

HVG

BIOTREESTRAP™

100% COMPOSTABLE TREE ANCHORING

NPI
Horti supplies

• 100% INDUSTRIALLY COMPOSTABLE • LIFESPAN OF 3 YEARS • YARNS FROM 100% PLA •

HVG BioTreeStrap™ is a genuine Dutch product used in tying and anchoring trees. The organic raw materials ensure that the tree strap is 100% industrially compostable!

The advantages of HVG BioTreeStrap™:

- 100% biodegradable and industrially compostable
- Stays on the tree for three years; can be composted after
- Provides strong anchoring; it is more flexible than regular car belt tree ties but has almost the same tensile strength as polypropylene tree ties .
- Yarns are made of 100% PLA
- Retains its tension for a long time
- Dries faster because of the open weave structure, so no rot during service life
- UV-resistant
- Does not cut into the trunk
- Dutch product so less CO2 emission!

SPECIFICATIONS

Roll width	45 mm
Length	25 m
Material	100% PLA yarns
Breaking load	ca. 400 kg
