GUANGDONG PRIME PET CO., LIMITED.

Same food safety production standard for both human beings and pets
We provide global pets brand with One-Stop OEM service!

Company Profile

Guangdong Prime Pet Co., Limited., as a new derived subsidiary of Guangdong Fuwei & Yichao Biological, operates and manufactures independently, it is committed to providing pet nutrition and health care products. We are a manufacturing enterprise that provides scientific feeding, green and natural pet health food and one-stop OEM/ODM services. The production scope covers: softgel, powder, tablet, soft chew, paste, drop/spray, micro softgel, liquid drink and pet care (bath shampoo, spray and mouthwash).

Corporate Vision: Become a leading company in pets health market and a manufacturer with one-stop supply chain

Corporate Mission: Provide pets keeper with scientific and natural nutritional supplement and service

Business Concept: Treat segment market with differentiated products. Meet customers' requirement with personalized service

Core Value: Innovative, Win-win, Trustable, Integrity

Global Smart Factory helps the growth of pets

High Safety · Multiple Dosages · Fast Efficiency

• GMP level factory

We invest 30 million RMB to build a 5,000-square-meter factory, and the clean workshop reached GMP Level 100,000. It introduces the most advanced production equipment, providing a solid guarantee for the excellent quality of products, it's the modern pet food factory and one of the professional production bases of pet food with the full dosage forms in China.

• Diversified production base of dosage forms

By imitating the dosage form of nutritional products for human use, innovation is made in palatability and convenience, in which makes pet food palatable and convenient to take and store.

• Perfect service system

With the support of over 500 multinational well-known raw material suppliers around the world, the core technology raw material supply advantages are realized more quickly, competitively and at the same time with high quality.

Awarded Various Technical Patents & Certifications

Continuously innovate pet technology advantages, we has been awarded multiple invention patents and utility model patents in the pet field.

Certified by **NSF-FSVP**, **BRC** and other global high standard systems Certification

Quality Control Strength

Testing Capability of Over 130 Items

We have an independent R & D team and a high standard laboratory, more than dozens of full-time pet R & D personnel, the central laboratory was certified by CNAS in 2022. With product testing capabilities and quality management level in line with international standards, we can provide international mutual recognition of professional testing / calibration services, inspection reports and more reliable technical security.

Equipped with ICE3300 flame atomic absorption spectrometer, UltiMate3000 UHPLC rapid liquid phase, ultraviolet visible spectrophotometer, ceramic fiber intelligent chamber resistance furnace, electric blast drying oven, ultra-pure water machine, electronic moisture meter, tablet hardness tester, tablet fragility tester, tablet disintegration time limit tester and many other advanced testing equipment and instruments, as well as comprehensive testing methods and processes to ensure the ability and confidence to ensure the quality control of the production process, to ensure that the products can be delivered on time and in quality, efficacy function also has a credible basis by real testing.

Multiple Dosage Form

Global pet nutrition OEM/ODM one-stop solution

Micro Softgel

Processing Technology:

Seamless integrated molding technology, low-temperature cooling technology, automated drying technology, Outer shell anti-adhesive technology

Expected annual capacity:

55 tons of micro softgel, 11 tons of Imitation caviar

Dosage Application

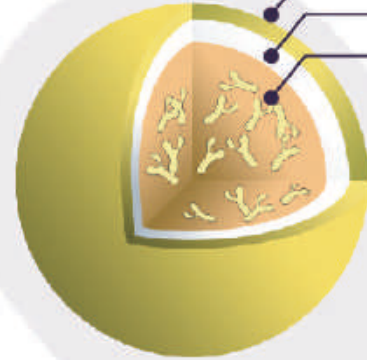

Functional Micro Softgel

High Simulation Functional Caviar

Round shape, content specifications is 10mg-140mg, suitable for product applications of pure oil, oil + powder nutrient supplement

Three-layer softgel structure

- Acid resistant shell
- Protective layer
- Internal components

Pioneering artificial caviar technology

Patent No. ZL 2015 1 0003255.8
Soft Capsule & Its Preparation Method

High Simulation Functional Caviar

Enteric Probiotic Micro Softgel (Regulate gastrointestinal flora, take care of the stomach)

Saccharomyces boulardii, Clostridium butyricum, Bacillus coagulans, etc.

Enterolytic Hairball Removal Micro Softgel (decompose hair ball, mild hairball removal)

Keratinase, etc.

Mouth Freshening Micro Softgel (freshens the mouth and relieves bad breath due to indigestion)

Lactobacillus KT11, persimmon extract, etc.

Joint Comfort Micro Softgel (care for joints and relieve pain)

Type II collagen, turmeric, sodium hyaluronate, etc.

90% Omega-3 Fish Oil Micro Softgel (hair beauty and skin care, heart and brain care, bright eyes, lubricating joints, strengthening immunity)

High purity Omega-3 fish oil etc.

Emotional Relief Micro Softgel (eliminate tension and help relaxation)

L-theanine, wild oat extract, magnesium citrate, etc.

Antarctic Krill Oil Micro Softgel (hair beauty and skin care, strengthen joints, relieve inflammation, enhance resistance, help eye and brain development, care for cardiovascular, strengthen resistance, promote digestion, antioxidant)

Formulation Characteristics

Palatability: ★★★★★

Sensory: ★★★★★

Absorption: ★★★★★

Efficacy: ★★★★★

Portability: ★★★★★

Stability: ★★★★★

· Innovative pet nutrition dosage form, high technical difficulty in production, can achieve high content and high absorption.

CAPSULE

Core equipment:

Melting and boiling, gel capsule forming equipment

Expected capacity: 200 million PCS per year

Oval shape

Oblong shape

Fish shape

Gourd shape

Drop shape

Special shape

- Easy and hygienic feeding
- Suitable for adding liquid nutrients
- High threshold of equipment selection, commonly used in medical products

Extendable Functions

- ✓ **Eye health (prevention of night blindness, keratitis, irritant tear stains)**
DHA, ARA, omega-3, omega-6, lutein esters, taurine, cod liver oil, etc.
- ✓ **Bone and joint health (prevention of osteoporosis, joint damage, chondromalacia)**
Liquid calcium, lactated calcium, chondroitin, K2, sodium hyaluronate, VD, cod liver oil, etc.
- ✓ **Skin and hair health**
Deep sea salmon oil, omega-9, omega-6, etc.
- ✓ **Heart and cardiovascular health**
Olive oil, flaxseed oil, Q10, Antarctic krill oil, omega-6, etc.
- ✓ **Healthy intellectual development of the brain**
DHA algae oil, omega-3, omega-6, ARA, walnut oil, phosphatidylserine, etc.

Formulation Characteristics

- | | |
|---------------------|-----------------|
| Palatability: ★★★★★ | Sensory: ★★★★★ |
| Absorption: ★★★★★ | Efficacy: ★★★★★ |
| Portability : ★★★★★ | Stability: ★★★ |

• Innovative pet nutrition dosage form, high technical difficulty in production, Suitable for product applications of fats, oils and liquid-based nutrient supplementation.

TABLET

Processing Technology:

low temperature cold press forming,
multi-layer coating and micro-molecular embedding technology

Expected annual capacity: 1000 tons

Core equipments: BJ-350 stainless steel crusher, 3D vibrating screening filter, 3D motion mixer, high-efficiency wet mixing soft chew maker, swing soft chew maker, precise temperature control drying room, rotary tablet press machine, rapid moisture tester, tablet hardness tester and filter cartridge pulse dust collector

Shapes available:

bone shape, triangle shape, heart shape, water drop shape, ellipse shape, cylinder shape, circle shape and oblong shape

- Nutrients can be coated
- A variety of technical processes can be implemented such as normal temperature pressing, low temperature pressing, coating and spraying
- Smaller, denser, better chemical stability, easy to carry and store, safe and hygienic

Extendable Functions

Strengthen immunity

Immunoglobulin,, probiotics, matsutake peptides, yeast β -glucan, lysine, etc. vitamins

Bone and joint health

Calcium lactate, aminos, K2, sodium hyaluronate, arabinose, CPP, VD, etc.

Skin and hair health

Deep-sea salmon oil, barley grass powder, chicory root powder, citron powder, pumpkin seed powder, papain, lipase, etc.

Micronutrient supplementation to avoid pica

Chelated minerals (copper, iodine, manganese, selenium, zinc, magnesium, potassium), etc.

Maintain gut health

Lactobacillus plantarum, Lactobacillus acidophilus, Bacillus coagulans, oligofructose, oligomeric isomaltose, etc.

Formulation Characteristics

Palatability: ★★★★★

Sensory: ★★★★★

Absorption: ★★★

Efficacy: ★★★★★

Portability: ★★★★★

Stability: ★★★★★

· One of the mainstream dosage forms, widely used in pharmaceuticals and nutritional products, with high consumer acceptance and a wide range of applications.

PASTE

Processing Technology:

homogenization emulsification, automatic filling and sealing,
small molecule paste structure

Expected annual capacity: 1500 tons

- Strong palatability, suitable for young pets licking habits
- Conduct water-in-oil, oil-in-water bidirectional emulsification technology to ensure the stability of the paste and nutrient absorption rate

Extendable Functions

- ✓ **Nutritional fortification supplement**
Whey protein, vitamins, goat milk, chicken oil, taurine, lysine, etc.
- ✓ **Hair removal promotion**
Papain, lipase, barley grass powder, chicory root powder, citron powder, pumpkin seed powder, etc.
- ✓ **Improve pet constipation**
Olive oil, oligofructose, oligomeric isomaltose, etc.
- ✓ **Micronutrient supplementation to avoid pica**
Chelated minerals (copper, iodine, manganese, selenium, zinc, magnesium, potassium), etc.

Formulation Characteristics

Palatability: ★★★★★
Absorption: ★★★
Portability: ★★★★★

Sensory: ★★★
Efficacy: ★★★★★
Stability: ★★

· One of the mainstream dosage form, strong palatability, adult pets and young pets prefer, but the extension function is more restricted.

POWDER

Processing Technology:
Pre-mixed dry mix, lyophilized powder, multi-layer embedding technology

Expected annual capacity: 800 tons

Core equipment:
BJ-350 stainless steel crusher, three-dimensional vibratory sieving and filtering machine, U-shaped mixer, three-dimensional mixer, powder back seal packaging machine, sealing test instrument

- High absorption rate, suitable for solid nutrients with strong palatability.
- Advanced embedding technology at home and abroad effectively ensures that nutrients and microorganisms play a role in fixed-point orientation.

Extendable Functions

- ✓ **Strengthen immunity (prevent feline rhinotracheitis, colds, infectious inflammation)**
Immunoglobulin, vitamins, matsutake peptides, yeast β -glucan, lysine, fucose, etc.
- ✓ **Gaining muscle, gaining weight, cheek fatten**
Whey protein powder, chicken meat powder, raw bone meat powder, grain-fed beef powder, taurine, methionine, etc.
- ✓ **Skin and hair health (hair beauty and hair increase, hair removal promotion, skin disease prevention)**
Barley grass powder, chicory root powder, citron powder, pumpkin seed powder, papain, lipase, omega-9, lecithin, etc.
- ✓ **Micronutrient supplementation to avoid xenophagia**
Chelated minerals (calcium, iron, zinc, copper, iodine, manganese, selenium, zinc, magnesium, potassium), etc.
- ✓ **Regulation of intestinal health (diarrhea, constipation, inflammation of the intestinal tract)**
Lactobacillus plantarum, Lactobacillus acidophilus, Bacillus coagulans, oligofructose, inulin, oligomeric isomaltose, etc.

Formulation Characteristics

Palatability: ★★★	Sensory: ★★★★★
Absorption: ★★★★★	Efficacy: ★★★★★
Portability: ★★★	Stability: ★★★

· One of the mainstream dosage forms, widely used in pharmaceuticals and nutritional products, with high consumer acceptance and a wide range of applications.

SOFT CHEWS

Processing Technology:

low temperature extrusion, preserving most of the nutrients

Expected annual capacity: 700 tons

- High palatability, high moisture content, and the ability to achieve a variety of shape
- 100% pure meat formula with "hypoallergenic grains" for improved protein and taste
- Functional nutrients can be added through spray technology

Shapes available:

square shape, triangle shape, heart shape, ellipse shape, circle shape and bone shape shape

Extendable Functions

- ✓ **Oral cleaning and health (prevention of dental calculus, removal of bad breath)**
Vitamins, bacillus coagulans, oligofructose, chamomile extract, tea polyphenols, PE301, etc.
- ✓ **Bone and joint health**
Shark chondroitin, K2, VD, sodium hyaluronate, L arabinose, etc.
- ✓ **Skin and hair health (hair beauty and hair increase, hair removal promotion, skin disease prevention)**
Barley grass powder, chicory root powder, citron powder, pumpkin seed powder, papain, lipase, omega-9, lecithin, etc.
- ✓ **Supplementation of micronutrients and improvement of nutritional structure**
Chelated minerals (calcium, iron, zinc, copper, iodine, manganese, selenium, zinc, magnesium, potassium), vitamins, amino acids, fatty acids, etc.

Formulation Characteristics

Palatability: ★★★★★

Absorption: ★★★

Portability: ★★★

Sensory: ★★★

Efficacy: ★★★★★

Stability: ★★★

· One of the mainstream dosage forms with high palatability, real and measurable active content and wide application range.

FREEZE DRIED

Processing Technology:
ultra-low temperature freeze-drying and fresh-keeping
technology

Expected annual capacity: 500 tons

- Biological fresh-keeping and freeze-drying technology can more completely retain the natural nutritional structure without being destroyed.
- Functional nutrients can be added by reproduction or spraying technology.

Extendable Functions

- ✓ **Beautifying hair/strengthening bones/intellectual vision**
Lecithin, selenium, omega-9, DHA, amino chondroitin, etc.
- ✓ **Gaining muscle, gaining weight, cheek fatten**
Whey protein powder, taurine, methionine, etc.
- ✓ **Supplementation of micronutrients and improvement of nutritional structure**
Chelated minerals (calcium, iron, zinc, copper, iodine, manganese, selenium, zinc, magnesium, potassium), vitamins, amino acids, fatty acids, etc.

Formulation Characteristics

Palatability: ★★★★★

Absorption: ★★★

Portability: ★★★

Sensory: ★★★★★

Efficacy: ★★

Stability: ★★★

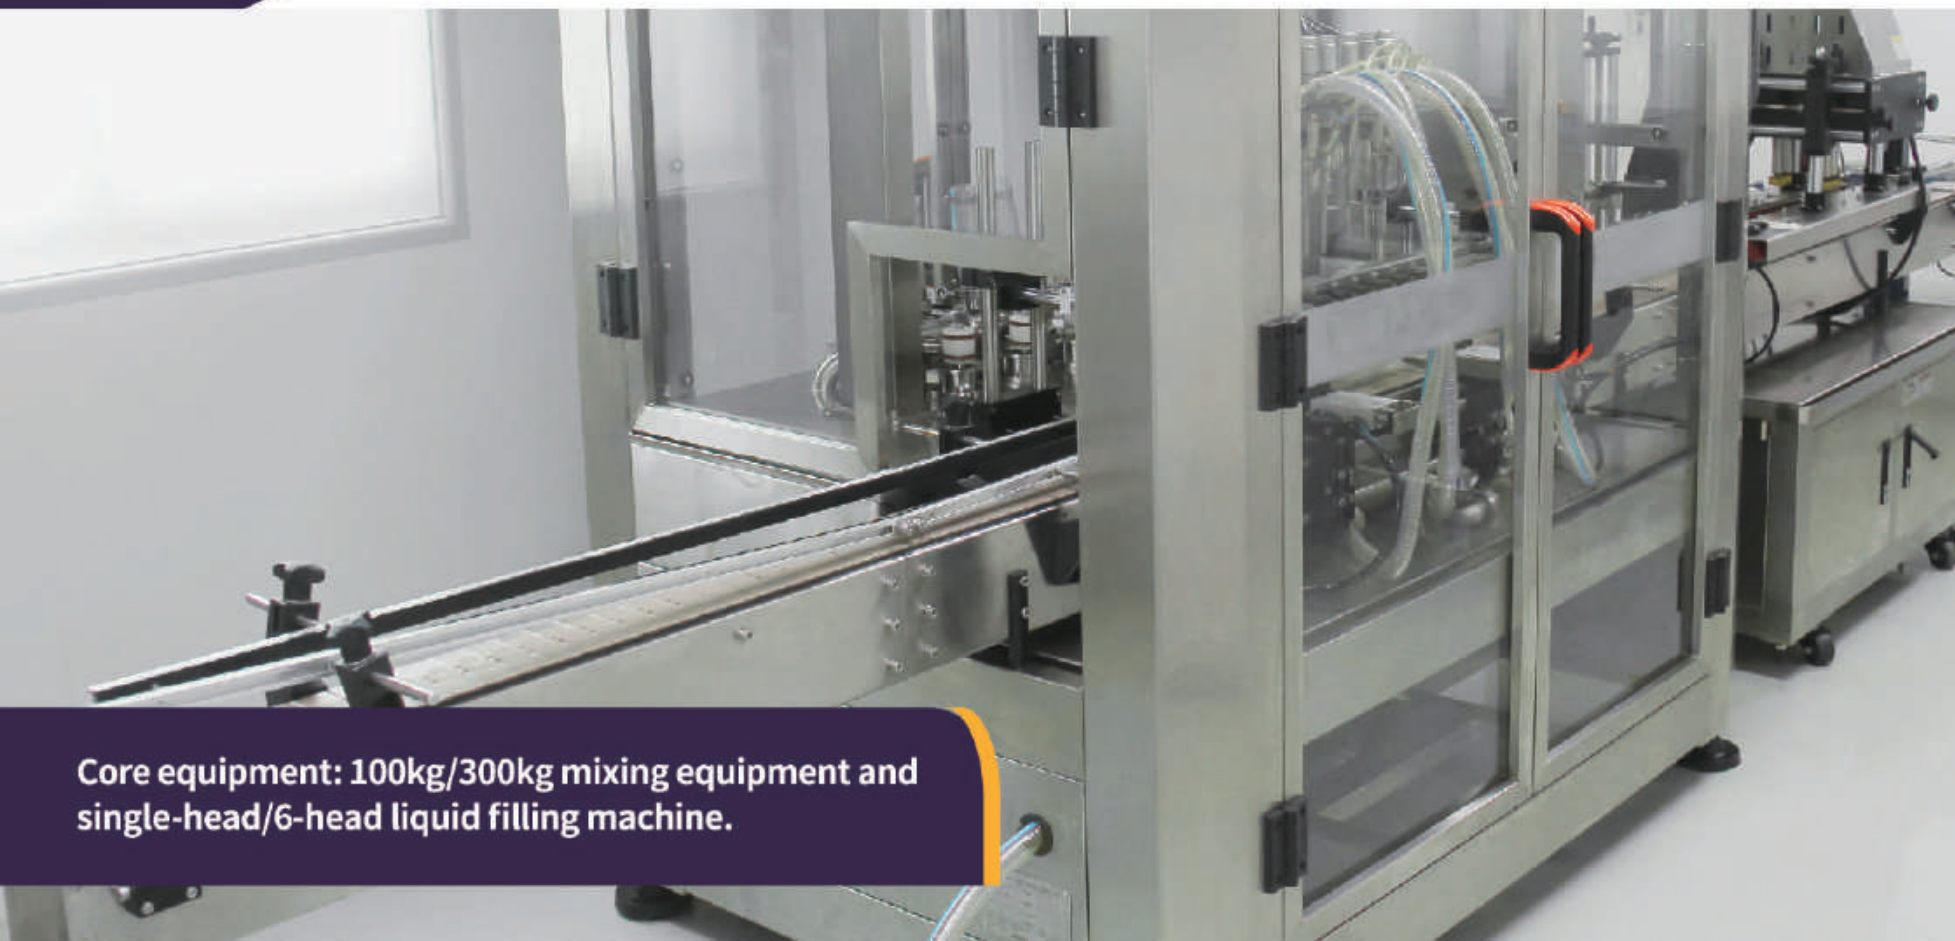

· Snack dosage forms have innovative nutritional functions and strong palatability, but the functional nutrition is limited and its application scope is limited.

DROPS/ SPRAY

Processing Technology:

Low temperature nitrogen filling technology

Expected annual capacity: 5.5 million bottles

Core equipment: 100kg/300kg mixing equipment and single-head/6-head liquid filling machine.

Extendable Functions

- ✓ Can add high nutrient content
- ✓ Good sealing, safe and hygienic
- ✓ Precise dosing, smaller size
- ✓ Regulate intestinal function (improve constipation, diarrhea, loss of appetite, poor absorption of nutrients, etc.)
Bifidobacterium animalis, Lactobacillus acidophilus, Lactobacillus plantarum, high active compound probiotics, etc.
- ✓ Hair nutrition supplement (hair beauty and brightening, hair loss reduction)
Natural high purity salmon oil (contains Omega and DHA, EPA and other important nutrients)
- ✓ Fish oil spray (supplement pet EPA, DHA)
Deep sea fish oil, high absorption rate, can be added up to 99%

Formulation Characteristics

Palatability: ★★★★★

Absorption: ★★★★★

Portability: ★★★★★

Sensory: ★★★

Efficacy: ★★★

Stability: ★★★

· One of the mainstream dosage forms, easy to carry and store, convenient to use, high consumer acceptance and wide range of applications.

BEVERAGES

Core equipment : interlayer boiling kettle, emulsification equipment, three-side seal filling machine, UHT instant sterilization equipment

Expected annual capacity: 22 million bags

Extendable Functions

- ✓ **Strengthen immunity (post-operative recovery, intestinal regulation, immune regulation)**
Astragalus polysaccharide, Schisandra chinensis, vitamins, ferrous lactate, folic acid, etc.
- ✓ **High-energy calcium supplement (developmental delay, weak walking, bone and dental health)**
German imported milk calcium, VD3, casein phosphopeptide CPP, collagen, etc.
- ✓ **Joint Care**
Glucosamine, collagen, sodium hyaluronate, chondroitin sulfate, etc.
- ✓ **Hair chemistry and promotion of discharge (to maintain the intestines and stomach, to help the hair ball discharge)**
Oligofructose, Indian roundbush psyllium husk, salmon oil, keratinase, etc.
- ✓ **Urinary tract health (urinary tract infections, urinary stones, difficulty in urination)**
Oligomeric chitosan, cranberry, dandelion, psyllium, etc.

Formulation Characteristics

Palatability: ★★★★★
Absorption: ★★★★★
Portability: ★★★

Sensory: ★★★★★
Efficacy: ★★★★★
Stability: ★★★

· Innovative nutritional functions in snack dosage form with high palatability and wide range of applications.

PET CLEANING CARE SERIES

Professional Beauty Care for Show Level Pets

Fragrant pet bath shampoo (for light color & long hair / citrus fragrance)

- ① Light color hair protection, clean hair, reduce dry knot;
- ② Use microcapsule long-lasting fragrance retention technology, fresh citrus fragrance;

Product ingredients:

Water, sodium lauryl polyether sulfate, polydimethylsiloxane, cocoamidopropyl betaine, flavoring, cocoamidomethyl MEA, distearyl phthalamide, ethylene glycol distearate, sodium chloride, phenoxyethanol, sodium lauroyl sarcosinate, cocoamidopropyl PG- dimethyl ammonium chloride phosphate, guar gum hydroxypropyl trimethyl ammonium chloride, hydrolyzed corn starch, acrylic acid copolymer, panthenol, OLEA EUROPAEA fruit oil, ALOE BARBADENSIS leaf extract, propylene glycol, lauryl polyether-23, polyquaternary ammonium salt-10, disodium EDTA, ethylhexyl glycerol, sodium acetate, isopropanol and citric acid.

Fragrant pet bath shampoo (dark long hair/oriental wood fragrance)

- ① Dark hair protection, bright coat color, reducing dryness and knotting;
- ② Use microcapsule long-term fragrance retention technology, oriental wood flavor;

Product ingredients:

Water, sodium lauryl polyether sulfate, polydimethylsiloxane, cocoamidopropyl betaine, flavoring, cocoamidomethyl MEA, distearyl phthalamide, ethylene glycol distearate, sodium chloride, phenoxyethanol, sodium lauroyl sarcosinate, cocoamidopropyl PG- dimethyl ammonium chloride phosphate, guar gum hydroxypropyl trimethyl ammonium chloride, hydrolyzed corn starch, acrylic acid (ester) copolymer, panthenol, poly OLEA EUROPAEA fruit oil, ALOE BARBADENSIS leaf extract, propylene glycol, lauryl polyether-23, polyquaternary ammonium salt-10, disodium EDTA, ethylhexyl glycerol, sodium acetate, isopropanol and citric acid.

Fragrant pet bath shampoo (for short hair/ flower and fruit fragrance)

- ① Moisturizing ingredients, improving skin barrier;
- ② Use microcapsule long-term fragrance retention technology, flower and fruit flavor;

Product ingredients:

Water, sodium lauryl polyether sulfate, polydimethylsiloxane, cocoamidopropyl betaine, flavoring, cocoamidomethyl MEA, distearyl phthalamide, ethylene glycol distearate, sodium chloride, phenoxyethanol, sodium lauroyl sarcosinate, cocoamidopropyl PG- dimethyl ammonium chloride phosphate, guar gum hydroxypropyl trimethyl ammonium chloride, hydrolyzed corn starch, acrylic acid (ester) copolymer, panthenol, poly OLEA EUROPAEA fruit oil, ALOE BARBADENSIS leaf extract, propylene glycol, lauryl polyether-23, polyquaternary ammonium salt-10, disodium EDTA, ethylhexyl glycerol, sodium acetate, isopropanol and citric acid.

Pure Bath Shampoo for Pets (short-haired cats and dogs)

- ① Moisturizing ingredients: reduce scurf and improve skin barrier protection;
- ② Mild tearless formula: no irritating ingredients are added, so as to protect the health of pets.

Product ingredients:

Water, glycerin, cocoamidopropyl betaine, sodium tridecanol polyether sulfate, PEG-80 sorbitan laurate, PEG-150 distearate, sodium picryl amphoteric acetate, phenoxyethanol, citric acid, caprylic acid/caprylic glyceride polyglycerol-10 esters, flavoring, disodium EDTA, sodium chloride and ethylhexyl glycerol.

Pure Bath Shampoo for Pets (long-haired cats and dogs)

- ① Hair protection ingredients: avoid dry and knotted hair;
- ② Mild tearless formula, so as to protect the health of pets safely;

Product ingredients:

Water, glycerin, cocoamidopropyl betaine, sodium tridecanol polyether sulfate, PEG-80 sorbitan laurate, PEG-150 distearate, sodium picryl amphoteric acetate, phenoxyethanol, citric acid, caprylic acid/caprylic glyceride polyglycerol-10 esters, flavoring, disodium EDTA, sodium chloride and ethylhexyl glycerol.

Pet wash-free cleaning foam (light fragrance and odor removal)

- ① Wash-free foam design: convenient and hygienic;
- ② NeoCaps microcapsules: long fragrance retention;
- ③ Antibacterial and moisturizing formula: no harm to skin, long-term protection;

Product ingredients:

Water, octanoyl/decylaminopropyl betaine, glycerol, PEG-40 hydrogenated castor oil, sodium citrate, phenoxyethanol, benzalkonium chloride, disodium EDTA, flavoring, sodium chloride, ethylhexyl glycerol, CITRUS AURANTIUM BERGAMIA fruit extract, silver and lauryl polyether-23.

Pet wash-free cleaning foam (fragrance-free and odor-free)

- ① Wash-free foam design: convenient and hygienic;
- ② NeoPure is pure and odorless which is mild and not irritating;
- ③ Antibacterial and moisturizing formula: no harm to skin,

Product ingredients:

Water, octanoyl/decylaminopropyl betaine, glycerol, PEG-40 hydrogenated castor oil, sodium citrate, phenoxyethanol, benzalkonium chloride, disodium EDTA, flavoring, sodium chloride, ethylhexyl glycerol, CITRUS AURANTIUM BERGAMIA fruit extract, silver and lauryl polyether-23.

Active enzyme tooth cleaning water for pets

- ① Safe, edible, non-toxic and harmless;
- ② Active enzymes can significantly improve the dynamic balance of gastrointestinal microorganisms and immunity of pets;

Ingredients:

water, active enzyme, antioxidant.

Probiotic tooth cleaning water for pets

- ① Safe, edible, non-toxic and harmless;
- ② The sterilization rate reached 99.9%;

Ingredients:

water, natto, lactic acid bacteria and yeast.

Pet perfume Field flower and fruit fragrance

- ① It's like being in a field orchard, sweet and pleasant, vital;
- ② Sweet front fragrance, fresh middle fragrance and longlasting;

Ingredients:

Ethanol, water, fragrance essence, di-tert-butyl p-cresol.

Pet perfume Oriental wood fragrance

- ① Noble and elegant, mysterious and profound, revealing the sense of classic aristocratic of the East;
- ② Deep front fragrance, dense middle fragrance, longlasting;

Ingredients:

Ethanol, water, fragrance essence, di-tert-butyl p-cresol.

Mild and clean sterilization spray for pets (Peach odor)

- ① combined microbial deodorization technology by Huanong;
- ② 80%+ sterilization rate: sterilization and bacteriostatic test report;

Product ingredients:

Water, glycerol, PEG-40 hydrogenated castor oil, cocoamidopropyl PG-dimethyl ammonium chloride phosphate sodium, sodium citrate, phenoxylethanol, propylene glycol, dichloromethanol, flavoring, disodium EDTA, ethylhexyl glycerol, CITRUS AURANTIUM BERGAMIA fruit extract, silver and lauryl polyether-23.

"De-mite" pet odor-removing, bacteriostatic spray (Musk odor)

- ① Eliminate mite bug formula: eliminate mite bug test report;
- ② 90%+ sterilization rate: sterilization and bacteriostatic test report;
- ③ patented odor purification and deodorization technology;

Product ingredients:

Water, glycerol, PEG-40 hydrogenated castor oil, cocoamidopropyl PG-dimethyl ammonium chloride phosphate sodium, sodium citrate, phenoxylethanol, propylene glycol, dichloromethanol, flavoring, disodium EDTA, ethylhexyl glycerol, CITRUS AURANTIUM BERGAMIA fruit extract, silver and lauryl polyether-23.

Pet perfume Forest citric fragrance

- ① Fresh and chill, like the elves flying through the tropical jungle;
- ② Fresh front fragrance, unique middle fragrance and longlasting;

Ingredients:

Ethanol, water, fragrance essence, di-tert-butyl p-cresol.
