

## Adapting to your needs

Every organization is unique, and a modern security solution needs to reflect this. It needs to adapt to your needs, not the other way around.

## The user in focus

Don't accept security solutions that make it difficult for your users. Stay secure while avoiding frustrated users by providing a modern user experience.

## Try it yourself

We offer the ability to do pilots of all our products in your own infrastructure. Contact us for more information.

# Security made easy

[pointsharp.com](http://pointsharp.com)

## What we do

### User Authentication

Customizable and user-friendly multi-factor authentication (MFA) for all use cases. Support for any authentication method: passwordless, FIDO, biometrics, certificates, mobile app, and much more.

### Identity and Access Management (IAM)

Ensure that all applications are easily accessible securely, anytime, and anywhere, with Single Sign-On (SSO) for both on-premises and cloud applications.

### Information Security

Compliance control, software and asset management, and secure sharing of sensitive data within and outside your organization.

## How we do it

### ID Server

An adaptable on-premises solution for multi-factor authentication made with user-friendliness in focus. Without any cloud dependencies.

### Access Gateway

A gateway that lets you publish on-premises and legacy applications securely. It also offers a unique solution for secure Exchange synchronization with MFA.

### Identity Provider

Our IdP makes it easy for you to set up single-sign and federation for all your applications, both on-premises and in the cloud.

### Net ID

A complete Public Key Infrastructure (PKI) solution with life-cycle management of your certificates, smart cards, and security tokens.

### > Get it as a Service

Everything you need, but without building expensive infrastructure.

### Cryptshare

Cryptshare integrates into your email client and makes it easy for your users to share confidential and large files in a secure and compliant way.

### SIVIS Enterprise Security

Automated and streamlined identity management for both SAP and Microsoft environments.
