluble vitamin and lipid-soluble vitamin. Applicable to small fishes: Guppy, Betta, Tetra Fish.

Volume: 250, 500 (mL)

AQUAVITAL FOR SHRIMP

Product Code: v3-VTS

MORE AQUAVITAL contains multiple water-soluble vitamin and lipid-soluble vitamin. It's applicable to both freshwater and marine shrimps.

Applicable to: Crystal Shrimp, Neocaridina, Sulawesi Shrimps, Crayfish.

Volume: 250, 500 (mL)

MORE Black Edition

AQUARIUM NUTRITIONS

TM-1 NUTRIENTS

Product Code: v3-TM1

This product is a complex nutrient solution, containing a variety of rich trace elements. TM-1 Nutrient Solution can reduce the toxicity of the metal ion of harm plants, and increase the ability of plants to absorb nutrients, and decompose harmful substances of substrate. Shrimp will be enhanced with better immunity, spawning and good results in growth and color display.

Volume: 250, 500 (mL)

PLANT FERTILIZER

BING TSAU PHOSPHORUS

Product Code: BTP

Phosphorus is a macro nutrition resources for the proper growth and photosynthesis of aquatic plants.

Bing Tsau Phosphorus's nitrate free formula provides multiple high quality phosphates to plants that can be quickly absorbed by plants and enhance plant growth without safety concern.

Volume: 250, 500 (mL)

BING TSAU NITROGEN

Product Code: BTN

This product provides high quality and well balanced nitrogen to plants.

The macro nutrient can be quickly absorbed by plants. It can help plant growth and prevents yellow leaves.

(* This product does not contain phosphorus and potassium.)

Volume: 60, 150, 250, 500, 1000, 2000, 4000 (mL)

BING TSAU FOR SHRIMP TANK

Product Code: BTS

Design for aquarium plants in shrimp tank. Bing Tsau ST contains major nutrients and minerals that can easily be absorbed and utilized by plants to accelerate growth and promote root development.

The formula of Bing Tsau ST is under strict test, it can make plants flourish and is harmless to shrimp.

Volume: 60, 150, 250, 500, 1000, 2000, 4000 (mL)

BING TSAU POTASSIUM

Product Code: BTK

This product is formulated to promote the growth rate of all aquatic plants; contains major nutrients and potassium, which can improve the photosynthetic efficiency and root development. Bing Tsau will keep your plants flourish and colorful.

Volume: 60, 150, 250, 500, 1000, 2000, 4000 (mL)

BING TSAU IRON

Product Code: BTF

Provides iron element to fresh water plants. It was special formulated for easily absorbed by plants and fix withering problem. Good for enhancing green and red colors, and make your plants flourish.

Volume: 60, 150, 250, 500, 1000, 2000, 4000 (mL)

PLANT FERTILIZER

BING TSAU ORGANIC CARBON

Product Code: BTC

Our essential carbon and flourish formula can slowly release CO₂ and quickly be absorbed by plants to help them convert energy and increase cell growth rate. Bing Tsau C can also be an algaecide which will remove slight algae on plants. It is safe for use with freshwater fish and shrimp without altering pH.

Volume: 60, 150, 250, 500, 1000, 2000, 4000 (mL)

BING TSAU KH

Product Code: BTKH

KH means buffering capacity or total alkalinity that acts as pH buffers in the water. Bing Tsau KH collects high quality minerals and electrolytes that can prevent the pH dropping or changing sharply. It contains flourish formula which can enhance color and growth rate.

Volume: 60, 150, 250, 500 (mL)

BING TSAU MIX

Product Code: BTM

This product is formulated to promote the growth rate of all aquatic plants; contains Calcium, Magnesium, Sodium, Potassium, Iron, Molybdenum and EDTA which can improve the photosynthetic efficiency and root development. Bing Tsau will keep your plants lush and colorful.

Volume: 60, 150, 250, 500, 1000, 2000, 4000 (mL)

AQUARIUM FOOD

MORE SHRIMP FOOD - MEAT

Product Code: NM

Rich Animal Protein shrimp food.
Low pollution shrimp feed provides rich animal protein and amino acid source.
Not easy to dissolve, will not pollute the water.
Provide shrimps a complete protein and amino acid nutrition to promote shrimp growth, color and breeding.

Volume: 30g

MORE SHRIMP FOOD - VEGETABLE

Product Code: NV

Full Vegetable Nutrition shrimp food.
Low pollution shrimp feed provides full vegetable nutrition and trace elements.
Not easy to dissolve, will not pollute the water. Helps promoting shrimp growth, color and breeding.

Volume: 30g

MORE SHRIMP FOOD - WHITE

Product Code: NW

Rich Minerals shrimp food.
Low pollution shrimp feed provides rich minerals and trace elements.
Contain natural nutritional value, with necessary minerals, vitamins and trace elements for shrimps growth.

Volume: 30g

MORE SHRIMP FOOD - SNOWFLAKE

Product Code: NS

Zero Water Pollution shrimp food.
Super clean shrimp feed provides vegetable protein and dietary fiber.
Will not pollute the water.

Volume: 30g

MORE BABY SHRIMP FOOD

Product Code: B

Powder food for shrimplet.
Designed for shrimplet. Rich in vitamins, minerals and trace elements, with additional algae, chitin and unsaturated fatty acids to promote shrimp growth, color and breeding.

Volume: 10, 40, 100 (g)

AQUARIUM FOOD

MORE SPINACH POWDER

Product Code: SP

The chosen spinaches are ground into fine particles to keep the whole nutrients for shrimps. As the lord of vegetables, spinach contains vitamin A, B, C, K, folate and β -carotene. The rich iron and calcium in spinach can help shrimps having bright colors and smoother molting.

Volume: 10, 40 (g)

MORE PACMAN FROG FOOD

Product Code: PF

MORE Pacman Frog Food is made from fine grinded powder without artificial thickener. It contains complete nutrition such as protein, multiple enzyme, vitamins and minerals.

Volume: 60, 120 (g)

ENZYME & BACTERIA

VITALITY BAG

Product Code: V

This product contains a combination of bacteria and minerals, which are beneficial for aquatic organisms. It increases algae growth which can become shrimp food and also increases shrimplet survival rate. It also helps with your shrimp digestion and protects your shrimp digestive system, allowing your shrimp to eat healthily.

Bag Size: [L] for 50L up, [M] for 25-50L, [S] for 25L below

MAGIC POWDER (ENZYME POWDER)

Product Code: MP

This product can increase microbes in water, and increase beneficial bacteria in the gut of shrimp, and to ensure water quality and stability, maintain the good health of shrimp, help digestion, protect the digestive tract, improve feed efficiency, and support survival of shrimp.

Volume: 40, 100 (g)

MILIONE BACTERIA POWDER

Product Code: BM

This product contains hyphomycetes and heat resistance yeast, they are implanted in diatomite by our unique technology. Each gram contains 5 million bacteria. It can build biological ecosystem, reduce nitrite and shorten setup time when start new tank.

Volume: 70, 200 (g)

SUBSTRATE & MINERALS

MORE NATURE SOIL

Product Code: BLKSoil

For plant and shrimp aquarium.

MORE Nature Soil is made from high quality natural soil, sintered into a soft, porous, and granular structure that helps maintain stable, healthy, and clear water for a long period of time. This product contains organic acids and multi-nutrient fertilizers, which can bring the pH and KH level down.

Volume: 1, 3, 8 (Liter)

Grain Size: [L] 3.0-5.0mm, [M] 1.5-3.5mm, [S] 1.0-2.0mm

MORE NATURE BROWN SOIL

Product Code: BRWSoil

For plant and shrimp aquarium.

Made from high quality natural soil, sintered into a soft, porous, and granular structure that helps maintain stable, healthy, and clear water for a long period of time. Contains more organic acids and multi-nutrient fertilizers than black soil. Quickly help the pH and KH level down.

Volume: 1, 3, 8 (Liter)

Grain Size: [L] 3.0-5.0mm, [M] 1.5-3.5mm, [S] 1.0-2.0mm

SUBSTRATE & MINERALS

GOKUJOU BLACK SOIL

Product Code: GSoil

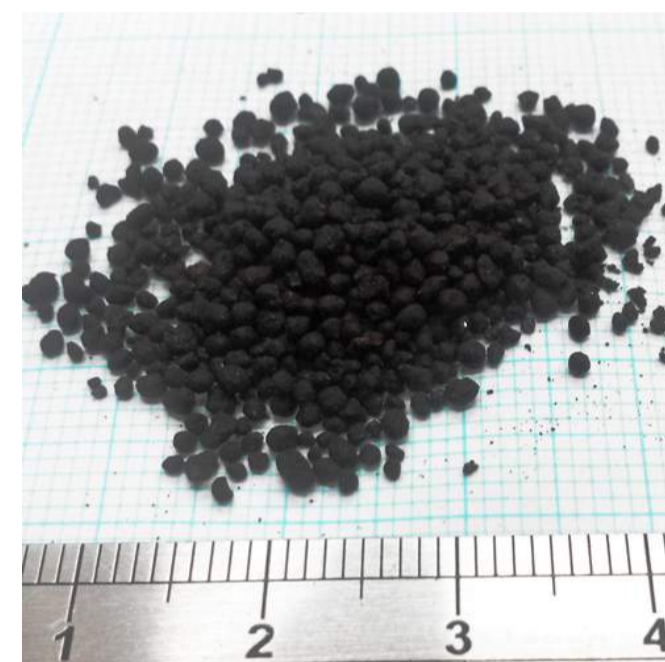

Special soil for plant aquarium.

The porous granular structure provides an ideal space for root stretching and helps plants grow faster. The soil will slowly release rich nutrients into the water to reduce environment oscillation for a long time. Its outstanding filter ability can remove driftwood colour from the water and bring you crystal clear water for a long time.

Volume: 8 Liters

Grain Size:

[Normal] 3.0mm-5.0mm, [Powder] 1.5mm-3.5mm, [Super Powder] 1.0mm-2.0mm

SULAWESI VOLCANIC ROCK

Product Code: SU

High quality neutral pH substrate.

The high quality volcanic rock extracted from Sulawesi, which provides the trace elements for Sulawesi shrimp growth, it also has high surface area that provides living space for algae and probiotics.

Volume: 4, 8 (Liter)

Grain Size: [XL] 15-25mm, [S] 3-8mm

SUBSTRATE & MINERALS

MONTMORILLONITE CLAY

Product Code: MONT

This product is made from high quality Japanese silicate clay, which can remove impurities and peculiar smell from the water. Montmorillonite Clay also provides essential minerals and trace elements to shrimp, fish and nitrobacteria. It is highly effective in enhancing shrimp color, increasing survival rate and stabilizing the water quality.

Volume: 100, 200 (g)

MIRONEKUTON CLAY

Product Code: MIRO

This product is made from deep ocean minerals, which can remove impurities and peculiar smell from the water for very long time. It also provides essential minerals and trace elements to shrimp, fish and nitrobacteria. It is highly effective in enhancing shrimp color, increasing survival rate and stabilizing the water quality.

Volume: 100, 200 (g)

MIRONEKUTON POWDER

Product Code: MIRO-P

This product is made from deep ocean minerals. It absorbs impure substances, makes the water crystal clear and eliminates odors. In addition, it can stabilize pH value, intensity color of creatures, and enhance breeding rate.

Volume: 80g

FILTER MEDIA

HOLLOW BALL

Product Code: HB

Super high speed bacteria house.

There are abundant micro pores inside the material to adsorb the heavy metal ions and other harmful substance. It also provides endless growing space for bacteria.

Mini Pack: 60g / Box: 0.5, 1, 3, 5 (Liter) / Bag: 1, 3, 10 (Liter)

CERAMIC BALL

Product Code: 3D

The ideal filter media for big tanks.

It greatly improves the surface area and adsorbs the heavy metal ions and other harmful substance. It also provides enormous growing space to nitrifying bacteria.

Box: 0.5, 1, 3, 5 (Liter) / Bag: 1, 3, 10 (Liter)

FAR INFRARED BALL

Product Code: IR

Made from tourmaline.

The great surface area helps accelerate bacteria growth and filtration. The tourmaline emits infrared and negative ions which can break down chlorine, free radicals and emulsify lipid. It helps keep water clean and further improve metabolism.

Box: 0.5, 1, 3, 5 (Liter)

MICRO PORE RING

Product Code: MR

Made from volcanic rock.

It can release negative ions that help remove harmful substances and stabilize pH. The volcanic rocks contain rich minerals and trace elements. Micro pore structure provides massive space for the growth of bacteria, helps build excellent biofilter system.

Box: 0.5, 1, 3, 5 (Liter)

BIO CERAMIC RING

Product Code: CR

Classic filter media for aquarium lovers.

Provides large space for bacteria growth and maintain good flow rate of water. It has balance performance of filtration, bacteria culturing and mineral condition. It is commonly recommended as an ideal filter media by aquarium workshop and fish farm.

Box: 0.5, 1, 3, 5 (Liter) / Bag: 1, 3, 10 (Liter)

FILTER MEDIA

BIO CERAMIC CYLINDER

Product Code: CC

Tightly stacked media provides massive bacteria growing space. Porous cylinder structure can be tightly stacked which can provides massive bacteria growing space. It also keeps good filtration performance and mineral condition ability.

Mini Pack: 60g / Box: 0.5, 1, 3, 5 (Liter) / Bag: 1, 3, 10 (Liter)

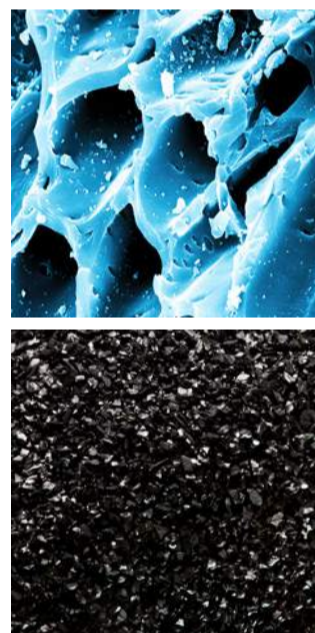

PUMICE

Product Code: PP

Economical, reliable and super light media. The porous structure provides great water absorption rate and massive space for bacteria growth. It's a super light and reliable filter media for cleaning water and building bio filter.

Box: 0.5, 1, 3, 5 (Liter) / Bag: 1, 3, 10 (Liter)

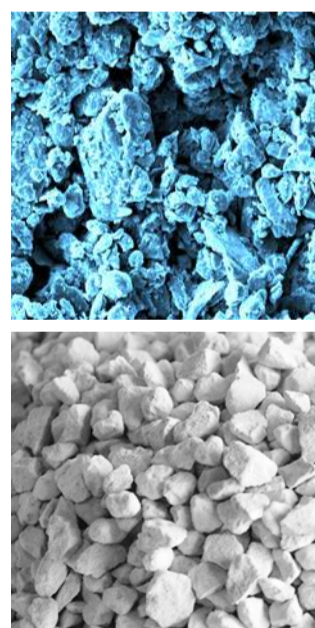

ACTIVATED CARBON

Product Code: GAC

100% virgin activated carbon. We use 100% virgin activated carbon in our product. It has high surface area available for adsorption. It can be used to improve water clarity, while also it removes odors & heavy metals. It will not change the pH of the aquarium water.

Volume: 30x3, 150, 100x3, 250, 500 (g)

JAPAN ZEOLITE

Product Code: ZEO

100% Japan natural zeolite. The zeolite from Japan has higher porosity and cation exchange capacity than regular zeolite from other places. It can remove part of harmful compounds from water to help keeping water clean and fresh. Zeolite also slowly releases many high quality trace elements.

Volume: 30x3, 150, 100x3, 250 (g)

MORE ION EXCHANGE RESIN

Product Code: ION

We use whole new ion exchange resin for organic wastes control.

- Total Exchange Capacity: 4.8 eq/L
- Water Retention: 50-58%
- Particle Size: (0.315-1.25 mm) \geq 95%
- Appearance: Milk white to light yellow
- Ionic Form Supplied: Free Base

Volume: 100mL with Nylon bag.

ACCESSORIES

SF HANG ON FILTER

Product Code: SF

SF Filter uses high efficient silent pump and activated filter cartridge which has outstanding flow rate to keep the water clean and increase the oxygen in the water. The hang on design makes the filter to be easily installed on all kinds of tank.

- SF-150 (4W): Under 15L (4 US gal)
- SF-280 (4.5W): 20-35L (5-9 US gal)
- SF-380 (4.8W): 35-50L (9-13 US gal)

SQH AQUARIUM HEATER

Product Code: SQH

The fully-submersible heater within high quality shatter proof quartz glass . Electronic thermostat with heating safety control chip for precise temperature range between 20°C and 32°C (64°F - 93°F).

- SQH-25 (25W): Under 20L (5 US gal) / SQH-50 (50W): 20-40L (5-10 US gal)
- SQH-100 (100W): 40-100L (10-25 US gal) / SQH-200 (200W): 100-200L (25-52 US gal)
- SQH-300 (300W): 200-300L (52-79 US gal)

*Only SQH-200 & SQH-300 have protection case.

SLF-200 FILTRATION CLIFF

Product Code: SLF

SLF-200 can create stable water flow. Removable double cartridge has great filtration performance. The faux stone is made from non-toxic, safe and environment-friendly resin very suitable for terrapins or frogs to climb or bask.

Dimensions: 180x175x185mm / Flow rate: 200L/hr
Voltage: 220-240v (SLF-200), 100-127v (SLF-200L)
Frequency: 50-60Hz / Power: 5W / Plug type: A Type

SL FILTER CARTRIDGE

Product Code: FC

Activated carbon filter cartridges for SF Hang on Filter and SLF-200 filtration cliff.

- Compatible Models:
- SF-150 Cartridge (FC-150)
 - SF-280 Cartridge (FC-280)
 - SF- 380 Cartridge (FC-380)
 - SLF-200 Cartridge (FC-200)

SN-360/410W WOOD GRIP NET

Product Code: SNW

Designed for removing debris or transporting small animals in water. The net provides better protection. The comfortable and secure wood grip gives you smooth handling experience. The compact and lightweight design makes it an ideal tool for the shrimp and fish breeder.

Stick: Ø5x0.6 Carbon Fiber Tube, Handle: SL-Customized Wood Grip
Full Length 360/410mm
Net Diameter 45mm, Net Depth 50mm

ACCESSORIES

SN-360 AQUARIUM NET

Product Code: SN

Compact and lightweight design makes it an ideal and reliable tool for the shrimp and fish farm. Designed for removing debris or transporting small animals in water. Soft nylon mesh net will protect the fish and shrimp. Plastic coated handle provides a comfortable and secure grip.

Stick: Ø5x0.6 Carbon Fiber Tube, Handle: Plastic Coated

Full Length 360mm

Net Diameter 45mm, Net Depth 50mm
