

**IBERAMBALAJ**<sup>®</sup>  
SANAYİ VE TİCARET A.Ş.

We have successfully developed our own brand **ULTRABOARD**<sup>®</sup> with the help of innovative technology thanks to our experience in the packaging industry **since 1987**.

We're excited to introduce **ULTRABOARD**<sup>®</sup>, an extensive range of 6 different products, designed to cater to your diverse packaging requirements.

**ULTRABOARD**<sup>®</sup>

**100% RECYCLEABLE & ECOLOGICAL**

**EXEMPT FROM ISPM-15 STANDARDS**

**LOWER WEIGHT, LOWER PRICE**

**CUSTOMIZABLE & AESTHETIC**

**HIGH STRENGTH & DURABILITY**

**SIMPLE TO ASSEMBLE & USE**

**SHOCK & VIBRATION ABSORPTION**

**NO HARMFUL SUBSTANCES**

**LOWER STOCK COST**

**ECONOMICAL**

**NO BUGS, NO NAILS**

**HEAVY LOAD CAPACITY**

**ECO FRIENDLY**

**LIGHTWEIGHT**

# INTRODUCING ULTRABOARD®

ULTRABOARD® corrugated cardboard panel stands out from other packaging options like wood, foam and plastic due to its exceptional qualities.

It offers remarkable strength, superb shock and vibration absorption capabilities, long-lasting durability, lightweight design, affordability, and is crafted from paper-based materials. Moreover, it's %100 recyclable and environmentally friendly.

## Advantages of ULTRABOARD®

- **EXCEPTIONAL STRENGTH:** Engineered to endure the rigors of handling, shipping, and storage, ULTRABOARD® ensures your products remain protected during transportation and stacking.
- **LIGHTWEIGHT DESIGN:** Unlike heavier alternatives such as wood or plastic, ULTRABOARD® significantly reduces weight, resulting in substantial cost savings, particularly in shipping expenses.
- **DURABILITY AND RESISTANCE:** With durability that rivals wood, ULTRABOARD® replaces traditional materials in protective packaging applications. It's seven times lighter than wood, allowing for increased product capacity and reduced freight costs, especially for partial loads.
- **VIBRATION AND IMPACT ABSORPTION:** ULTRABOARD® excels in damping vibrations and cushioning impacts during transportation, ensuring your products remain damage-free.
- **NO MOLD OR INSECT INFESTATIONS:** Thanks to its paper-based composition, ULTRABOARD® is resistant to mold, fungi, moss, and insect infestations, eliminating associated odors. Pallets, boxes, crates, and runners made from ULTRABOARD® do not require any heat treatment or fumigation. Plus, it's not subject to the ISPM-15 standard, providing you with cost and time advantages.
- **ECO-FRIENDLY:** Committed to sustainability, ULTRABOARD® is 100% recyclable, aligning with your environmental goals while reducing its ecological footprint.

# ULTRABOARD® Product Range

## ULTRABOARD® Corrugated Cardboard Panel

ULTRABOARD® with its high durability, serves as an excellent separator in both horizontal and vertical applications due to its ability to absorb impacts, vibrations and shocks. The panel thickness is customized to match the maximum load it needs to support.

THICKNESS	WIDTH	LENGTH (max)
10 - 300 mm	30 - 1200mm	3500 mm

## ULTRABOX® Box & Crate

- 10x lighter than wooden boxes and crates.
- 3x more weight bearing capacity compared to it's counterparts.
- Does not contain nails, splinters or sharp corners.
- Easy assembly.
- Can be used with **ULTRARUN®** pallet runners.

THICKNESS	WIDTH	LENGTH (max)	HEIGHT (max)
10 - 50 mm	In desired dimensions	3500 mm	1200mm

## ULTRAPAL® Pallet

- Up to 3x more load capacity compared to paper honeycomb pallets.

THICKNESS	WIDTH	LENGTH (max)
10 - 50mm	In desired dimensions	3500 mm

- The dimensions and quantities of pallet feet vary based on the payload.
