COLD ROOM

From food safety to industrial storage, we offer reliable solutions in every field! As BYS Cooling, we continue our leadership in cold room systems with years of experience.

Why BYS Cooling Cold Room?

Quality and Reliability: The highest level of insulation and temperature control technologies to protect the quality of your products.

Flexible Solutions: Various cold room models tailored to customer needs.

Energy Efficiency: Environmentally friendly solutions with low energy consumption.

Technology and Innovation: Continuous monitoring and adjustment with state-of-the-art digital control systems.

No matter which sector you are in, we are here!

Ideal cold room solutions for the food industry, pharmaceutical storage, laboratory environments and more. You can rely on us to ensure your products are stored safely.

Contact Us

Contact us now for quality and long-lasting cold room solutions. Our expert team will be pleased to offer the most suitable solution for you.

CHILLER SYSTEMS

Chiller systems equipped with advanced technology are ideal for applications requiring precise temperature control. They are energy efficient and designed in accordance with the principles of environmental sustainability.

BYS Cooling's Chiller Cooling Systems:

Innovative Design: State-of-the-art chiller systems minimize operating costs with high performance and low energy consumption.

Flexible Solutions: Various chiller models that can be tailored to customer needs.

Reliability and Durability: Provides high reliability with long service life and low maintenance requirements.

As BYS Cooling, we are proud to offer the most suitable chiller cooling solutions to meet the requirements of your business. With our experience and technical expertise in the industry, we are here to offer you customized solutions.

Contact Us

Contact us today to learn more and get detailed information about our chiller cooling systems. We look forward to identifying the best solution for you and improving the efficiency of your business.

FREEZE DRYING MACHINE

The most reliable solution for keeping your food and ingredients fresh for a long time is possible with the **BYS Cooling Freeze Dryer**.

Superior Design and Performance

Special Design: Industrial quality freeze dryers designed with every detail in mind.

Various Capacities: Starting from 2 kg up to 50 kg with different capacities available.

High Efficiency: Prevents food spoilage by stopping microbial activation, preserving its taste and nutritional value.

Ease of Use: Simplifies operation with intelligent control systems and user-friendly interfaces.

Solutions Tailored to Your Needs

From the food industry to laboratories, BYS Cooling freeze dryers are recognized for their reliability in a wide range of applications. With our customized designs, we offer the best solution for your business needs.

Contact Us

Contact us today for more information and to find out how our freeze dryers can make a difference for you. Increase productivity with our customized solutions and ensure long-term storage without spoilage.

CHOCOLATE TUNNEL

At BYS Cooling, we stand out with our cooling solutions that play a critical role in the chocolate production process. Our reliable cooling systems in chocolate tunnel machines optimize your production process by maintaining the quality of your products.

Why BYS Cooling Chocolate Tunnel Cooling Systems?

Superior Performance: Increases the efficiency of your chocolate tunnel machine with precise temperature control.

Reliability: Provides continuous and stable cooling with industrial quality cooling technology.

Flexibility: Customized solutions for different chocolate tunnel models and capacities.

Ease of Use: Intelligent control systems and user-friendly interfaces facilitate operation.

The Right Address for Quality Production

BYS Cooling chocolate tunnel cooling systems ensure that chocolate and other sensitive products are processed under ideal conditions. Increase customer satisfaction by maintaining the freshness and flavor of your products.

Contact Us

Contact us today for the most suitable chocolate tunnel cooling solutions for your chocolate production process. Our team of experts is ready to offer the ideal solution for your needs.

INOX MONOBLOCK

As BYS Cooling, we offer ideal cooling solutions for your commercial kitchens. Introducing Monoblock over Cabinet!

What is a Cabinet Monoblock?

Cabinet Monoblock is a specially designed cooling system that combines compressor, condenser and refrigeration units in a single compact unit. This system offers effective cooling performance while saving space in your kitchen.

Why BYS Cooling Cabinet Monoblock?

Compact Design: It takes up little space, keeps your kitchen organized and provides ease of use.

High Performance: Provides reliable cooling with powerful compressors and modern cooling technology.

Energy Efficiency: Minimizes operating costs with low energy consumption.

Durability: Made of durable materials suitable for industrial use, it has a long service life.

The Best Choice for Your Kitchen

BYS Cooling Cabinet Monoblock is the ideal cooling solution for restaurants, hotels, cafes and other commercial kitchens. We offer you world-class technology that you can use with confidence.

Contact Us

Discover the advantages of our Monoblock refrigeration system and find the best solution for your business. We will be happy to support you every step of the way.

What is Sandwich Panel?

Sandwich panels are modern building elements that are located between two outer metal sheets coated with high-performance insulation materials and provide insulation of structures. These panels have a wide range of applications from storage areas to industrial facilities.

Why BYS Cooling Sandwich Panels?

Superior Insulation Performance: Provides energy efficiency with high quality insulation materials and increases the performance of your cooling systems.

Durability and Reliability: Thanks to its metal structure, it is long-lasting and durable, maintenance-free.

Flexible Application: It can be designed in different thicknesses and sizes to suit various application areas.

Environmentally Friendly Materials: It creates environmentally friendly structures by using recyclable materials.

Solutions for Every Need

BYS Refrigeration Sandwich Panels are used safely in a wide range of applications from the food industry to logistics warehouses, from the health sector to hotels and shopping centers.

Contact Us

Contact us now to discover the advantages of our sandwich panel solutions and find the most suitable solution for your project. We help you build modern structures with customized solutions.

MILK COOLING

As BYS Cooling, we offer advanced technology milk cooling solutions specially designed for milk producers. Everything you need to preserve your milk in the freshest and safest way is here:

Reliable Milk Cooling Technologies:

Milk Tanks: Milk tanks with different capacities and features keep your milk at optimum temperature and preserve its quality.

Chillers: Equipped with powerful compressors and energy-efficient technologies, chillers cool your milk consistently.

Why BYS Cooling?

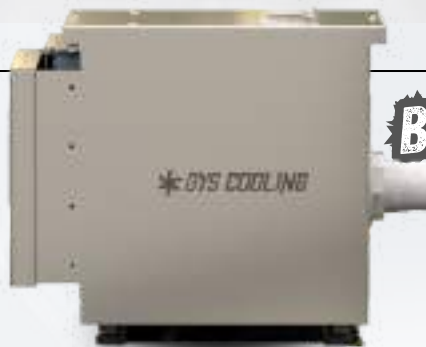

Experience and Trust: We offer you reliable solutions with our long years of experience in the dairy sector.

Energy Efficiency: It offers economical solutions with low energy consumption and is environmentally friendly.

Quality Materials and Durability: It provides long-lasting use with materials produced in accordance with industrial standards.

Contact Us

Contact us today to learn more about our milk cooling solutions and discover the solutions tailored to your needs. Continue your production safely with the most suitable milk cooling system for you.

BYS COOLING HUMIDIFIER

As BYS COOLING, we offer ideal humidification solutions for your interior. Here are our special products for you:

Humidifier Models:

BYS COOLING Humidifier 2 Lt/H, 100 m³/h: Humidifies a volume of 100 cubic meters per hour and is an ideal option for medium-sized spaces with a humidification capacity of 2 liters/hour.

BYS COOLING Humidifier 3 Lt/H, 250 m³/h: Humidifies a volume of 250 cubic meters per hour and provides effective humidification in larger areas with a humidification capacity of 3 liters/hour.

BYS COOLING Humidifier 7 Lt/H, 500 m³/h: Humidifies a volume of 500 cubic meters per hour, with a humidification capacity of 7 liters/hour, it is a powerful solution for large spaces and industrial uses.

Why BYS COOLING Humidifiers?

High Performance: With their powerful motors and effective humidification capacities, they maintain the moisture balance of your indoor space.

Wide Application Area: Our models with different capacities offer solutions for every need.

Ease of Use: Provides comfort in daily use with its silent operation and user friendly design.

Quality Materials: It offers a reliable investment with its durable structures and long lasting materials.

To discover the advantages offered by our BYS COOLING humidifier solutions, contact us now to choose the most suitable humidifier.

BYSCOOING DEHUMIDIFIERS AND ULTRASONIC HUMIDIFIERS

BYSCOOING: Innovative Technology and Reliable Performance for Your Home and Workplace
Here are our special products:

Dehumidifiers:

- **BYS THD 10:** Provides effective solutions with a daily dehumidification capacity of 10 liters, suitable for areas up to 15 m². Features Wi-Fi connectivity for smart control.
- **BYS THD 20:** Ideal for areas up to 45 m², with a daily dehumidification capacity of 20 liters. Offers Wi-Fi capability for remote access.
- **BYS THD 25:** Shows effective performance with a daily dehumidification capacity of 25 liters, suitable for spaces up to 50 m². Easily controlled via Wi-Fi connectivity.

Ultrasonic Humidifiers:

- **BYS Ultrasonic Humidifier (4 kg/h):** Humidifies indoor air with a capacity of 4 kg/h, creating a healthy living environment.
- **BYS Ultrasonic Humidifier (8 kg/h):** Provides effective humidification for larger areas with an output of 8 kg/h, noted for its quiet operation.
- **BYS Ultrasonic Humidifier (12 kg/h):** Maintains optimal humidity levels in large spaces with a capacity of 12 kg/h, ensuring long-term performance.
- **BYS Ultrasonic Humidifier (16 kg/h):** Offers high-performance humidification suitable for industrial use, with a capacity of 16 kg/h.

Why BYSCOOING?

- **High Performance:** BYS products stand out with their technological superiority and reliable performance, maintaining your indoor environment at the desired humidity level.
- **Ease of Use:** Featuring Wi-Fi connectivity for remote control, programming, and monitoring.
- **Aesthetic Design:** Modern and stylish designs that complement any decor.
- **Energy Efficiency:** Offers economic solutions with low energy consumption, environmentally friendly.

Contact Us

Contact us now to learn more about BYS dehumidifiers and ultrasonic humidifiers. We're here to help you find the best solution for a healthy and comfortable indoor environment.
