

# GET ALL EMPLOYEES ON YOUR SECURITY TEAM

IT cannot win the fight against cybercrime alone.  
Turn all your employees into allies with awareness training and phishing simulations from the G DATA academy.

Web-based training with everything your team needs to know about digital security

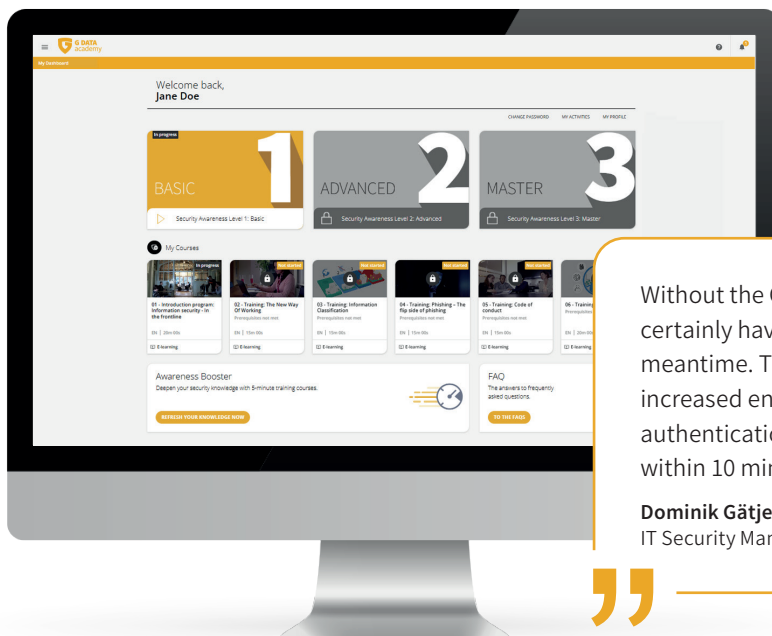

10- to 15-minute lessons - to be completed on the fly during the daily work routine

Varied formats such as videos, quizzes and small games so that the new knowledge is firmly embedded

Understandable even without technical know-how

Without the G DATA academy, our company would certainly have been encrypted three times in the meantime. The security awareness of all employees has increased enormously with the training. And with SAML authentication, we were able to set up the platform within 10 minutes. It really wasn't rocket science.

**Dominik Gätje**  
IT Security Manager at Edelrid

## THE TOPICS

- 👁️ Phishing & data theft
- 📱 Mobile & remote working
- 💻 Malware & Ransomware
- 📖 Data protection
- ☁️ Working in the cloud
- 🔔 Report incidents
- ⚠️ Sensitive information
- 📋 Code of Conduct
- 💬 Social networks
- 🔒 Secure passwords
- 🛡️ Physical security
- 🗑️ Clean Desk
- 🧠 Artificial Intelligence
- 👤 Deepfake

...and much more.

## OPTIONAL

- 👉 Instruction on occupational health and safety, fire safety, antitrust law and more
- 👉 Advanced training "Phishing"
- 👉 Gaming series "Ransomware"
- 👉 Awareness Game "In the net of the Social Engineers"

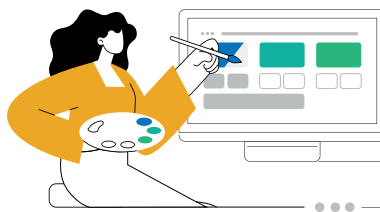

### Implementation

## YOUR 3 OPTIONS TO GET STARTED WITH AWARENESS TRAINING

### Platform & Content

All courses in 3 levels. Available immediately on our platform.

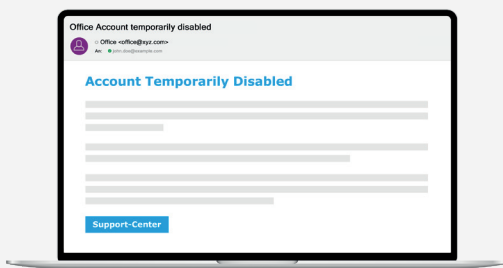

### White Label Solution

Preconfigured learning environment in the look and feel of your company.

### Training as a Stream

Easy integration into existing LMS. Compatible with all common providers.

### Phishing Simulation

## PRACTICING FOR EMERGENCIES

Show your colleagues what phishing emails look like in real working life and help them to react correctly. And if a wrong click does happen? No problem, direct feedback will teach them what to look out for. After the test, you will receive a comprehensible report with key figures on how often potentially dangerous attachments were opened or data was disclosed.
