

Layout Design and Test systems

With customized layouts and intelligent test solutions for market-ready products

Our Services for You

- ▶ Individual design consulting for optimal electronics solutions
- ▶ Layout design for printed circuit boards, tailored to function, production, and EMC
- ▶ Development of test systems for prototypes and series products
- ▶ Integration of test concepts into your development processes

Electronics²

Excellence in electronics prototyping

Made by beflex, your Specialist for Prototyping, Small series production and more.

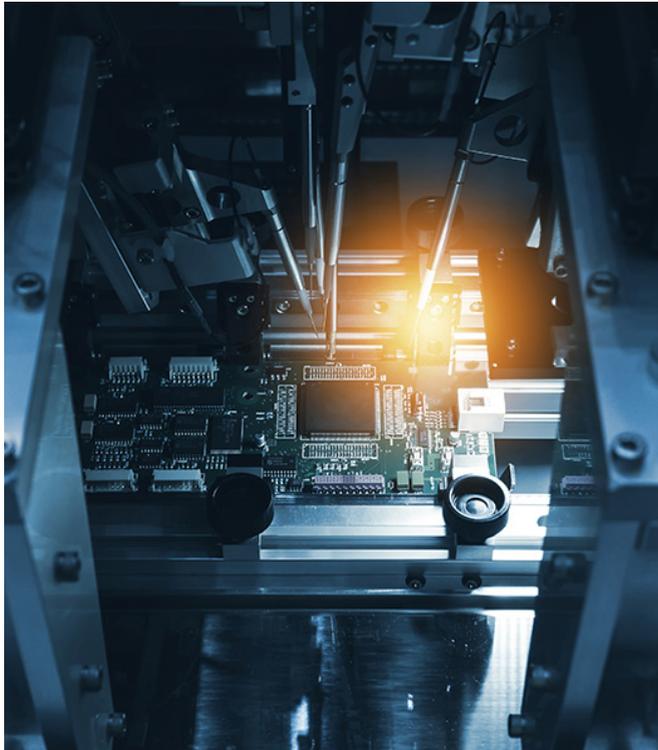

beflex
A Company of Kontron

Prototypes and Small Series

Agile manufacturing for sophisticated electronic solutions – from idea to series production.

Our Services for You

- › Rapid prototyping for complex electronic assemblies
- › Support during product transition to series production
- › SMD, THT, and THR assembly on highly flexible machines
- › Express manufacturing for time-critical development projects
- › Integrated material management for fast availability

Prototype Express Service

Fast solutions – with a seamless prototyping process.
