

Take Control of Your Observability Data

Cribl makes open observability a reality, giving you the freedom and flexibility to make choices instead of compromises.

Every organization has to deal with a myriad of challenges: scaling to keep pace with data growth, increasing cyberthreats, flat budgets, and a dearth of talent. In the face of these challenges, operations teams have been forced to make compromises in what telemetry data they deliver to which analysis tools.

But what if you could make choices without compromising? What if you could unlock the value of *all* of your data no matter how fast it grew and deliver it in any format to any tool that needs it? What if you knew the exact best time to visit the restroom during a movie at the theater? (*Kidding — you're on your own here.*) What if this could actually be done without busting your budget?

The Cribl suite of products puts you back in control of your telemetry data, giving you the power to choose what is best for your organization, the control to get the data where you want, and the flexibility to put it in any format you need on the fly.

AT A GLANCE

FOUNDED:

2018

FOUNDERS:

Clint Sharp
Ledion Bitincka
Dritan Bitincka

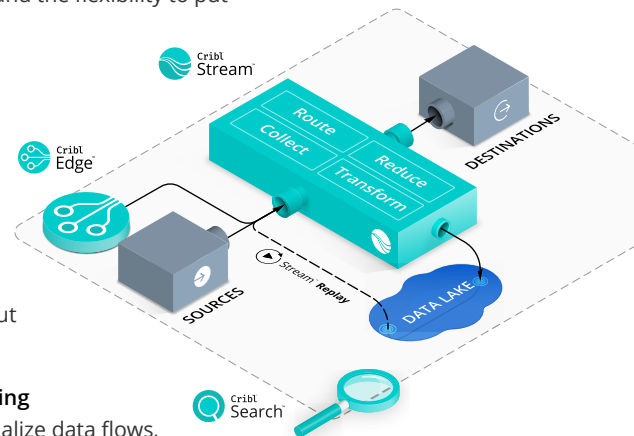

HQ:

San Francisco, California

INVESTORS:

CRV
Sequoia
Greylock
Redpoint
IVP
Tiger Global

- **Eliminate tool and vendor lock-in**
Choose the best vendor tool(s) without requiring new agents or collectors.
- **Simplify observability data engineering**
Point-and-click to stream data in, visualize data flows, and replicate and scale functionality.
- **Enrich and normalize telemetry data**
Provide greater context to save time and enable a deeper, more actionable response from your security and observability tools.
- **Go "ALL-IN" on choice and control over your data**
Route data where it has the most value. Mask and control access to sensitive data.
- **Answer questions you didn't know you had**
Route to multiple destinations and maintain full fidelity data in inexpensive object storage; replay it any time for future analysis.
- **Focus on the destination, not the journey**
Free your teams' time to solve problems instead of modifying / maintaining custom solutions.

Industry Recognition

Named to CNBC's Top Startups for the Enterprise, honored at the Bank of America Tech Innovation Summit, and recognized on CRN's 2022 Cloud 100, Big Data 100, and Emerging Vendors.

Enterprise Adoption

The Fortune50 and beyond ♥ Cribl, including: Aramark, Autodesk, Chevron, Emerson Electric, Leidos, Lowes, S&P Global, The Gap, TransUnion, ViacomCBS, and more.

Seamless Integrations

Integrations with Splunk, Elasticsearch, CrowdStrike, Palo Alto Networks, and many more to get your telemetry data from any source to your favorite destination.

Strong Backing

Strategic investment from top VCs including CRV, Sequoia, Greylock, Redpoint, IVP, and Tiger Global.

Experienced Leadership

Executives from industry-pioneering companies including Splunk, Google, Cloudera, AppDynamics, and Extreme Networks.

First Principles

Software designed with a customers-first mentality to solve real problems from the ground up.
