

MultiOne at GaLaBau 2026: Performance, Versatility and Innovation for Landscaping Professionals

Grumolo delle Abbadesse (VI), 10/07/2026 – MultiOne, a global leader in the design and manufacture of multifunction articulated mini loaders, announces its participation in **GaLaBau 2026**, Europe's leading trade fair for landscaping, professional gardening and green space maintenance, taking place in Nuremberg.

The event will provide MultiOne with an important opportunity to showcase its **high-performance articulated mini loaders**, internationally recognized for their power, compact dimensions, operator comfort and versatility. At the company's stand, visitors will have the opportunity to experience a range of machines specifically designed to efficiently tackle the most demanding applications in landscaping, grounds maintenance and municipal operations.

Thanks to their unique combination of high performance, stability and maneuverability, MultiOne articulated mini loaders enable operators to work efficiently in confined spaces without compromising productivity, delivering outstanding results in every working environment.

Alongside the machines, visitors will also discover a wide range of **attachments dedicated to the landscaping sector**, transforming every MultiOne into a true multifunctional tool carrier. Attendees will have the opportunity to explore solutions for park and garden maintenance, soil preparation, vegetation management, outdoor cleaning and many other professional applications.

"GaLaBau is a strategic platform for meeting landscaping professionals from across Europe and demonstrating the real value of our solutions," said Alfonso Lieto, DACH Export Manager. "MultiOne articulated mini loaders are designed to deliver the highest levels of performance and versatility, allowing operators to accomplish multiple tasks with a single machine. At GaLaBau 2026, we will present solutions that help our customers work better, faster and more profitably."

Participation in the exhibition confirms MultiOne's commitment to supporting the landscaping industry through innovative technologies, reliable solutions and continuous attention to the needs of professional operators.

MultiOne invites customers, dealers and industry professionals to visit its stand during GaLaBau 2026 and discover firsthand the machines and attachments that are redefining productivity standards in professional landscaping.

About MultiOne

MultiOne is a world-leading manufacturer of multifunction articulated mini loaders. With a complete range of compact machines and more than 200 dedicated attachments, MultiOne provides innovative solutions for landscaping, agriculture, construction, municipal maintenance and many other professional applications.
