RAN

.....

Our logo represents our history and our roots.

The letters VFB stand for Vittorio and Franco Bocedi, two brothers that in 1966 started a family business to produce packaging machines for the local market.

A family business that year after year, thanks to the passion and dedication of its founders, has seen continuous growth, and that today represent a worldwide leading brand of state of the art packaging lines.

The company is now managed by the second Bocedi generation: four tireless working brothers that master with the same passion and dedication their family business.

THE COMPANY

Based in Italy, right in the middle of the packaging valley, we have been manufacturing pallet packaging systems **since 1966**.

Our products range includes stretch and shrink hood machines, vertical and horizontal strapping machines, in-box bagmakers and a multitude of customisable accessories to fit the most demanding packaging cycle.

All our machines are **entirely made in Italy**, assembled and tested in our headquarter in Scandiano (RE).

Thanks to the many years of manufacturing experience, the passion and the continuous investments in research and development, we design dedicated **packaging solutions for all industrial sectors**.

We export our quality worldwide installing over 150 fully automated packaging lines each year.

TAILORED PACKAGING SOLUTIONS

We focus on manufacturing end of the line packaging solutions. Stretch and shrink hood lines are our daily routine and core business. The dynamism of our company generates our flexibility, we create customized designs for each single line that we produce . We listen and we work alongside our customers to offer the best packaging solution for their production needs, with the upmost quality standards.

Horizontal and vertical strapping machines are manufactured with **55 years of market experience**. They are a strong and reliable partner when it comes to stabilizing and providing compactness to your loads. Bocedi strapping machines are designed to work as stand alone or to be integrated in a complete packaging line.

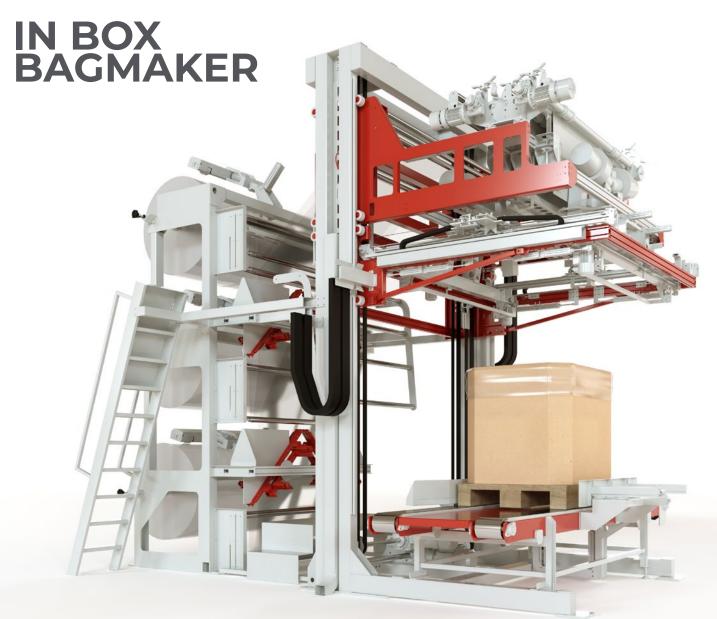

Both horizontal and vertical strapping machines are available in **automatic or semiautomatic** version, they are ideal for any type of industry. They secure the load through Polypropylene (PP) and Polyester (PET) straps.

Edge protection applicators, presses and compacting devices can also be integrated on all strapping machines models.

Technical data:

MIN PALLET SIZE: 600×800 mm MAX PALLET SIZE: 1800×1200 mm CAPACITY: 180+ PALLETS/hr

STRAPPING

Fully automated bag making and insertion

Taylored bag lenght to optimize plastic usage

The In Box Bagmaker **automatically cuts and inserts** taylored bags inside all kid of industrial contaniers like : octabins, metal cages, goodpacks, bins...).

The machine is designed to work with several containers footprints with different heights.

GENERAL SPECIFICATIONS: UP TO 3 FILM REELS UP TO 1000 BAGS EACH FILM REEL MIN CONTAINER SIZE 800x800 mm MAX CONTAINER SIZE 1400x1300 mm K SEALER AVAILABLE ON EACH REEL

OUR VALUES

WE LISTEN

We listen to our employees. We make sure they work in a healthy and motivating environment that can empower their ideas and actions, building a close-knit team.

WE BUILD

We build honest relationships with our customers, we commit to what we say and we focus on customers satisfaction.

WE STAND

We stand behind the quality of our products, we offer safe and reliable solutions to offer the best packaging to our customers.

WE CARE

We care about the environment and we continuously pay attention to engineer solutions that can reduce the amount of energy needed in our machines as well as using recycled materials.
