SBOMs for Software You Didn't Build

C/C++ · Embedded | Linux | Windows

No source code.
Marker-based binary analysis

No build system.
Nothing to set up or integrate

No supplier cooperation.
The delivered artifact is enough

Use cases

> Undocumented legacy software
> Supplier deliverables
> COTS and OEM components
> Your own product, pre-delivery

Works with

> Statically linked libraries
> Stripped binaries, no symbols
> Installers and firmware images
> VM and container images

SBOM-as-a-Service

1. Software Bill of Materials (CycloneDX, SPDX)
2. SBOM generation pipeline for new releases
3. Optional: Vulnerability monitoring with notifications
