

LogicLine, Europe's leading provider of load securing systems for flatbeds and pickups, will be presenting its innovative solutions at GaLaBau in Nuremberg, aimed at easing the daily work of gardening professionals.

## Innovation from Austria

For over 15 years, LogicLine has developed systems for legally compliant and safe transport of tools and materials. Their modular solutions can be easily combined to meet diverse needs.

**TÜV-certified Safety:** LogicLine products are TÜV-certified, ensuring legal compliance and helping avoid fines or legal consequences.

**Efficient Workflow:** Tailored solutions provide quick access and organization on vehicles, protecting tools and materials from weather and theft.

**Quality Made in Austria:** Durable materials offer stability and low weight.

## Transport Boxes

LogicLine transport boxes are suitable for flatbeds of all brands and offer not only load securing but also organization and efficiency at work.

Particularly suitable for landscaping is the exhibited LongBox, specifically designed for the transport of large and long tools. Even brush cutters and leaf blowers find a safe place here.

Among the exhibited products are the ToolBox and the RoadBox. While the RoadBox allows access from both sides of the vehicle, the ToolBox is the optimal choice if you want all tools within sight and reach from one side of the vehicle. Accessories such as pull-out drawers and loading containers prepare you for every challenge.

The CombiBox also allows access from both sides of the vehicle via the lid and can be extended with additional storage space for long-handled items.

## Load Carriers

With LogicLine load carriers (racks), long goods up to 6 meters can be transported diagonally or horizontally on flatbeds, depending on the model. Optional accessories provide positive and frictional load securing. Depending on the model, a load capacity of up to 350 kg is possible. In combination with the transport boxes, the flatbed thus becomes a versatile talent for a wide range of transport tasks.

## Underslung Toolbox

Do you also sometimes or often store materials on your back seat? If so, you should definitely take a look at the Underslung Toolbox, as this is extremely dangerous. The Underslung Toolbox creates storage space where there was none before: under the loading area. The all-around seal protects the contents from rain and splash water, and the lid opens up to 90° to ensure ergonomic access here as well.

## Tarpaulin Structures

As a specialist in transport, LogicLine also has tarpaulins (covers) in its product range. Transport boxes can be easily integrated into the tarpaulin and drop side. The tarpaulin frame made of galvanized steel shaped tubes supports the tarpaulin roof and ensures proper water drainage with a slope.

## Pickup-Solutions

You will also see the new pickup solutions at GaLaBau. The exhibited PickUp System offers high-quality weather protection with side flaps and a large end-to-end compartment at the front. There is a wide range of accessories: loading containers, pull-out drawers, additional side boxes, and more. With the new water deflectors, the interior of your pickup solution remains almost completely dry, even with the tailgate and side flaps open. The aluminum frame construction, steel sheet walls, and powder-coated aluminum side flaps not only look professional and high-quality – they are.

## Stolzer Partner der Nutzfahrzeug-Industrie

LogicLine is *Mercedes-Benz VanPartner*, *PremiumPartner of Volkswagen Commercial Vehicles*, *Ford Pro Converter* and *Stellantis Certified Partner*.

The ISO 9001:2015 and ISO 14001:2015 certified company meets the high-quality standards of the commercial vehicle industry and has made it to the major league of body manufacturers.

## Experience LogicLine

Products can be individually configured in the online shop. LogicLine also continuously provides customers and interested parties with news about vehicles, load securing, and transportation through a blog, along with information on craftsmanship. The field service advises customers on-site with a demo vehicle. Expert LogicLine staff are also available by phone or via live chat.

### LogicLine Trade Fair Calendar

LogicLine is regularly present at trade shows in German-speaking regions. A current trade show calendar can be found at [www.logicline.eu/en/services/trade-fair-calendar](http://www.logicline.eu/en/services/trade-fair-calendar).
