# About Us

The innovation journey started in 2016, Cheerble wanted to create innovative products that would enhance the bond between pets and their human companions. Nowadays, there is still a lack of pet products that could truly enrich the lives of our pet in the industry. With this realization, we became inspired to think outside the box and explore new ways to connect pets and people in a modern, meaningful way with current technology.

We believe in a modern, holistic approach to pet care that inspires and empowers the innovative spirit of pet owners with edged technology-driven solutions. We strive to make pets and their human companions' lives better, more fulfilling, and more connected through technology.
