

The Tovertafel

Improving quality of care through
Purposeful Play

Meet the Tovertafel

The Tovertafel is an interactive games system designed for people living with dementia. Its serious games stimulate players cognitively and physically through play, creating shared moments of joy and connection while also supporting caregivers in their daily work.

How it works

By projecting interactive light games onto flat surfaces (like tables or floors), the Tovertafel turns any room into a space for purposeful play. Ceiling-mounted with a simple Click-and-Ready system, it fits into familiar surroundings, preventing overstimulation and agitation for seniors with dementia.

Its games are designed so people at different stages of dementia can come together and connect through play!

The Tovertafel contributes to:

Reduced agitation
and apathy

Lighter workload
for care staff

Long-term
cost savings

Increased
physical activity

More social
interaction

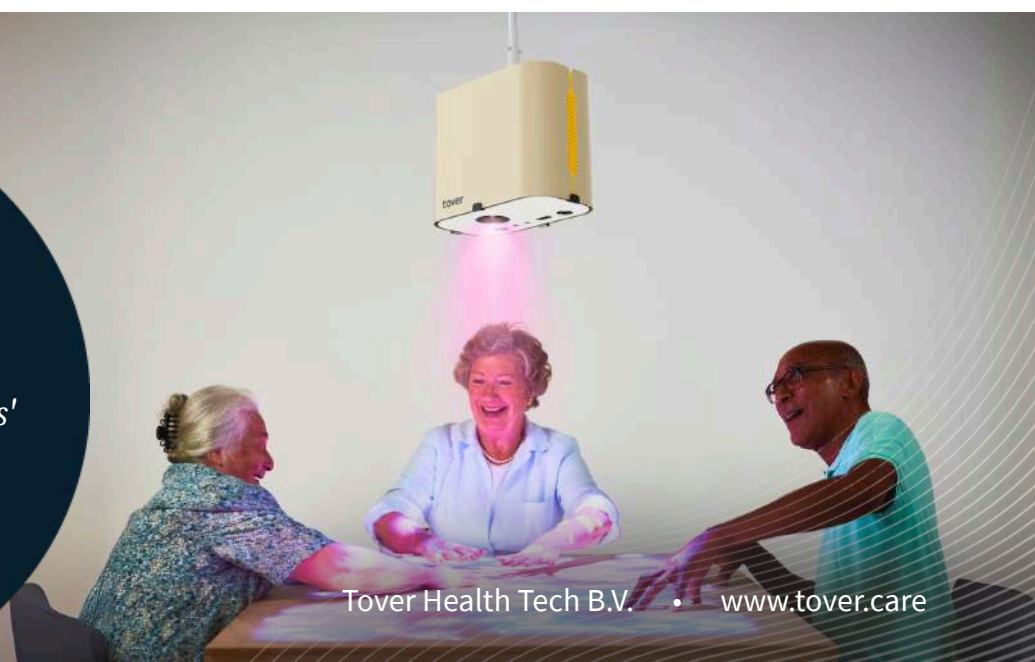

Stronger carer-resident
relationships

“The Tovertafel is not a clinical device, but its benefits are very clinical! We can definitely see an improvement in our residents' demeanor and mood”

Kim Salvio

Director of the Memory Support
Program at Providence Point

After using the Tovertafel...

93%

of care homes observe **more social interaction among residents**

76%

of facilities have seen an **increase in staff job satisfaction**

Backed by research

At Tover, we believe that everything we create should not just look good, but also have a proven positive impact. That's why all of our products and games are fully backed by extensive research.

Today, the Tovertafel is recognized as the only **evidence-based, non-pharmacological intervention tool** of its kind that improves quality of life for people with dementia and supports the caregivers who look after them.

This is what sets us apart. While others create games for entertainment, we develop games that are fun *and also* scientifically proven to improve dementia care.

*Happy residents.
Happy staff.
Happy families.*

Why invest in a Tovertafel?

Because it delivers real value where care facilities need it most. Choosing a Tovertafel means choosing a solution that improves all aspects of dementia care.

It improves resident well-being and happiness, reduces staff workload, increases family satisfaction, and cuts hidden care costs. It's not just an activity tool — it's an investment in better care.
