

PROFESSIONAL SOLUTIONS FOR CONDENSATE MANAGEMENT AND INDOOR AIR QUALITY MEASUREMENT

ABOUT US

For more than 45 years, Sauermann Group has designed, manufactured and sold products and services dedicated to the industrial and HVACR markets. The Group specifically focuses on the detection, measurement and control of indoor air quality (IAQ).

HIGH ACCURACY
UNMATCHED RELIABILITY
MULTIPLE APPLICATIONS

Measurement instruments: Sauermann measurement instruments monitor a broad spectrum of indoor air quality parameters and serve a wide range of applications, from building ventilation (heating and air conditioning) systems, to cold-chain installations and combustion gas analysis. Backed by our testing laboratories and in-house research and development programme, Sauermann instruments deliver the accuracy and reliability that HVACR engineers need.

LOW SOUND LEVEL
LOW FAIL RATE
HIGH PERFORMANCE

Condensate management solutions: Safe and effective condensate management for air quality systems can be a challenge. Sauermann pumps are designed to look good, while our patented piston technology delivers whisper-quiet operation and unrivalled reliability.

Ventilation

Air conditioning

Refrigeration

OUR PRODUCTS & MARKETS

● Climate systems engineering:

Heating & air conditioning installers, inspection bodies, technical consulting firms, air treatment unit manufacturers, system tuners, operation & maintenance contractors, etc.

◆ High-tech industries:

Pharmaceutical & cosmetics laboratories, electronics manufacturers, etc.

◆ Heavy industries: Food processing, paper, automotive, nuclear, etc.

■ Commercial: Hospitals, glasshouses, museums, farms, temperature-controlled transport, etc.

OUR EXPERTISE

ACCREDITED MEASUREMENT LABORATORIES, IN-HOUSE RESEARCH AND DEVELOPMENT

Sauermann products and services are backed by cutting-edge facilities and expertise: a team of over 20 experts working at multiple testing and calibration laboratories worldwide, and production lines in France, the United States and China.

Our in-house research and development programme – spearheaded by a young, forward-looking group of 20 engineers and 10 technicians – has three aims: to push the boundaries of innovation in ergonomic design, digital technology and connected objects, to patent our technologies, and to consistently set new standards for electronic and mechanical performance in our products.

Over 20 patents, including our oscillating piston pump technology and the foldable frame system found on our DBM 620 air flow meter.

Over 800 sq m of laboratory space

Our experts provide adjustment and calibration services for our measurement instruments.

Customer service staff trained by our experts

Our team is here to advise and quote you for the service you need.

After-sales service within our production lines

Our technicians maintain and repair your devices right where they're made.

Our measurement expertise covers a wide range of fields:

Pressure	Weighing	Air velocity	Light measurement
Temperature	Radiometry	Air flow	Electrical current
Humidity	Tachometry	Gas analysis	Acoustics

HVACR MEASUREMENT
INSTRUMENTS

Sauermann's measurement instruments are backed by a 45-year track record in metrology, delivering unmatched reliability and a user experience that's second to none.

At Sauermann, our experience means we understand the needs of professionals the world over – and design tools to help them do their job better. Our instruments monitor the full spectrum of air quality parameters, catering to the entire HVACR and indoor air quality sector.

HVACR measurement instruments

It's all about simplicity

Pressure / Temperature / Humidity / Air velocity / Air flow rate

Among other applications, the Si-PM3 differential pressure manometer can be used to check air treatment unit filters for clogging.

Our portable HVACR instruments cover a broad spectrum of measurements, from temperature, relative humidity and pressure, to air velocity and air flow rate.

We offer a full range of easy-to-use instruments: dual input thermometer (Si-TT3), infrared thermometer (Si-TI3), thermo-hygrometer (Si-HH3), digital differential pressure manometer (Si-PM3), vane thermo-anemometer (Si-VV3), hotwire thermo-anemometer (Si-VH3), gas leak detector (Si-CD3) and refrigerant leak detector (Si-RD3).

What's more, our user-friendly Si-HVACR Measurement MobileApp displays measurement data right on your smartphone or tablet.

Mobile app

Si-HVACR Measurement MobileApp

With the Si-HVACR Measurement MobileApp, users can view and record measurements in real time.

Key features:

- View parameters in user-friendly format
- Access previously saved measurements and charts (average, min. & max. values, etc.)
- Generate reports (PDF, CSV or XML) and add up to four photos

Backlit LCD screen

Low consumption device

Magnetic backing for easy fixing

Carrying bag

Calculated values on mobile app

Applications

Our devices provide everything HVACR engineers need for their routine operations

Heating

Ventilation Air conditioning

Refrigeration

 Si-PM3 Digital differential pressure manometer	Gas-fired boilers <ul style="list-style-type: none"> - Measure pressure at the gas inlet valve. - Measure pressure drop (draught) at the flue. 	Ventilation circuit <ul style="list-style-type: none"> - Check filter fouling. - Measure extractor fan pressure and air flow rate. - Measure air flow in a pipe. 	
	Tip : Connect a Pitot tube to the instrument to measure air flow in a pipe. Use the smartphone app to calculate air flow rate by entering the pipe coefficient.		
 Si-TT3 Dual input thermocouple thermometer	Hot water boilers <ul style="list-style-type: none"> - Compare the water temperature in the boiler inlet, outlet and return pipes. 	Multifunction <ul style="list-style-type: none"> - Ambient air temperature. - Air temperature in the pipes. - Temperature in domestic hot water systems. 	Refrigerators, freezers <ul style="list-style-type: none"> - Measure superheat and sub-cooling of the refrigerant gas circuit.
	Tip : A vital add-on for working on refrigeration systems if your manifold does not include a temperature probe.		
 Si-TI3 Infrared thermometer	Radiators <ul style="list-style-type: none"> - Measure radiator hot and cold spots to determine if venting is required. 		
	Tip : Vastly improves speed and convenience (measurements delivered remotely in real time). Can measure ambient temperature (via app). Capable of checking various temperature increases, including electrical heating. Affix a black strip on non-black surfaces and adjust the emissivity of the surface (as per the manual) for accurate measurement.		
 Si-HH3 Thermo-hygrometer		Ventilation <ul style="list-style-type: none"> - Measure ambient air temperature and relative humidity. 	
	Tip : Extreme relative humidity values (too high or too low) can pose hazards (allergies, germs, dust, mould, etc.). The app displays psychrometric parameters such as dew point and wet bulb temperature.		
 Si-VV3 Vane thermo-anemometer		Air conditioning circuit <ul style="list-style-type: none"> - Measure air flow through system inlet and outlet grilles. 	
	Tip : Input the pipe cross-section in the app to calculate average air flow rate in addition to air velocity.		
 Si-VH3 Hotwire thermo-anemometer		Air conditioning circuit <ul style="list-style-type: none"> - Measure air flow in pipes (and temperature). 	
	Tip : Input the pipe cross-section dimensions in the app to calculate average air flow rate in addition to air velocity. Use the hotwire thermo-anemometer instead of a vane thermo-anemometer for low-velocity or laminar air flows.		
 Si-CD3 Gas leak detector	Gas-fired boilers <ul style="list-style-type: none"> - Detects leaks of combustible gases upstream of the boiler, at the inlet and inside the unit. 		
	Tip : A flexible probe keeps the device's sensor in contact with gas pipes in even the hardest-to-reach places. Pay special attention to joints in the circuit. Check the condition of the filter and replace it if necessary. Follow the manufacturer's recommendations for replacing the sensor.		
 Si-RD3 Refrigerant leak detector	Heat pumps	Air-conditioning units	Refrigerators, freezers
	Detects refrigerant leaks in every part of the cooling circuit.		
	Tip : A flexible probe keeps the device's sensor in contact with gas pipes in even the hardest-to-reach places. Pay special attention to joints in the circuit. Check the condition of the filter and replace it if necessary. Follow the manufacturer's recommendations for replacing the sensor.		

Si-PM3

Digital differential pressure manometer

This pocket-sized manometer can take two pressure measurements simultaneously, and you can connect a Pitot tube to measure air velocity and flow rate in a pipe.

Reference: SIPM3

Air velocity and air flow with Pitot tube (optional)

Measuring range: -150 to +150 hPa (-60 to 60 inH₂O)

Si-TT3

Dual input thermocouple thermometer

This instrument uses thermocouple technology to take two temperature readings at once (between -200°C and 1,300°C). Ideal for checking the inlet and outlet temperatures of water heating systems.

Reference: SITT3

Dual channel K thermocouple (2 probes included)

Si-HH3

Thermo-hygrometer

This thermo-hygrometer is a turnkey solution for measuring temperature and relative humidity, while dew point and wet bulb temperature are calculated via the accompanying mobile app.

Reference: SIHH3

Measuring range: from 0 to 100%RH

Si-TI3

Infrared thermometer

Sauermann's Si-TI3 infrared thermometer is the ideal solution for contactless diagnosis, inspection and checking of surface temperatures.

Reference: SITI3

Optical: D.S 12:1

Adjustable emissivity

Si-VH3

Hotwire thermo-anemometer with telescopic probe

Sauermann's palm-sized Si-VH3 hotwire thermo-anemometer comes with a highly sensitive and accurate telescopic probe that easily measures air flow rate, velocity and temperature.

Reference: SIVH3

80 cm (31.5") telescopic probe with double graduation

Si-VW3

Vane thermo-anemometer with built-in vane probe

This thermo-anemometer, which features a vane probe with a long cable, can be used to measure air velocity and temperature at an air vent. Air flow rate is calculated via the accompanying mobile app.

Reference: SIVV3

Air velocity and air flow meter

Large vane probe with 2 m (78.74") cable

Si-CD3

Gas leak detector

The Si-CD3 gas leak detector is perfect for quickly and easily detecting even the slightest leaks of various combustible gases (methane, propane, isobutane, LPG and other hydrocarbons).

Reference: SICD3

30 cm flexible probe

Adjustable alarm

Si-RD3

Refrigerant leak detector

The Si-RD3 refrigerant leak detector uncovers leaks of most common refrigerant gases to a high degree of sensitivity, including all HCFC and HFC refrigerants, R1234yf, R1234ze, R290, R600a, and 5% hydrogen–95% nitrogen mixtures (Nidron 5 and Trace-A-Gas).

Reference: SIRD3

30 cm flexible probe

Visual and audio alarm

Combustion gas analyzers

A new degree of efficiency

Sauermann offers a range of compact and intuitive analysers to enhance your performance.

Sauermann's combustion gas analyzers feature the latest digital and metrology technologies, making measurements more reliable and cutting the amount of time heating engineers need to spend on-site. A user experience like no other!

Applications

- Boilers
- Burners
- Water heaters
- Gas and diesel engines
- Furnaces
- Industrial kilns
- Industrial heating systems
- Incinerators

Si-CA 030

All the essentials for combustion gas analysis

The Si-CA 030 offers everything heating engineers need to inspect and maintain residential and commercial boilers, with wireless connection to our smartphone app and automatic generation of servicing reports and certificates.

Up to three gas sensors:
O₂, CO and NO (for NOx)

Auto pump cut-off
for high CO levels

- NOx capable with NO sensor
- Quick and easy pump On/Off control
- CO safety monitoring in ambient air

LIGHTWEIGHT
350 g

Common features Si-CA 030 / Si-CA 130

- Predictive maintenance with estimated sensor life & calibration reminders
- Draft & differential pressure measurements
- Calculated CO₂% value
- CO safety monitoring in ambient air

CO measurement up to
8,000 ppm

Color display

Si-CA 130

Comprehensive, versatile analyzer with touch-screen display

The Si-CA 130 features a touch-screen display and comes with PC-based management software (in addition to the smartphone app) for more in-depth combustion gas analysis. The three field-replaceable cells and sensors offer expanded measurement capability.

Up to three gas sensors O₂, CO, and NO or Low NO (for NO_x)

Field replaceable precalibrated sensors

- Auto pump cut-off for high CO levels (user-adjustable)
- NO_x capable with NO sensor (optional)
- One Touch Pump On/Off with Purge
- PC software with wireless and USB connectivity
- Graphical data display
- Customisable gas analysis screen

- Combustion efficiency and excess air calculations
- Protective rubber casing
- Maintenance agreements and extended warranties available
- Emissions values adjusted for reference O₂

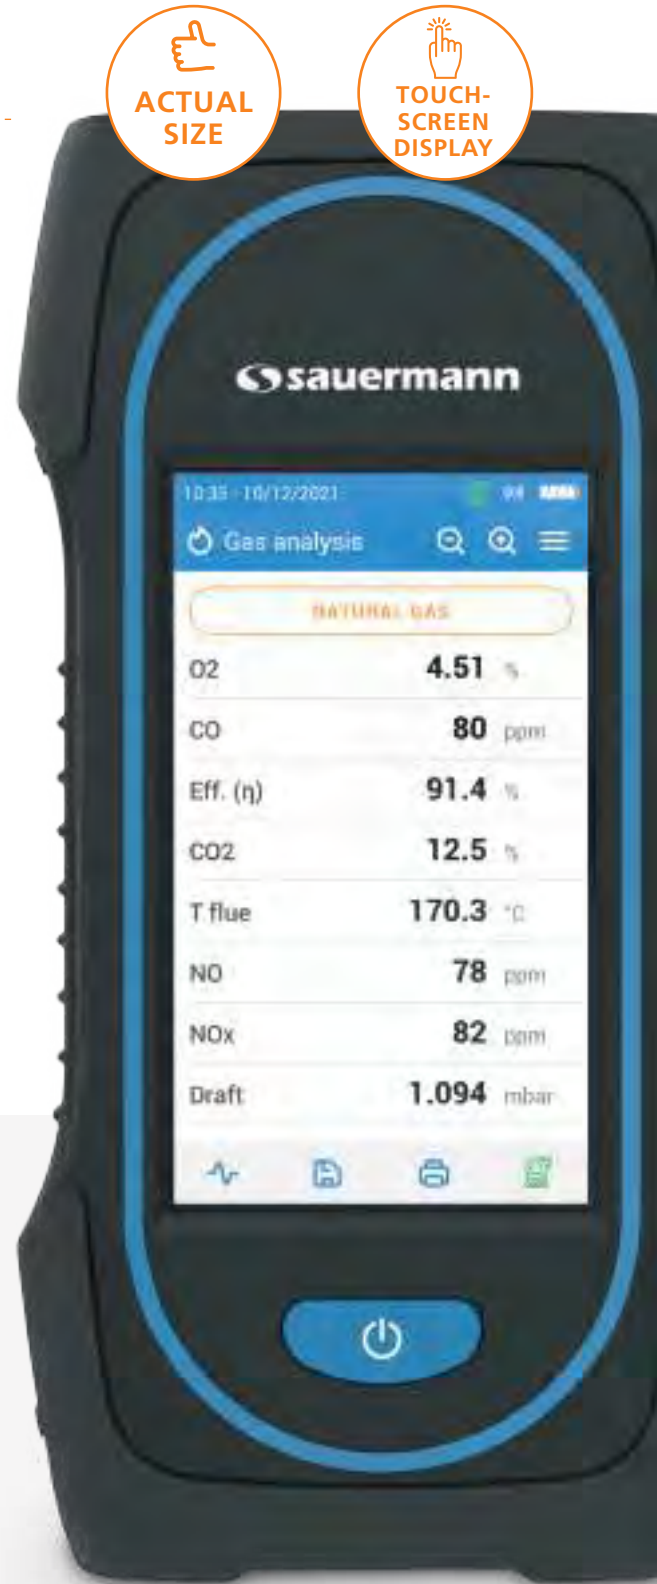

Data management with automatic logging & report creation through app/PC software

Lightweight, only 350 g (12 oz)

19.4 cm - 7.5"

Si-CA 230

State-of-the-art, industrial emissions analyzer

With up to six gas sensors and expanded measurement capabilities, the Si-CA 230 is well suited for boilers, burners, engines, and other industrial combustion applications. And with support for more gases and a high CO tolerance threshold, its versatility makes it the ideal choice across commercial and industrial applications.

Up to Six Gas Sensors. Can include
O₂, CO, NO, Low NO, NO₂, Low NO₂,
SO₂, Low SO₂, H₂S, and CxHy

CO Dilution auto-range
with measurements to
50,000 ppm

Total NOx & Low NOx
Capable

Field Replaceable
Pre-Calibrated Sensors

Features: Si-CA 230

- Ergonomic, light weight, & durable design
- Data management with automatic logging & report creation
- Predictive maintenance with estimated sensor life & calibration reminders
- One touch pump On/Off with purge
- PC software with wireless and USB connectivity
- Auto pump cut-off for high CO levels
- Graphical data display
- Customisable gas analysis screen
- Stack gas velocity with Pitot tube
- Draft and differential pressure measurements
- Emissions values adjusted for reference O₂
- CO safety monitoring in ambient air
- Protective rubber holster
- Maintenance contracts and extended warranties available

Mobile app

Sauermann Combustion

The Sauermann Combustion app lets you control your Si-CA analyzer remotely, view measurement results in real time, and customise them before exporting in the format of your choice.

- Free apps for iOS & Android mobile devices
- PC software with USB & wireless connectivity
- Fast, easy wireless connection
- Remote live view of combustion analysis data as list or graph
- Remote control to change settings
- Data saving, including automatic logging
- Report creation in PDF, CSV (for Excel) and XML formats
- Databases for customers, operators, & equipment

Download Sauermann Combustion app

Warranty

All devices come with a two-year warranty against manufacturing defects (subject to assessment by our after-sales department).

To find out more about our extended warranties and maintenance plans, please visit our website, or contact our Customer Service Department.

Digital manifold

The future of climate systems engineering

Vacuum / Temperature / Pressure

Our manifolds play a vital role in the commissioning and maintenance of refrigerant-based systems, from heat pumps and refrigeration technologies to air conditioning units.

In just a few short years, digital manifolds have become must-have instruments. Their popularity stems from their ability to take quick, reliable measurements without the need for manual calculations.

Countries around the world are constantly tightening regulations on refrigerants in an effort to protect the planet. When it comes to complying with these rules, refrigeration engineers are on the front line. And the manifold is their instrument of choice.

Our digital manifold and vacuum probes combine the capabilities of multiple instruments into one, significantly reducing the size of engineers' toolboxes.

With their user-friendly design and ability to capture and report multiple parameters at once on a mobile app, these instruments are the all-in-one solution that HVACR specialists need.

Si-RM3

Smart wireless manifold probes with dual valves

The new Si-RM3 digital manifold from Sauer mann provides installers with an ergonomic tool that fits into tight and compact places, an Si-Manifold app with wireless connectivity up to a range of 30 metres, and the ability to take a number of important readings in an all-in-one device.

It includes two pressure probes that precisely measure high side and low side pressure (from -1 to 60 bar) and instantly display the condensation/evaporation temperatures for up to 126 refrigerants on the Si-Manifold App, including new low global warming potential (GWP) and natural refrigerants.

Two temperature probes are used to accurately and simultaneously provide real-time superheat/subcooling calculations on the Si-Manifold app during the refrigeration process. A second connector allows for the charging and discharging of the refrigerant, and a built-in Schrader® core avoids leakages when you connect the hose.

Si-RV3

Smart wireless vacuum probe with dual valves

Sauermann's Si-RV3 vacuum probe supports the quick, safe evacuation of refrigeration systems and heat pumps with highly accurate measurements.

It has an ergonomic design, an excellent Si-Manifold app with wireless connectivity up to a range of 30 metres, and a high-precision Pirani® sensor that provides deep vacuum measurements.

It also provides H₂O evaporation temperature on the Si-Manifold app in real time.

A second connector allows for the discharging of the refrigerant, and a built-in Schrader® core avoids any gas leakages when you connect the hose.

Si-RM13

Combined manifold with smart wireless probes and 2-channel by-pass

Sauermann's Si-RM13 combines the sturdiness of the analogue manifold with the Si-RM3's smart wireless manifold probes.

In this premium package, installers can take advantage of both devices.

It includes a traditional 2-channel analogue manifold body (by-pass type) with flexible hoses and a durable block made of anodized aluminium.

Installers can also utilize the numerous benefits from the smart wireless manifold probes for pressure and temperature measurements, as well as the Si-Manifold App.

MINI PUMPS

TANK PUMPS

Our condensate removal pumps feature a cutting-edge design that makes them global best-sellers.

Sauermann pumps are compatible with all condensate-generating systems, from domestic air conditioning units to powerful industrial-grade combustion boilers. Drawing on 45 years of experience in designing condensate removal pumps, our R&D team has developed a range of products that strike the perfect balance between versatility, flexibility, power and reliability.

ACCESSORIES

Mini pumps

Exclusive technology, unmatched reliability

Detect and remove condensates from air conditioning units

Our mini condensate removal pumps help to prevent leaks and overflows in air conditioning units, protecting against the risk of water damage.

Our mini pumps feature an exclusive, patented electromagnetic piston technology that sets the gold standard for reliability and whisper-quiet operation.

Our range is compatible with all types of indoor and outdoor system, including all console, split and cassette-type air conditioning units. All our condensate removal pumps are discreet in design, quick and easy to maintain and built to last.

DELTA PACK

For wall-mounted air conditioning units

Air conditioning

The Delta Pack includes an elbow design that can be easily opened by hand by a simple finger push – no tool is needed. Its streamlined design complements wall-mounted air conditioning units. It includes the Si-10 Univers'L pump, which incorporates Sauermann's latest piston pump technology. The whisper-quiet pump also comes with insulating foam inside the corner piece and on the pre-installed drain pipe.

Mains supply	230 V ~ 50 Hz 14 W
Thermal protection	115°C (auto-reset)
Protection	IPX4

*According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application.

OMEGA PACK

Under-unit installation for wall-mounted air conditioners

The Omega Pack is designed for installation under a mini-split air conditioning unit. The onboard Si-20 pump features Sauermann's latest technology for proven reliability, while the pack comes with the full range of installation accessories including an anti-siphon device for hydraulic connection you can trust. The white box matches the colouring of the latest-generation wall-mounted air conditioning units.

Air conditioning

Si-30 / Si-33

Mini pumps with float detection

The pump mechanism inside the Si-30 and Si-33 models is specially designed by Sauermann to remove condensates produced by air conditioning units.

References:

Si-30: SI30CE02UN23

Si-33: SI33CE01UN23

Patented Sauermann technology, specifically designed for removing condensates from air conditioning systems.

The pre-installed anti-siphon connector eliminates the risk of siphoning.

The mounting plate means the pump can be mounted on a wall, hung on the ceiling or affixed directly to a pipe.

Air conditioning

PE 5000 / PE 5100

PE 5200

Peristaltic pumps for wall-mounted split units, suspended ceiling units, ducted units and cabinet coolers up to 8 kW

These peristaltic pumps are among the most compact models money can buy. They combine whisper-quiet operation with practical and clever design features: the detachable and replaceable head (PE 5001) and tubes (PE 5002) reduce maintenance work and cost.

The PE 5000 is controlled by a signal from the air conditioning compressor.

The PE 5100 is equipped with two temperature probes.

The PE 5200 is controlled by a remote detection unit fitted with a 3-level float (on/off/alarm).

Tank pumps

Powerful and built to last

For managing large volumes of condensate

Tank pumps are intended for large heating, refrigeration and air conditioning systems, such as supermarket refrigerated display cabinets, central boilers and multi-cassette air conditioners.

Saubermann tank pumps are built for power and durability, so they can withstand even the toughest conditions.

Our tank pumps are specially designed for high-powered air conditioning, heating and refrigeration systems that generate large volumes of condensate. They're also built to handle hot, acidic, biofilm-heavy and other special types of condensate.

Si-82

Air conditioning

Heating

Refrigeration

For cassette, multi-cassette and ducted air conditioning systems, dehumidifiers, small refrigerated display cabinets and gas-fired condensing boilers

The Si-82 is designed for easy installation in any situation: floor-standing, wall-mounted or hanging on the ceiling. The pump can remove up to 500 litres per hour and can withstand acidic and charged condensates, making it ideal for air conditioning and refrigeration systems.

References:

PACK 1: SI82CE01UN23

PACK 2 + pH Safe: SI82CE03UN23

Removable cable for easy installation and maintenance.

Non-return valve for easily connecting Ø 10 mm pipes. Four condensate inlets with caps.

Mounting points for floor-standing, ceiling and wall-mounted installation. Reversible tray.

Quick power connection

Easy hydraulic connection

Fits into any location

Kit contents

PACK 1: One-piece centrifugal pump - Tank (2 l) – Built-in non-return valve (10 mm ext. Ø) - Plug-in cable: power (2 m, European plug) and NC safety contact (1.5 m, bare ends) - Straight connector (ext. Ø 10 mm / ext. Ø 6 mm) - 2 screws + 2 plugs.

PACK 2: One-piece centrifugal pump with tank (2 l) - Plug-in cable: power (2 m, European plug) and NC safety contact (1.5 m, bare ends) - Clear PVC tube: int. Ø 10 mm, 5 m - Flexible adapter (int. Ø 15-20-24-32-40 mm) - 2 screws + 2 plugs. The PACK 2 + pH Safe option includes one pH Safe 1 neutralization cartridge.

Technical data

	Si-82
Maximum flow rate	500 l/h
Maximum discharge head	5 m (flow rate = 50 l/h)
Pump sound level at 1 m*	< 45 dBA
Detection levels (mm)	ON: 53, OFF: 42, Safety: 64
Mains supply	230 V ~ 50/60 Hz - 70 W
Protection	IP20

* According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application.
Suitable as a replacement for the SI 1800 and SI 1805 models.

Si-83

Air conditioning

Heating

For domestic air conditioning systems and domestic gas-fired condensing boilers

The Si-83 is more compact than any other pump in its class. With five condensate inlet options and a slimline profile (just 129 mm), it's ideal for installing under domestic gas-fired condensing boilers (up to 40 kW). The SI83CE43UN23 model comes with a neutralization cartridge that effectively neutralizes the acidic condensates produced by domestic gas-fired condensing boilers. The versatile Si-83 pump is also perfect for domestic air conditioning systems (up to 20 kW).

The pump even comes with its very own smartphone app – the Si-83 MobileApp – that makes installation both simple and intuitive.

SI 1805

Air conditioning

Heating

For cassette, multi-cassette and ducted air conditioning systems, small refrigerated display cabinets and gas-fired condensing boilers

The SI 1805 is designed for easy installation in any conditions.

The pump can remove up to 500 litres per hour, making it ideal for air conditioning and refrigeration systems. The robust SI 1805 pump easily withstands the charged, high-temperature and acidic (pH > 3.4) condensates produced by gas-fired condensing boilers.

Technical data

	SI 1805
Maximum flow rate	500 l/h
Maximum discharge head	5,4m
Pump sound level at 1 m*	≤ 47 dBA
Detection levels (mm)	ON: 27, OFF: 21, Safety: 32
Mains supply	230 V~ 50/60 Hz -90 W
Protection	IP20

*According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application.

SI-1830 / SI 1850

For oil-fired condensing boilers

Air conditioning

Heating

Refrigeration

The Si-1830 is built for use in the toughest conditions. It easily withstands the charged (e.g. oil residues), hot and highly acidic condensates produced by oil-fired condensing boilers.

Its watertight case protects the motor from acidic fumes and water splashes.

The Si-1830 can also be installed without its tank, directly in the condensate tray.

The 3.8 litre tank means the SI 1850 can remove up to 1,100 litres per hour, making it suitable for high-powered air conditioning and refrigeration systems. The robust SI 1850 pump easily withstands the charged, high-temperature condensates produced by gas-fired condensing boilers.

High performance

Rugged design

Kit contents

Si-1830: Pump with 0.5 l tank - 1.5 m power cable with European plug, safety switch cord: 1 m, 2 wires (NC contact) - Installation kit: 2 screws + 2 plugs, clear PVC tube (int. Ø 10 mm, 5 m), flexible adapter (Ø 15-24-32-40 mm).

SI 1850: One-piece centrifugal pump with 3.8 l tank - Built-in non-return valve, ext. Ø 10 mm.

Dimensions

Si-1830: L 190 x W 80 x H 100 mm

SI 1850: L 305 x W 152 x H 257 mm

Technical data

	SI 1830	SI 1850
Maximum flow rate	400 l/h	1 100 l/h
Maximum discharge head	3,7 m	10 m
Pump sound level at 1 m*	≤ 43 dBA	≤ 66 dBA
Detection levels (mm)	ON: 32, OFF: 25, Safety: 39	ON: 81, OFF: 48, Safety: 101
Mains supply	230 V~ 50/60 Hz 75 W	230 V~ 50 Hz 200 W
Protection	IPX4	IP20

*According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application.

SI-2052

Maintenance kit for cassette-type systems with centrifugal pump

The SI 2052 pump can be used as a replacement for some Sauermann pumps installed in series on cassette-type and ceiling-mounted air conditioning units up to 20 kW.

The centrifugal technology inside this pump is specially designed to remove condensates quietly and continuously in any type of environment.

The single-level detection unit can be used as a safety contact (NC) to cut off the air conditioning system compressor or solenoid valve automatically.

Reference: SI2052SIUN23

Compatible with most market-standard models

Wire-to-wire connector

Kit content

Centrifugal pump - 250 mm overmoulded cable - 850 mm cable with wire-to-wire connector - High level safety detection unit (DET01550, 900 mm cable) - Stainless steel screw for detection unit.

Technical data

	SI 2052
Maximum flow rate	100 l/h at 200 mm
Maximum discharge head	0.9 m (24l/h)
Pump sound level at 1 m*	≤ 30 dBA
Detection levels (mm)	Safety: 18
Consommation électrique	230 V ~ 50/60 Hz - 14 W

*According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application.

Si-1931

Dairy pump for refrigerated display cabinets

Specially designed to handle condensate from supermarket refrigerated display cabinets, the Si-1931 pump also offers a proven solution against the formation of biofilm with its Gel-clear tablet. The compact design of the pump facilitates installation under low-slung display cabinets.

- Ultra-flat profile: 80 mm high.
- Three inlet points: top, right or left.
- Keeps the condensate drain clear.
- Reduces water leaks by more than 90%.
- Preventing the formation of biofilm reduces the risk of water leaks and extends pump life.

Reference:

SI1931CE01EU23

**Reduced
operation costs**

**Easy installation –
easy maintenance**

**Gel-clear tablet: the proven
anti-biofilm solution**

Kit content

Dairy pump with a power cable (NO safety contact) and a 13 mm outlet - Rubber bellows inlet adapter, 32, 40 and 50 mm int. Ø - Outlet adapter, 10 mm Ø - Hard plastic inlet adapter, 40 mm Ø - 2 Gel-clear tablets.

Technical data

	Si-1931
Flow rate at 6 m	700 l/h
Maximum discharge head	24,6m
Protection	IP20
Pump dimensions	L 610 x W 235 x H 80 mm
Tank volume	6.5 l

Accessories

Accessories suitable for all makes and applications

Pipes and fittings (Ø 6 and Ø 10 mm)

Double wire clamp

To ensure safe connection between connectors and a clear PVC tube.

Dimension	Qty per bag	Ref.
Ø 6 mm	25	ACC00912
Ø 10 mm	25	ACC00913

Double wire clamp for braided tube

To ensure safe connection between connectors and a braided PVC tube.

Dimension	Qty per bag	Ref.
Ø 6 mm	25	ACC00916
Ø 10 mm	25	ACC00917

Self-sealing drainage fitting

Used to connect a PVC tube to the exhaust pipe.
The self-sealing fitting makes the connection reliable.

Dimension	Qty per bag	Ref.
Ø 6 mm	5	ACC00919
Ø 10 mm	5	ACC00920

"T" connector

To connect three Ø 6 mm (1/4") or Ø 10 mm (3/8") clear PVC tubes.

Dimension	Qty per bag	Ref.
Ø 6 mm	5	ACC00902
Ø 10 mm	5	ACC00903

Straight connector

To connect two Ø 6 mm (1/4") or Ø 10 mm (3/8") clear PVC tubes.

Dimension	Qty per bag	Ref.
Ø 6 mm	5	ACC00900
Ø 10 mm	5	ACC00901

Reducer connector

Reduces diameter of tubing coming out of a tank pump from Ø 10 mm (3/8") to Ø 6 mm (1/4").

Dimension	Qty per bag	Ref.
Ø 6 to Ø 10 mm	5	ACC00906

Elbow connector

To connect two Ø 6 mm (1/4") or Ø 10 mm (3/8") clear PVC tubes.

Dimension	Qty per bag	Ref.
Ø 6 mm	5	ACC00904
Ø 10 mm	5	ACC00905

Rubber reducing adapter

To connect a Ø 20 mm (1 1/2") PVC tube to a Ø 10 mm (3/8") PVC tube.

Dimension	Qty per bag	Ref.
Ø 20 to Ø 10 mm	3	ACC00908

"T" reducer multi diameter

To connect three PVC tubes, one Ø 6 mm int. (1/4") and two Ø 10 mm int. (3/8").

Dimension	Qty per bag	Ref.
Ø 6 to 2x Ø 10 mm	5	ACC00907

Non-return valve

In-line non-return valve for Ø 6 mm (1/4") PVC tubes.

Dimension	Qty per bag	Ref.
Ø 6 mm	5	ACC00924

Clear PVC tubing

Clear PVC tubing for connecting the pump to the discharge outlet.

25

ACC00930

Elbow rubber adapter

Its length (142 mm, 6"), width (35 mm, 1 9/32") and diameter (16 mm, 5/8") make it easy to install.

Dimension

Qty per bag

Ref.

Ø 16 mm - 35mm x 142mm

3

ACC00934

Reducing adapter

To reduce diameter between the AC condensate tank and the detection unit inlet.

Dimension

Qty per bag

Ref.

Ø 32 to Ø 16 mm

3

ACC00926

Multi diameter reducing adapter

To connect tubes of Ø 6 mm (1/4") or Ø 10 mm (3/8") to tubes of Ø 12 mm (1/2") or 16 mm (5/8").

Dimension

Qty per bag

Ref.

Ø 6 to Ø 10, 12, 16 mm

5

ACC00927

Straight connector

To connect two Ø 16 mm (5/8") rubber tubes together.

Dimension

Qty per bag

Ref.

Ø 16 mm

5

ACC00928

Drain tray connector

To facilitate the installation of the detection unit of a mini pump detection unit into a mini split.

Dimension

Qty per bag

Ref.

Ø 16 mm

3

ACC00929

Rubber extension

For connecting the AC condensate tank outlet to a mini pump detection unit. Ø 16 mm (5/8").

Dimension

Qty per bag

Ref.

Ø 16 mm - L 600 mm

1

ACC00931

90° rubber elbow adapter

For connecting the AC condensate tank outlet to a mini pump detection unit.

Dimension

Qty per bag

Ref.

Ø 16 mm - 35mm x 35mm

3

ACC00932

"S" type rubber hose

To connect the AC condensate tank outlet to a mini pump detection unit.

Dimension	Qty per bag	Ref.
Ø 16 mm - L 55 mm	3	ACC00933

Extension cable for use with the Si-2958 detection unit

To increase the length between the detection unit and the pump – for use with the Si-2958 detection unit.

Dimension	Qty per bag	Ref.
3 m	1	ACC00942
5 m	1	ACC00943

Si-2958 detection unit

Replacement detection unit for Si-30, Si-33 and PE 5200 pumps.

Dimension	Qty per bag	Ref.
-	1	Si-2958

Centrifugal pumps

Push fit fitting tank connector

To channel condensate through the side of the tank. For 32 mm (1" 1/4) tubes

Dimension	Qty per bag	Ref.
Ø 32 mm	1	ACC00940

Rubber multi diameter condensate inlet adapter

Multi diameter adapter to be used for a range of different tubes.

Dimension	Qty per bag	Ref.
Ø 15 to Ø 20, 24, 32, 40 mm	3	ACC00939

Rubber condensate inlet adapter

To channel condensate into a tank pump through a PVC tube.

Dimension	Qty per bag	Ref.
Ø 25 to Ø 20 mm	3	ACC00936
Ø 32 to Ø 20 mm	3	ACC00937
Ø 40 to Ø 20 mm	3	ACC00938

Non-return valve

Non-return valve for use with Sauer-mann centrifugal pumps. For Ø 10 mm (3/8") tubes.

Dimension	Qty per bag	Ref.
Ø 10 mm	3	ACC00925

Anti-biofilm

Gel-clear tablets

Replacement tablets for Si-1931 pumps fitted to refrigerated display cabinets.

Dimension	Qty per bag	Ref.
-	1	SPSI93T1
-	10	SPSI93T10

Neutralization

pH Safe 1

Neutralization cartridge for use with the Si-82 and Si-83 pumps to effectively neutralize the condensates produced by gas-fired condensing boilers. Capable of neutralizing up to 800 litres of acidic condensates per year at pH3.

Dimension	Qty per bag	Ref.
-	1	PH0100SIUN23

pH Safe 2

For neutralizing the condensates produced by gas-fired condensing boilers. Capable of neutralizing up to 6 litres of acidic condensates per hour at pH3.

Dimension	Qty per bag	Ref.
-	1	PH02CE01UN00

Miscellaneous

Priming squeeze bottle

After the installation or the maintenance of a condensate removal pump, this bottle helps start or clean the system.

Dimension	Qty per bag	Ref.
-	1	ACC00944
