

Enable a secure and effective workforce

with Pointsharp Access management

Make the modern digital workplace a reality, with a unified user experience to access all applications, whether on-premises or in the cloud. Secure all your important resources with consistent security throughout the organization.

Easy user access

Enable the modern digital workplace in the entire organizational infrastructure. Make it easy for your users to access what they need with a unified experience for all applications and services.

Modern access for on-prem

Make access to on-premises applications just as easy as connecting to cloud services without using a VPN. Secure your on-premises email and access local files with MFA, even legacy applications without native MFA support. Then, local applications can be published to the app portal for easy access.

Organization-wide SSO

Enable secure single sign-on to all applications and services, regardless of location. With our modern SSO solution, your users only need to log in once, while admins have full control of all access rights.

Flexible authentication

Pointsharp Access management also features flexible authentication tools so that every employee

can have the most suitable login experience for their needs and security level, adapted to their roles, and where they are.

Passwordless authentication

Pointsharp Access management features built-in support for modern passwordless authentication solutions, like FIDO2, passkeys, and YubiKeys, for easy, secure, and phishing-resistant logins.

Modern access management

Manage all access rights in one interface, whether for on-prem applications or cloud services. Pointsharp Access management integrates seamlessly with existing directories and workflows. It also features a wide array of access controls and custom rulesets for fine-grained control and easy management to suit every need.

Higher security

Pointsharp Access management pre-authenticates all login attempts, significantly increasing the organization's protection against DoS and brute force attacks for a modern, zero-trust infrastructure.

**User-friendly
access**

**On-prem
and cloud**

Flexible MFA

Additional features:

- Unified and easy access
- Secure Exchange email
- VPN no longer required
- Conditional access

Pointsharp is a European cybersecurity company that enables organizations to secure authorizations, access, identities, and data in a user-friendly way. Security must be easy to use, and our vision is to give everyone access to a safe, modern digital workplace. We provide specialized IAM solutions that are made to fit the most demanding and specific needs.

We deliver European-made cybersecurity software and services to customers worldwide. You can often find our customers in large enterprises requiring extra high levels of security and regulatory demands, like the financial, governmental, industrial, and defense sectors.

We have our headquarters in Stockholm, Sweden, with offices in Germany, Denmark, Switzerland, and the Netherlands.
