

What you get from working with Inuvet

The only thing you can't get on the internet

Exclusive to vets means that your advice is valued! As Inuvet products are only available in the practice, Dr Google is history – so both you and your patients benefit. You, because the owners come back and appreciate your advice. The patients, because thanks to you and your expertise, they get the right product at the right time.

Compatible and highly concentrated

More than 15,000 vets worldwide already work with Inuvet products. Inuvet also has meta studies on its effective phytotherapeutics.

Sustainability in mind, sustainability in practice

Love for animals means love for nature. That's why we think sustainably - 85% of our packaging is made from recycled paper. They contain purely plant-based products that are manufactured in Germany. This keeps the supply chain short and you have a green alternative at hand with the green paw.

"We like Inuvet because the products are herbal. The animals tolerate the products well, they have no side effects, are readily accepted and really help."

Claudia Kreutzfeld,
veterinary assistant
