

Our **ProDeck™** series

Bringing professional quality control to your studio

ProDeck™ Touch

Our standalone desk mounted control surface with 40 transparent buttons and a high-resolution interface to compliment a range of operational environments

ProDeck™

All of the capabilities of our 40 button model with added touch screen technology, allowing you to touch, swipe, pinch, scroll and more

ProDeck™ 24

The ProDeck 24 is our hybrid model that combines a touchscreen with 24 buttons, giving the end user the flexibility to change screens and functions

The market-leading desktop control surface, with a powerful onboard processor. With configurable high-definition buttons, all powered by POE+.

Software agnostic, you can choose to leverage our IDS control software, or use your own preferred software.

DENSITRON

One cable, one connection

ProDeck is powered with a single Ethernet cable for easy installation and cost effective operation. Simply plug into your network and you are ready to get to work.

Engage beyond touch

ProDeck features the latest in tactile touchscreen technology, with each of its fully customisable buttons precision engineered to emulate real-life buttons, enabling you to switch between Apps while continuing to focus on your work.

Smart Buttons

The dual-purpose buttons on the ProDeck do not only function as controls, they also provide real-time video previews, enabling you to accurately identify and easily switch between Apps.
