# ELECTROLYTES & HIGH PURITY SOLVENTS

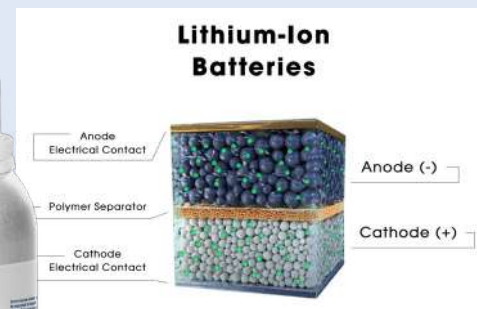

Since 1833,  
**Tournaire**  
protects

**In the heart of your business.**

Primary packaging is the ultimate interface between clients and products. It does not only guarantee product integrity during the whole shelf life and in severe transport conditions, but it also allows the final user to be sure to apply easily and safely the right product. Seamless aluminium bottles are ideal primary packaging for sensitive products.

Tournaire has well understood the complexity of the recent formulations in the chemical sector, which involves better protection to moisture, oxygen, and more hermetic and chemically resistant packaging material. Electrolytes have also diversified requirements in sizes and functionalities. Simultaneously, more demanding regulations have pushed forward safety in the transport and more accurate traceability.

For more than 50 years, Tournaire has packed the most sensitive liquids or solids and offers versatile solutions for this very specific market.

LIQUID AND SOLID ELECTROLYTES FOR BATTERIES

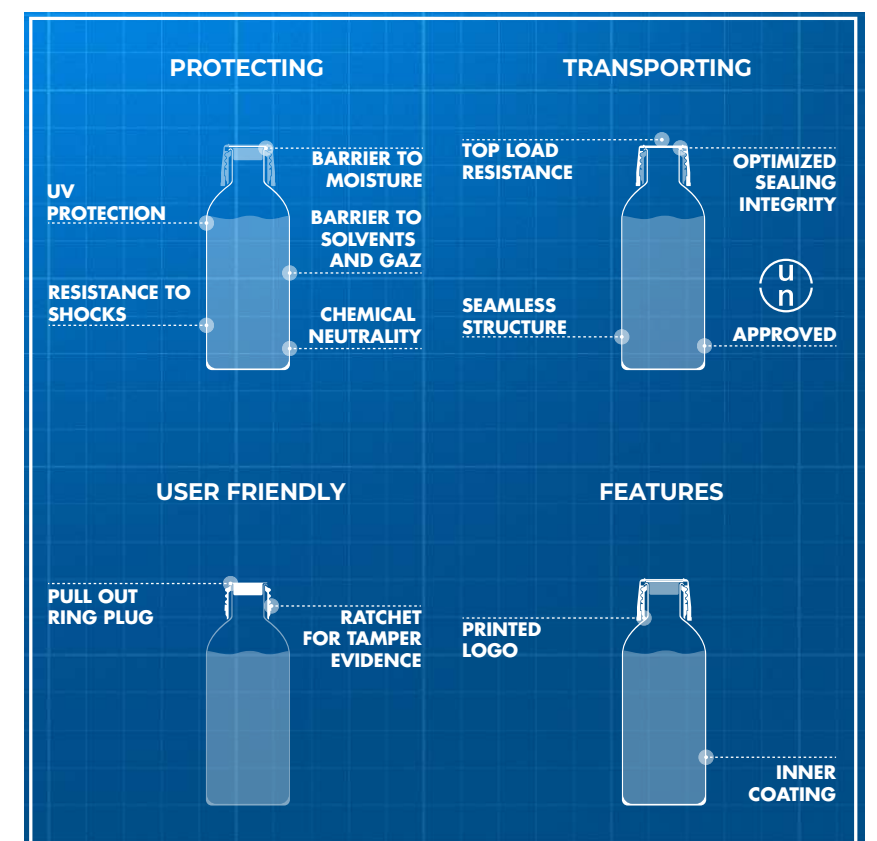

HIGH PURITY SOLVENTS FOR LABORATORY ANALYSIS

## Outstanding features & performances

- 99.5% pure aluminium chemically stable, unbreakable & rust-proof
- seamless structure: perfect seal integrity, gas tight
- UN certified stand alone packs: ready to ship hazardous goods, guarantee of resistance and performance.
- Large range with small, medium and large opening, from 50 ml to 32 L
- Outstanding cleanliness & purity
- Optional: inner coating, LDPE plug, PTFE wad, colored caps, accessories for inertization.
- **Aluminium is 3x lighter than stainless steel.**

From 50 ml to 1.100 L  
Robust 32 mm tamper evident caps for sampling.

From 625 ml to 6.250 L  
Robust 45 mm tamper evident caps for sampling and commercial deliveries.

From 1.25 L to 32 L  
Robust 62 mm tamper evident caps for commercial deliveries.

From 50 ml to 5.500 L  
Bottle 100% recyclable  
Robust 32 mm and 50 mm tamper evident cap for sampling and commercial deliveries

**Pure Aluminium :**  
**Tournaire original, the choice for supporting sustainability.**

Tournaire has chosen pure Aluminium because it is light-proof, neutral or rust free. It is also the most widespread metal on earth and it is infinitely and easily recyclable: recycling one ton of aluminium saves five tons of bauxite. Nearly 75 percent of all aluminium ever produced is still in use today, making aluminium one of the most sustainable packaging materials.
