XPR

FOCUS ON XPR 2-IN-1

The XPR machine is a 2-in-1 roller press and laminator offering dual functionality with its innovative continuous pressing and laminating system.

Designed for seamless integration into production lines, whether for automatic or manual operation, the XPR combines two functions in a single machine reducing costs, optimizing floor space, and significantly boosting productivity

— WHY CHOOSE US?

OMMA brings over 60 years of expertise to deliver custom, precise, and sustainable coating and lamination solutions, offering end-to-end support and building trusted global partnerships

- Proven Expertise
- Tailor-Made Engineering
- Advanced Technology
- Sustainability in Focus
- Strong Customer Support
- Global Trust

— CUSTOM-DESIGNED SPECIAL MACHINE

Our machines are designed to seamlessly integrate into existing lines, offering tailored solutions to meet your specific needs.

Explore our expertise in precision machinery, designed to meet the unique technical challenges of your manufacturing sector.

ADDITIONAL OPTIONS

- Loading and unloading
- Robotic arms
- Bridge systems
- Roller or disc conveyors
- Lifting tables
- Overlay material feeder
- High Pressure Roller Cleaning System
- Cutting system

— ABOUT US

OMMA and WALCO are two leading brands in industrial machinery, brought together under the Novacel Special Machines division.

Together, they combine over 60 years of expertise in the design, engineering, manufacturing, and global exportation of advanced laminating and gluing solutions tailored to a wide range of materials and industrial applications.

Specializing in protective film laminators, roller laminating presses, and glue spreaders (water-based, hotmelt, PUR), our machines are designed for reliability, flexibility, and precision. They are used across various industries such as furniture, construction, insulation, automotive, wood, glass, metal, and plastics, ensuring that surfaces are glued, laminated and protected with maximum efficiency and consistency.
