Accessory	To be codified		/	PE-Nozzle
Accessory	To be codified		/	Plastic fine nozzle
Accessory	To be codified		/	Brass fine nozzle

The range of PU-foam guns is almost complete now, I think there are only a couple of specialist models that are still being studied together with our Chinese supplier; even the accessories I think are complete. I have some ideas for another new accessory, but which to date is still only an embryonic project.
