LogMeln Portfolio Overview

AI-Enabled Unified Endpoint Management and Remote Support

Backed by over 20 years of reliability and innovation, LogMeln empowers IT professionals with AI-driven solutions that secure, manage, and support every endpoint in today's complex and fast-evolving IT landscape. Our platforms reduce operational complexity, enhance productivity, and equip teams with the tools to take full control of their IT infrastructure—all while staying ahead of modern security demands.

Product Portfolio

1

LogMeln Resolve

Unified Endpoint Management software tailored for SMBs and MSPs. Simplify device management, streamline remote support, and handle service requests with AI-enhanced efficiency.

2

LogMeln Rescue

Customizable, enterprise-grade remote support to securely troubleshoot and resolve issues faster. A must-have solution for enhancing IT teams' effectiveness.

3

LogMeln Miradore

Easy-to-use mobile device management software with features to view, manage, and secure Android, Apple, and Windows operating systems, all from a single platform.

4

LogMeln Pro

Seamless, secure desktop access anytime, anywhere. Stay connected and productive across any PC, Mac, or mobile device on any network.

5

LogMeln Central

Advanced remote access, real-time monitoring, and comprehensive management tools to keep your business environment secure and fully operational.

6

GoToMyPC

Secure, instant access to your office computer, files, and applications from any location, on any device.

Why Choose LogMeIn?

Unified Management

Centralized tools to monitor, manage, and secure endpoints across your organization.

Enterprise-Grade Security

Built-in zero-trust architecture and advanced security protocols to safeguard your data and infrastructure.

Productivity Enhancements

Optimize your operations with tools that save time, reduce costs, and empower your team to focus on mission-critical tasks.

Scalability & Reliability

Proven performance and consistent uptime designed to grow and evolve with your organization.

AI-Driven Solutions

Reduce manual tasks and troubleshoot faster with intelligent automation and predictive analytics.
