

While the name, logo, and some of the features may be new, Nocpix is born out of years of research, development, and experience in building thermal optics for hunters and outdoorsmen. Our manufacturing and technology development comes from the world's leading microbolometer (thermal sensor) fabricator. We've paired this strong history of success with a fresh look at the available options in the thermal industry.

This brand represents a launch of next generation thermal devices with a unified goal: provide the best image quality and consistently positive user experience. This idea can be noticed throughout the product line — image quality and user experience comes above all else. We support this mission through our research and development, field testing, and countless hours behind the lens.

ONE STEP AHEAD IN IMAGE QUALITY

More than just a red "X," the Nocpix logo symbolizes the connection between sensor and pixel counts, reflecting our unified goal: to deliver the best possible image by developing cutting-edge sensor technology.

ADVANCED THERMAL SENSOR

- The largest market share
- Self-developed and self-manufactured
- The first Gen-2 HD sensor (1280, 60Hz)
- The first 6μm sensor

AI IMAGE ALGORITHM

- Pioneer in AI research and application
- Elevating image quality to a new level
- Automatically enhance, denoise, and resolve

EXPERTISE IN IMAGE TUNING

- Over a decade of industry experience
- Deep expertise in image tuning
- Combines sensor and algorithm for maximum performance

Ocular Zoom

ONE STEP AHEAD IN USER EXPERIENCE

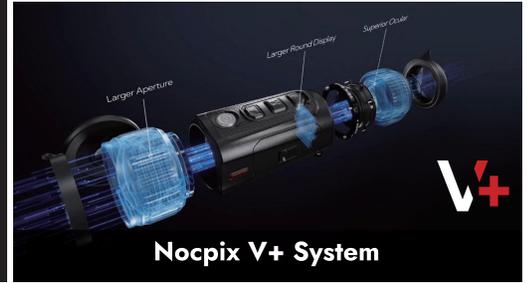

We thrive on the delicate balance of pushing complex technological boundaries while delivering products that intentionally feel simple and intuitive to use. Deeply involving sophisticated hunters—our seed users—in every stage of product design and development, Nocpix is dedicated to offering one-step-ahead simplicity of use.

One-handed Operation

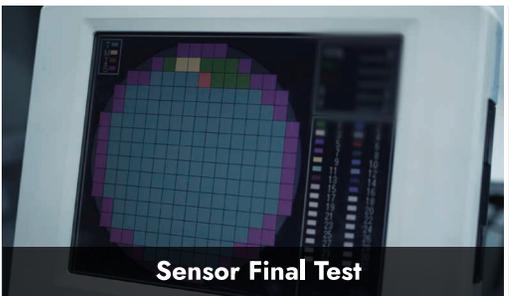

N-Link

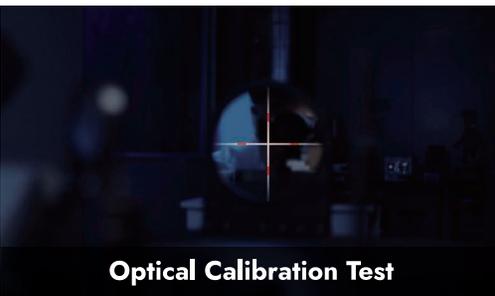

Nocpix V+ System

ONE STEP AHEAD IN SERVICE

Nocpix provides the longest 4 years whole product warranty amount the industry. Although Nocpix's products rarely encounter issues, all products are backed by a thorough and complete warranty.

Sensor Final Test

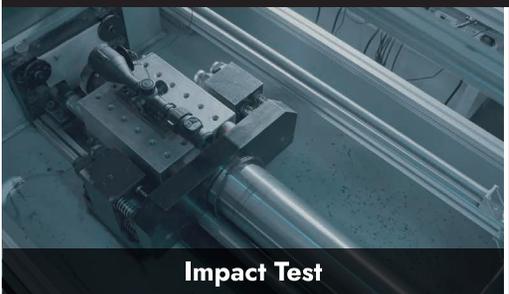

Optical Calibration Test

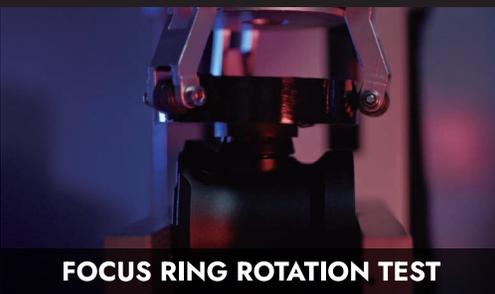

Extreme Temperature Test

ONE STEP AHEAD IN QUALITY CONTROL

Before leaving the factory, our products must go through 95 processes, 495 monitoring items, and 45 extreme tests. Our rigorous test and inspection system was built to exclude any equipment factor, giving you the absolute concentration on spotting and shooting

Impact Test

FOCUS RING ROTATION TEST

Waterproof Test
