WYO-BEN[®]
PET

Mining Bentonite Since 1951.

Privately held Wyo-Ben has decades of experience mining and processing superior-grade bentonite in the United States. Our three bentonite processing facilities, located in the Big Horn Basin region of North Central Wyoming and South Central Montana, enable us to control the supply and quality of cat litter's most effective ingredient.

**WYO-BEN
HEADQUARTERS**
Billings, MT

Sodium bentonite is the most powerful clumping substance, swelling up to 15 times its volume in the presence of moisture. It also provides inherent odor control by sequestering urine and trapping NH4+ produced from urine degradation.
