

# New ITALTRONIC enclosure for the 7" touch display module 2 RASPBERRY

[Home](#) > [New ITALTRONIC enclosure for the 7" touch display module 2 RASPBERRY](#)  
(/new\_italtronic\_enclosure\_for\_the\_7\_touch\_display\_module\_2\_raspberry/)

*Padua, 21st of October 2025*

The world of displays has evolved tremendously in recent years, and today users prefer to use display modules with integrated control electronics directly, rather than classic display panels that required adding extra weight to the existing electronics to command the display.

**Italtronic**, always very attentive and ready to follow market trends, has decided to offer a **new plastic enclosure**, which will house the 7" display module of the Raspberry, version 2, and its corresponding control board.

The new "aesthetic" enclosure has been engineered to be **wall-mounted** for **Home Automation (Domotic)** applications, or **panel-mounted** for **industrial applications**.

Production is expected by the end of the year, but in the meantime, you can find all the necessary information directly on our website [https://eng.italtronic.com/products/all\\_products/en\\_embedded\\_display/en\\_DomoPi\\_7/](https://eng.italtronic.com/products/all_products/en_embedded_display/en_DomoPi_7/) ([https://eng.italtronic.com/products/all\\_products/en\\_embedded\\_display/en\\_DomoPi\\_7/](https://eng.italtronic.com/products/all_products/en_embedded_display/en_DomoPi_7/)) to start your new projects.

Follow us through social media or subscribe to our newsletter for future developments! All information is available at the bottom of our home page <https://eng.italtronic.com/> (<https://eng.italtronic.com/>)
