

Packaging Solutions

At H.B. Fuller, we understand our customers' evolving business needs and challenges, leading us to create innovative adhesive solutions that enable new packaging applications and product packaging solutions for a variety of different situations. Tackle your toughest packaging challenges while addressing your sustainability objectives with our specially formulated, advanced industrial packaging adhesives tailored to your precise needs.

CASE & CARTON SEALING

Our case and carton sealing adhesives offer critical advantages for today's end-of-line packaging manufacturers who balance lean manufacturing with cost in use. Achieve high performance, trouble-free bonding, less adhesive consumption and unmatched versatility with the H.B. Fuller hot melt sealers. Be confident that your packages will stay closed. Our line of conventional and low application temperature adhesive solutions perform well across varied substrates and service temperatures a range of markets, including;

- Dry foods and cereals
- Frozen foods
- Beer, spirits, water and other beverages
- Meat, dairy and other refrigerated foods
- Family, fabric and home care
- Agriculture

CONTAINER LABELING

Protect your brand with H.B. Fuller's labeling solutions. Our labeling adhesives are formulated to give you the greatest freedom. Whether you want a hot melt or water-based technology solution, H.B. Fuller offers a full range of adhesive solutions that deliver excellent performance across a range of environmental conditions. Our labeling product line is designed to enable circular packaging by labeling more bottles with less.

- Efficient in-line performance increases uptime and reduces adhesive consumption.
- Superior machinability and cleanability over competing products
- Reduced water usage as well as caustic solution in the wash-off process for returnable bottles can reduce carbon footprint

These benefits, performing simultaneously, are what set our sustainable beverage labeling adhesive apart from other products available on the market.
