MANAGED RISK AND CONTROLS

MRC

MANAGED RISK AND CONTROLS

AN UMBRELLA OF SOLUTIONS TO EFFECTIVELY MANAGE VARIOUS ASPECTS OF CYBERSECURITY.

MRC Services offer an umbrella of solutions that enable clients to effectively manage and orchestrate various aspects of cybersecurity such as governance, risk, compliance, and operations. Our comprehensive approach streamlines these diverse facets of cybersecurity, providing clients with a cohesive and integrated security solution.

MRC provides a comprehensive approach to cybersecurity management, leveraging the SWORDFISH® Platform to offer situational awareness and orchestrate client-side operational, risk, and privacy management activities.

With SWORDFISH®, MRC's services enable organizations to unify and manage all key components of enterprise security management, presenting a unified view of their security posture through a single pane of glass. Document your risk, track your controls, report on your compliance and exposure with SWORDFISH® MRC.

This approach streamlines security operations and allows organizations to focus on other critical areas of their business. By deploying MRC, clients can benefit from the advanced technology and expertise, achieving a higher level of visibility, readiness, and resilience against today's evolving cyber threats.

Obrela can protect clients through a combination of MRC products and service capabilities based on their maturity, business profile and capabilities.

OBRELA CAN PROTECT CLIENTS THROUGH A COMBINATION OF MRC PRODUCTS & SERVICE CAPABILITIES

Obrela's SWORDFISH® platform can be attuned to the versatile and dynamically changing needs of enterprises as a integrated cyber risk management platform that orchestrates controls in the diverse facets of cybersecurity operations.

MRC Modules:

- Privacy Management
- Policy Management
- Compliance Management
- Supply Chain Security
- Exposure Management
- Cyber Risk Management
- Cyber Resilience Management
- Incident Management
- Digital Universe Management
- Risk Analytics
- Service Management

CYBER RISK MANAGEMENT

CYBER RESILIENCE MANAGEMENT

MRC products enable clients to **effectively manage and orchestrate various aspects of cybersecurity such as governance, risk, compliance, and operations**. Our comprehensive approach streamlines these diverse facets of cybersecurity, providing clients with a cohesive & integrated security solution.

A set of services designed to help organizations effectively manage their privacy and data protection obligations. These services are tailored to each organization and are aimed at ensuring compliance with relevant privacy regulations, such as the General Data Protection Regulation (GDPR).

Dedicated to enhancing organizations' security posture providing a tailored ISMS review, to ensure that information security policies align with industry best practices and regulatory requirements.

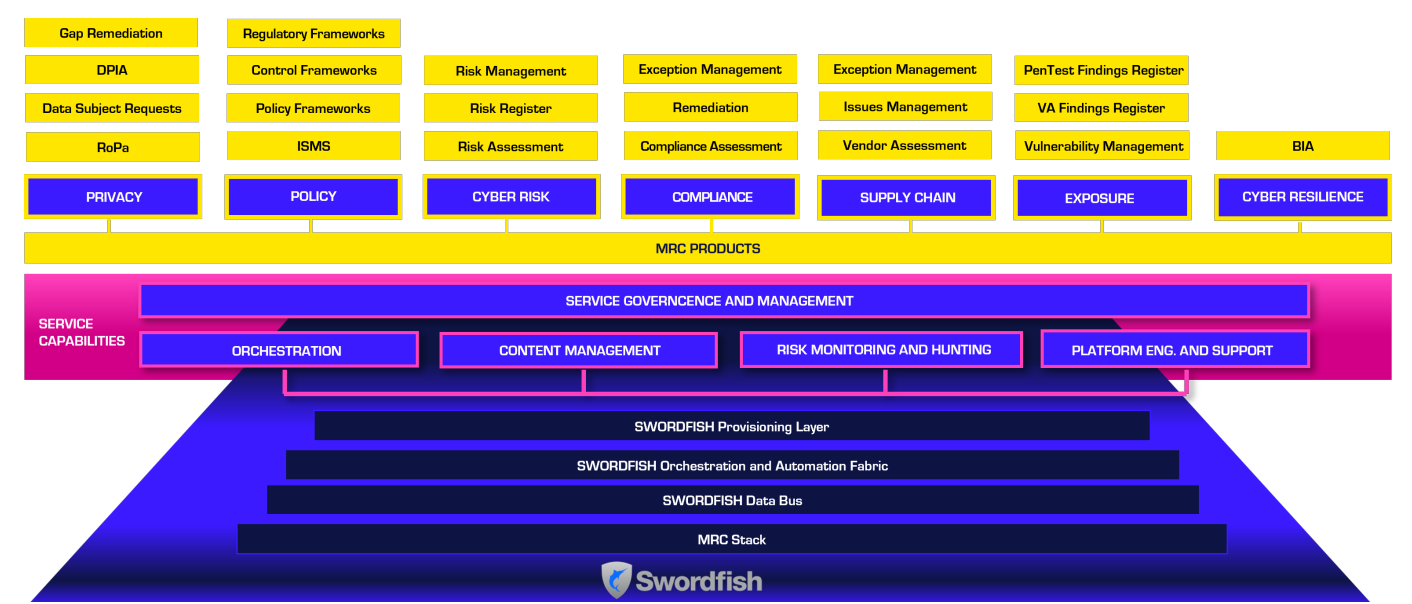

Provides organizations with comprehensive solutions for assessing their current compliance status with selected frameworks and assists with implications and remediation actions.

Empowers organizations to encompass the collection, analysis, and evaluation of information on security processes and practices currently in place. Enables a thorough assessment of compliance with selected contractual requirements and identification of areas that require remediation actions.

Covers the entire vulnerability and exposure management process, including the identification, assessment, prioritization, and remediation of potential security weaknesses. A dedicated team of experts identifies vulnerabilities and provides actionable recommendations to mitigate and address risks effectively.

Through continuous assessment and analysis of identified risks, the service provides ongoing visibility into clients' organization's cyber risk posture, enabling them to effectively address new and emerging threats.

A comprehensive and proactive approach in managing cyber resilience and business continuity risks. The service encompasses continuous review, business impact analysis, recovery strategies, and plans to ensure organizations are well-prepared to respond to potential disruptions.

MRC SERVICE CAPABILITIES

MRC services harness the fusion of advanced technology, expert knowledge, and proprietary process IP to offer organizations a **comprehensive suite of capabilities to effectively identify, manage, and mitigate cyber risks**. By leveraging these services, organizations can strengthen their cybersecurity governance, risk, and compliance practices, enabling proactive and efficient cyber risk management.

ORCHESTRATION

Offers comprehensive support, enabling organizations to orchestrate and streamline security operational activities to reduce overheads, optimize operational security controls, and provide a strong foundation for effective enterprise security.

CONTENT MANAGEMENT

A critical service element that ensures the applied framework accurately reflects organizational changes and complies with relevant context such as security compliance requirements, laws, and regulations. Embedded content increases the efficiency of starting and maintaining a GRC program. Enables organizations to proactively manage content, ensure its accuracy and relevance by keeping pace with the latest security content tailored to specific needs.

RISK MONITORING AND HUNTING

Proactively identify and address potential cyber risks leveraging advanced analytics capabilities, including machine learning algorithms, behavioral analysis, and real-time risk analytics. Includes continuous monitoring and hunting for abnormal activities, policy deviations, unmitigated findings, inconsistencies, and other potential risks to the security posture. Combines knowledge, intuition, and automation to proactively search for signs of potential risks before they can cause significant harm to business operations.

PLATFORM ENGINEERING & SUPPORT

The platform engineering and support team encompasses all preventive maintenance and operations-driven technical tasks related to the SaaS platform and the customers' CPE and integrations with their systems via SWORDFISH® SRM for technical requests.

SERVICE MANAGEMENT

Ensures customers go beyond successful implementation to achieve their business objectives. Facilitates collaboration with experts across the service delivery and guides customers through a structured success program.

WHY OBRELA MRC

Obrela's MRC Solution provides visibility across every point in your ever-expanding organization.

The digital landscape is constantly evolving, and with it comes new challenges in the realm of cybersecurity. Organizations face an increasing number of cyber threats, which can have a devastating impact on their operations, reputation, and bottom line. To combat these threats, Obrela offers a comprehensive range for compliance and control that provides clients with a 360-degree security program.

CUSTOMER-BASED

- **Manage Risks in Real Time.** Take informed decisions based on the actual risk. Our centralized view provides a comprehensive overview of your business risks, removing complexity and allowing you to prioritize the most critical issues in real-time. This empowers you to make focused decisions that are aligned with your business goals and risk appetite.
- **Remove Overheads and Improve Efficiency.** Our MRC services are designed to streamline and orchestrate security operational activities throughout your organization, reducing overhead costs and optimizing operational security controls. By doing so, we help you to improve efficiency and ensure effective response and containment in the event of a security incident.

TECHNOLOGY-BASED

- **Security-As-A-Service.** MRC services aim to deliver a comprehensive 360 security program powered through which we manage cyber exposure, risk and compliance as a service and Optional.
- **Governance & Compliance.** The enterprise governance and compliance management capability of the SWORDFISH® Technology smoothly connects all major elements of Information Security Management from framework establishment and maintenance to continuous monitoring and reviewing, delivering a robust platform specifically designed for Information Security Governance and Compliance.
- **3D Enhanced Visibility.** Our proprietary SWORDFISH® Technology goes beyond just monitoring technology to include procedural aspects, delivering 3D visibility for next-gen Cyber Security. With enhanced visibility, our clients can make calculated decisions that enhance their security posture and operational resilience, while minimizing risk exposure.
- **Embedded GRC Content.** With embedded content and a vast number of applications and connectors, MRC enables organizations to dynamically manage their security framework, orchestrate governance and compliance procedures, assess compliance with regulations, policies and standards, and analyze information risks in real time - all under a single interface carefully designed for ease of use, easily customizable to fulfil different organization views and roles.
- **MRC Service Governance.** Ensured through the Customer Security Success Manager, who serves as the point of contact for understanding clients' needs and security requirements. They provide guidance within the Obrela ecosystem and service provisioning to ensure customer success.

WHY OBRELA

WHAT WE DO

Make businesses resilient by deploying a real-time cybersecurity system over an ever-expanding digital universe.

WHY WE DO IT

With full-stack threat detection, aligned to business risk, powered by the SWORDFISH® platform, and driven by expertise more relentless than any threat.

HOW WE DO IT

No matter the threats that may loom over our customers, we provide an umbrella of security that protects every person, every thing, and every goal their business has.

Obrela delivers real-time, risk-aligned cybersecurity that provides an umbrella of defense over every aspect of your business. We focus on risk over threats to bring business perspective to cyber defense to make security scalable, no matter how much your business grows.

With SWORDFISH®, an Integrated Cyber Risk Management in Real Time Platform, we deliver predictability over uncertainty, allowing you to orchestrate and control all aspects of cybersecurity. By centralizing security data, we deliver visibility over your entire digital universe.

At Obrela, we do more than create better cybersecurity. We create cyber resilience to defend every person, asset and goal your business has.

ABOUT OBRELA

Obrela is a global provider of cyber security services. We provide security analytics and risk management services to identify, analyze, predict and prevent highly sophisticated security threats in real time. Founded in 2010, Obrela delivers real-time cyber risk management combining Threat Detection and Response (Managed Detection and Response, MDR) with Managed Risk and Controls (MRC) services to resolve technology fragmentation and process disconnects, while aligning technology to business objectives leading to better decision-making.

Our mission is to 'Keep Your Business in Business' at all times.

The background is a dark blue gradient. It features several abstract geometric shapes: a large, irregular yellow-outlined shape on the right side, and a blue-outlined shape on the left that resembles a stylized mountain or a wave. The text is positioned in the lower-left area, within the blue-outlined shape.
