# BlueVoyant Cyber Defense Platform

Internal, external, and supply chain cyber defense, all within one powerful Security Operations Platform.

How are you strengthening your cyber posture with a shrinking budget?

Security operations teams are facing escalating demands to promptly detect and respond to internal, external, and supply chain threats. But can your organization's budget adequately support this need?

BlueVoyant's Cyber Defense Platform (CDP) integrates internal, external, and supply chain defense solutions into a single AI-driven platform to decrease costs, improve cyber posture, and consolidate vendors. It is a flexible, scalable suite of solutions tied to specific cyber maturity goals.

BlueVoyant Differentiators

> Comprehensive attack surface coverage using integrated internal, external, and supply chain defense security solutions for thorough threat identification, validation, and mitigation.

> A flexible, scalable platform that enables efficient implementation and management of complementary security solutions, adapting seamlessly to your evolving security needs.

> Integrated threat intelligence to ensure that your cybersecurity posture and defenses adapt to the constantly evolving threat landscape.

> Strengthen cyber posture and optimize costs through a single source for assessments, managed services, and technology optimization.

> Trusted by technology partners:

 – 2024 Microsoft Security Partner of the Year and three-time Microsoft U.S. Security Partner of the Year.

 – Two-time Splunk Professional Services Partner of the Year.

BlueVoyant
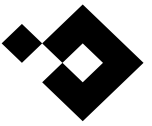

Platform Suites

Detection & Response
Protect your endpoints, network, and cloud from sophisticated threats while leveraging your existing security tool investments - EDR, SIEM, others.

Supply Chain Defense
Rapidly identify and drive remediation of critical cybersecurity issues in your third-party ecosystem, including zero-day and emerging vulnerabilities.

Digital Risk Protection
Detect and eliminate cyber threats originating in the clear, deep, and dark web before they impact your business, brand, and customers.

Proactive Defense
Collaborative and holistic approach to attack surface management that includes vulnerability management, penetration testing, phishing awareness, dark web threat research, and configuration insights.

Cyber Posture Management
Systematic approach that involves the continuous measurement, management, and mitigation of cyber risk against industry-standard frameworks.

Platform Features
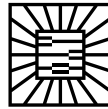

Reports
Centralized dashboard containing auto-generated reports (e.g. trend analysis, active cases, critical and high severity cases) for the relevant BlueVoyant managed services that you have purchased.

Mobile Application
Downloadable platform application which can track your BlueVoyant MDR incidents in real time. It is available for Apple iOS devices.
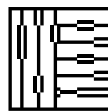

Cyber Intel
Our curated threat intelligence news feed keeps you informed about emerging cyber threats, vulnerabilities, and security incidents across the cybersecurity landscape. With valuable insights and in-depth analysis, we enhance your cyber defenses and resilience.
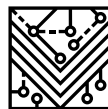

Knowledge Base
Platform user guide with descriptions and directions on how to utilize important platform modules.

Integration Marketplace
Offers data integrations with various security solutions which is essential for generating visibility into an organization's overall cybersecurity posture, compliance status, and overall defense effectiveness.
