

Galactic Link Precision Series

DC53 Blade | Copper Carbon Fiber & Titanium Handle

Where cosmic networks fuse with neural pathways— each titanium handle is etched with a unique branching map, linking star clusters like synapses across the infinite. Copper Carbon Fiber brings nebular swirls and metallic illusions. A connection carved in metal, alive with shifting light.— a tool designed where celestial maps meet the architecture of thought.

FEATURES

Modified Drop Point:

The Modified Drop Point delivers tactical piercing precision, while its refined curvature handles daily tasks with fluid control—from precise field work to urban carry.

Rapid-Deploy Ready:

Access the blade instantly via flipper tab or thumb stud. It glides open on a smooth ceramic ball-bearing pivot, its profile lightened and balanced by a precision-milled spine groove—all engineered for decisive, one-handed deployment.

Titanium+Copper Carbon Fiber Handle:

The cool, assured rigidity of titanium meets the subtle, warm conductivity of woven copper. This is a handle that feels alive in hand—offering not just supreme durability, but a tangible, stellar warmth.

Lock: Designed for true ambidextrous operation, it combines a proven Liner lock mechanism with dual thumb studs.

Carry: The design embodies sleek minimalism through clean lines, a discreet titanium pocket clip, and a precision-machined lanyard hole, blending practicality seamlessly into its portable form.
