They mean everything to us!

Today, Matsuda Pet is present throughout Brazil, and with every new family we serve, we reinforce our commitment to what inspires us every day: taking good care of those who are part of our lives.

Discover all our product lines and everything they offer for pets, because they mean everything to us.

With the tradition and strength of a group with over 70 years of history in the agribusiness sector, Matsuda Pet was created to bring this same excellence to the pet universe. A Brazilian company with Japanese DNA carries in its essence the philosophy of “Kaizen”, which values the practice of continuous improvement. This principle lies at the heart of everything we produce and guides every step of our journey of innovation, quality, and commitment.

Our mission is to offer foods that support dogs and cats through every stage of life, with quality, trust, and innovation. Each Matsuda Pet product line was developed with the different needs and lifestyles of pets in mind. From more accessible and complete formulas to super premium lines with carefully selected ingredients, we offer options that support daily care.

We are driven by the connection between people and their four-legged companions. That's why we invest in technology, research, and attention to every detail — from content to packaging — so that pet parents can find in our foods and treats a safe and tasty choice.

THE BEST FOR SPECIAL PETS

MATSUDA

M-LINE

The best for special pets

M-line is Matsuda Pet's super premium line, recommended by professionals and specially developed to meet the specific nutritional needs of dogs and cats. With complete and balanced formulas, M-line provides excellent nutrition to support overall health, skin health and coat shine, strengthening of natural defenses, and healthy development. Designed for pets of different sizes and breeds, this line is free from artificial colorants and offers nutrition made with high-quality ingredients, excellent digestibility, organic minerals, and natural antioxidants to promote the health and well-being of pets.

LONG

LIVE

PETS.

VittaMax Natural is the special premium line of Matsuda Pet, focused on natural ingredients for the feeding of dogs and cats. Its recipe prioritizes selected ingredients such as proteins, whole grains — such as oats and brown rice —, fruit pulp and beet pulp, in addition to being enriched with prebiotics to support intestinal health and made with natural antioxidants. This combination results in a balanced diet that contributes to skin health, coat shine, and intestinal balance.

VittaMax

— NATURAL —

A dish full of health.

VittaMax

GOLD

YOUR LIFE IS WORTH
PET'S LIFE GOLD

VittaMax Gold is the special premium line of Matsuda Pet, developed with selected ingredients and without artificial colorants. For cats, it offers specific options for neutered cats, formulated with highly digestible proteins, prebiotics, rich in fiber*, and L-carnitine, which help maintain ideal weight. For dogs, it offers a balanced recipe with quality proteins, prebiotics, as well as omega 3 and 6, which contribute to the reduction of fecal odor and to overall well-being. In addition to being tasty, it contributes to a healthy body, regardless of breed, sex, or size.

*45% more fiber than the product in the same category.
