

# Custom PCIe/USB Device Driver Development Toolkit

**Fast**

**No Code**

**Friendly GUI**

**Full Support**

**Cross Platform**

[www.jungo.com/windriver](http://www.jungo.com/windriver)

With over 25 years in the market and thousands of customers, **WinDriver** is the **leading solution** for custom driver development

- Simplify high-performance driver creation with WinDriver
- WinDriver supports any device, regardless of its silicon vendor
- Provides immediate hardware access and skeletal code within minutes
- Offers a comprehensive toolkit, full-featured evaluation with free tech support
- Cross platform compatible: Windows | Linux | Linux ARM | macOS

**Our Partners:**

**Contact us:**

On-demand access to **realAMD FPGA** boards in **AWS**  
for PCIe driver development, testing & validation

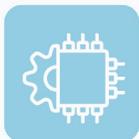

## WinDriver Cloud Benefits

Preconfigured  
Environments

On-demand  
Access

No Expensive  
Hardware

Development to  
Deployment

Lower TCO

Usability Layer  
for FPGA

**Ready project within minutes of work!**

# WinDriver Added Value

- ◆ Cross-platform driver support  
Windows, Linux, MacOS on X64 & ARM
- ◆ Built-in debugging tools  
User-mode debugging and tracing
- ◆ Proven DMA and device IP samples  
AMD, Intel (Altera), Lattice, PLX
- ◆ Extensible driver functionality  
Kernel plugins, interrupts, INF generation
- ◆ Driver signing and attestation support  
Production-ready driver workflows
- ◆ Direct access to in-house experts  
Vendor-backed technical support
