# A Smarter Way to Pack and Ship

You need packaging that protects without adding weight, waste, or cost. Our molded pulp packaging does all that giving you a strategic advantage:

## Lower costs

Our molded pulp packaging is designed to save warehouse space and minimizes storage, packaging and transportation costs. Its reliable protection reduces the need for additional packaging materials.

## Maximum safety

Molded pulp packaging provides maximum protection with just one layer. Its unique shape absorbs impacts and dampens vibrations, greatly reducing damage during transport.

## Modern Sustainable Image

Switching to molded pulp packaging enhances your brand image by demonstrating a commitment to sustainability. It appeals to environmentally conscious customers and strengthens your position as a responsible business partner.

## Countless applications

Our packaging solutions are lightweight, durable, and versatile – suitable for a wide range of product types and industries. From product inserts to void filling, molded pulp adapts to your needs with minimal material usage.

## Packing with ease

Molded pulp components can be cut, shaped, and folded to fit your specific packaging requirements. Their form-fitting design reduces the need for extra securing materials such as glue, tape, or plastic fillers.

## Recycling and composting

Made from waste paper, after our molded pulp packaging can be returned for recycling or composting. When returned to nature, the material biodegrades within 90 to 180 days – leaving no harmful trace behind.

# Packaging That **Works for You**

We adapt to your workflow, not the other way around. From universal packaging sheets to made-to-measure designs, our molded fiber solutions fit seamlessly into your operations.

## Custom Packaging

We develop molded pulp packaging solutions that are specifically designed to meet the requirements of your products, processes, and logistics. They provide exceptional protection and find application in numerous industries.

## Versatile Packaging

Innovative, three-dimensional sheets made from recycled paper. Designed to replace traditional bubble wrap and EPS, PulProtect drastically reduces the environmental footprint of e-commerce, providing reliable protection for products of all shapes and sizes.

# Custom Protection, Engineered to Your Product

Need a **precise fit** for complex or sensitive items? We produce **protective packaging** that meets your standards, elevates your brand, and **simplifies your operations**. We collaborate with your team from concept to delivery to make sure our packaging fits your industry, your pressures, and your customers.

## How We Work:

- 🍃 Learn your product and flow
- 🍃 Develop a prototype or recommend a fit
- 🍃 Test for performance
- 🍃 Deliver on time and adapt as you grow

# Adaptable Packaging for **Complex Needs**

Whether your goods are fragile, valuable, or safety-critical - our packaging keeps them safe and your operations smooth.

## **Automotive Manufacturing**

Protective packaging for spare parts and components.

## **Medical Equipment & Pharma**

Compliant and secure packaging for sensitive products.

## **Electronics & White Goods**

Shock-absorbent solutions with naturally anti-static properties.

## **Food Industry**

Sustainable, food-safe trays and punnets.

## **Furniture & Home Goods**

Secures corners and fills gaps to prevent shifting and damage in transit.

## **Sanitary Equipment**

Hygienic and recyclable molded fiber packaging solutions.

# Versatile Packaging: Smart by Design, Flexible in Application

**PulProtect** is your versatile molded fiber packaging solution-engineered to protect what matters most.

- ▮ **Absorbs shocks and vibrations** with a 3D cushioning structure
- ▮ Ideal for **fragile goods**: electronics, ceramics, glass, and more
- ▮ Flexible format **secures corners, wraps surfaces, and fills voids** with ease
- ▮ Reduces breakage, **simplifies packing**, and cuts plastic waste
- ▮ Made from **100% recycled cardboard** and paper

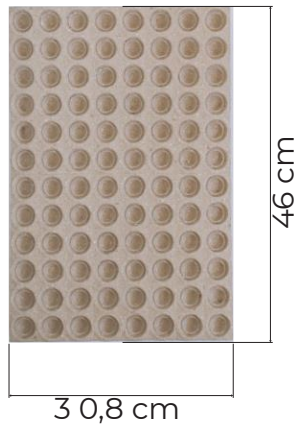

**PulProtect** turns everyday packaging into a smart, sustainable advantage.

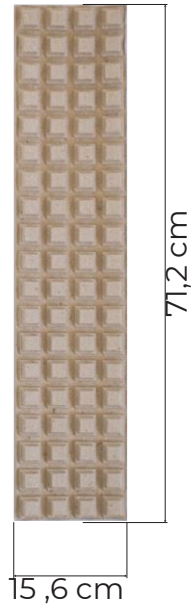

# Format Comparisson

The PulProtect family includes four distinct sheet formats - each engineered to meet specific packing needs. Whether you need **precision corner wrapping**, **multi-purpose void fill**, or **layering protection**, PulProtect offers the **right level of cushioning, speed, and usability** for your packing lines.

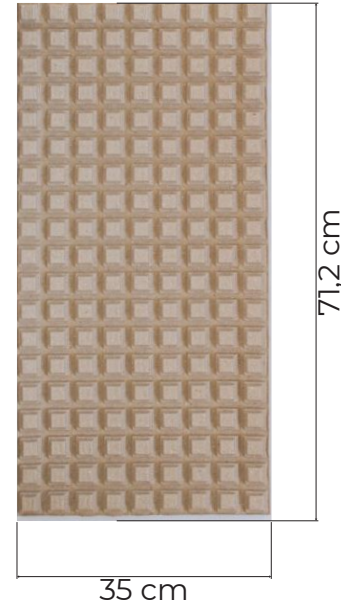

## Air

For small and fragile items

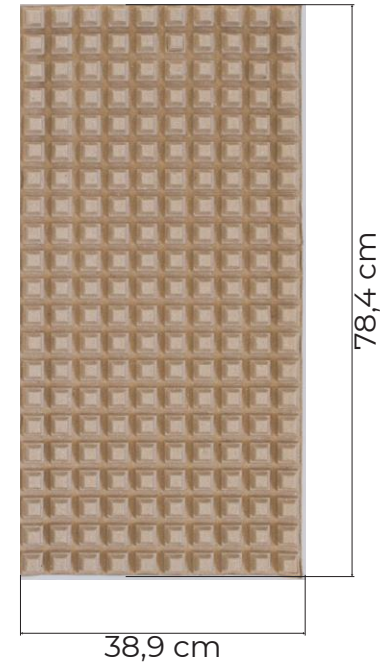

## Edge

Ideal for corners and long products

## Pro

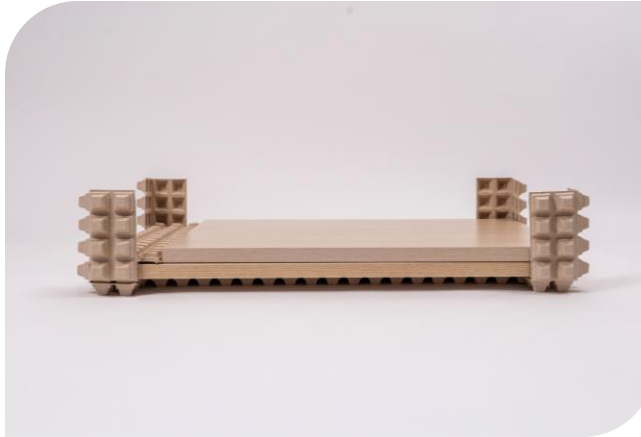

Designed for medium-sized products

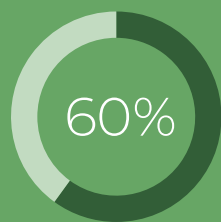

## Pro +

Perfect for heavy and bulky products.

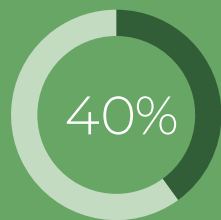

# Practical Applications

## Cut Transport & Storage Costs

Reduce your logistics expenses with up to 60% savings on transport and storage volume thanks to our stacking technology

## Minimize Product Damage

Protect your products better and lower your return rates by reducing damage claims by 20–40%.

## Boost Packing Speed

Accelerate operations and improve workflow efficiency with up to 30% faster packing times.

# Packaging That Contributes to Your Business Goals

When we partner, your packaging performance improves measurably — helping you save space, reduce damage, and speed up operations.

You stay fully compliant with the latest EU packaging rules (PPWR), which now require recyclable materials, reduced weight and volume, less empty space, and clear labeling across the entire packaging life cycle.

Our solutions are easy to implement in your existing manual or automated lines, and with Extended Producer Responsibility (EPR) linking fees to recyclability, you benefit from lower costs by choosing packaging with real environmental value.

# Built on Precision. Grown through Trust

At **Trakya Pack**, you work with a team that understands the full journey - product, logistics, sustainability, and business impact. We speak the language of production, engineering, and customer service.

## You can rely on us for:

- ✔ Transparent communication
- ✔ Stable delivery times
- ✔ Scalable capacity
- ✔ Hands-on design support
- ✔ Full traceability and documentation
