## About BDStar

For over two decades, BDStar Navigation Co., Ltd. has been dedicated to building a world-leading intelligent Location Digital Base (iLDB™). By integrating our "Cloud + IC" business model, we provide premium GNSS solutions that power a wide range of applications. This enables us to offer a complete portfolio of core products for every need.

### Product Offering

### Market Focus

## iLDB™

intelligent Location  
Digital Base

iLDB™ is a technology, a product and a service formed by Chip-Cloud integration, through the evolution and innovation of multiple technology integration such as silicon, positioning and AI.

- BDStar's iLDB™ includes GNSS chips, modules, OEM boards, antennas, and differential correction data products.
- The products cover markets including industrial, automotive and consumer applications from high precision to standard precision.
