

JOINT PATROL RIFLE

The next evolution in firearm excellence is here. The Joint Patrol Rifle was designed and built with the most demanding and particular customers in mind. From the enhanced bolt carrier group, which reduces overall recoil impulse, to the Cold Hammer Forged barrel with an innovative 4-Bolt Connection System; this design dramatically rewrites the standard for rigidity, stability and accuracy. The fully ambidextrous lower offers right- and left-handed shooters even more flexibility and control, while a 10.5" handguard provides reduced weight and easy attachment of M-LOK accessories. This platform is jointly used by NATO forces, military units, and law enforcement agencies worldwide, ensuring interoperability, proven reliability and performance in the most challenging operational environments.

FEATURES:

- + Superfinished DLC bolt carrier is equipped with a patented buffer for optimized cycling and improved recoil impulse
- + 12.25" Cold Hammer Forged proprietary steel chrome-lined barrel for a lifetime of accuracy and durability
- + Innovative 4-Bolt Connection System to ensure greater accuracy
- + Free-floating M-LOK handguard assembly featuring high-temperature carbon fiber composite heat shields to help reduce thermal signature
- + Fully ambidextrous lower receiver and charging handle enables shooter to operate important rifle mechanisms without moving dominant hand from rifle grip
- + Durable NIR-reducing coating on lower receiver, upper receiver, and handguard assembly

SPECIFICATIONS:

Barrel Material:	DD Proprietary Steel
Barrel Type:	Cold Hammer Forged
Barrel Profile:	"Heavy Government"
Rifling Twist:	1:7"
Gas System Length:	Carbine
Muzzle Device:	HUXWRX QD 556 Flash Suppressor
Overall Length:	29" – 32.25"
Weight (unloaded):	6.6 LBS
Caliber:	5.56x45mm NATO
