

## HEITEC AG

Your partner for  
end-to-end solutions  
& industry expertise

As part of the **HEITEC Group**, HEITEC AG has in-depth, specialised technical knowledge as a complete solution provider in a wide range of industries and is familiar with your specific requirements. We offer a comprehensive portfolio of services in the fields of automation, digitalisation, electronics, energy technology, software engineering and plant and special machine construction. These services are delivered using state-of-the-art technologies. We provide comprehensive support throughout the entire project and product life cycle, from the digital model to 24/7 service. Our objective is to provide you with standardised, innovative and personalised solutions. Our development and production processes are audited and certified for the industries in which we operate, and we guarantee sustainable product solutions.

### HEITEC Group key facts

- Over **1.200 highly qualified employees**
- Over **160 million euros in sales** in 2024
- **50 years of experience** in engineering and across a wide range of **industries**
- **Successful locations** in Germany and abroad
- Numerous **satisfied customers**

### Success with HEITEC

- Faster to networked manufacturing
- Increased productivity
- Expertise in customised system solutions
- Quick availability
- Efficiency and sustainability
- Competitive advantage
- Optimal support in all project phases

## Digitalisation

- Consulting, implementation, realisation, operation and servicing of digital solutions
- Holistic IIoT approach, horizontal and vertical
- Digital engineering and virtual commissioning
- Transparency through data collection all the way to the cloud
- Analytical production and process optimisation using digital twins
- Flexible production planning and control
- Design, setup, and monitoring of secure production networks (KRITIS)

## Automation

- New plants (greenfield) and retrofitting (brownfield)
- Planning, software, commissioning and service
- Safe control and drive technology, plant visualisation in HM, programming and acceptance testing
- Switchgear engineering, protection and control technology
- Qualification and validation

## Electronics

- E<sup>2</sup>MS partner for the development of complex assemblies and components
- Manufacture and testing of electronic products from prototypes to series production
- Professional housing technology from standard components to system platforms
- Approval, validation and lifecycle management as a service

## Energy technology

- Conversions and extensions of grid operators' substations
- Operational optimisation through virtual simulations and analysis of complex energy systems
- Reduction of CO<sub>2</sub> emissions through AI-supported energy solutions
- In-depth knowledge of standard-compliant circuit diagrams and innovative standard solutions
- Installation of medium-voltage systems via earthing and lightning protection systems

## Software engineering

- Frontend and backend development, microservice architecture design, DevOps and integration services
- Intelligent and efficient products through embedded systems
- Customised and reliable software applications
- Improved product development through web/cloud-based software
- Long-term performance through operation and support

## Special machinery

- Automation and handling systems
- Assembly systems
- Multifunctional machining centres
- Automatic testing systems
- Industrial X-ray technology and CT
- Digital engineering and virtual commissioning

## Our 24/7 service

**Fast. Competent. Reliable.**

- Service contracts
- Maintenance contracts
- Repairs and maintenance
- Training for your employees
- Long-term performance through operation and support

### EMPIC GmbH

Standard software for aviation authorities

### HEISAB GmbH

Innovative SAP® software solutions for digitising and mobilising business processes

### HEITEC Innovations GmbH

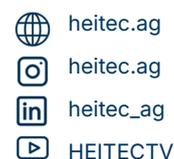

Simulation-based planning, control and monitoring of renewable hybrid power plants and energy systems

### softgate GmbH

Software development, particularly for medical technology and industry, as well as digital transformation in various sectors

### Valicare GmbH

Qualification and validation of production facilities for pharmaceutical and medical products
