Smart in sensing

WIKA – YOUR RELIABLE PARTNER

WIKA in brief

A family business
since 1946

> 11,000 employees

Global service and
distribution

1.2 billion euro turnover

Quality management:
ISO 9001, ISO 13485

Environmental
management: ISO 14001

We stay close to our customers all around the world. But proximity is not just about geography; it means understanding your industry, your processes and your objectives. Whether you require standard instruments or fully customised solutions, we work with you to develop a fitting concept for your specific requirements.

As a global market leader in measurement technology, we support your business with a comprehensive portfolio of high-precision products, end-to-end IIoT solutions and value-adding services. Backed by more than 100 development engineers, our own production facilities worldwide and a strong global service and distribution network, we deliver smart, efficient and sustainable quality with short lead times. **That is “Smart in sensing” – today and in the future.**

Discover our
full product range!

OUR E-BUSINESS SOLUTIONS

WIKA offers digital solutions for efficient collaboration across the entire supply chain. Our online shop, Customer Portal, and EDI interfaces enable structured and automated management of orders, documents and product data. Additional services such as VMI and e-catalogues support integration into existing systems.

Pressure gauges

Digital pressure gauges

Contact pressure gauges

Pressure sensors

Process transmitters

Pressure switches

Diaphragm seals

Valves and mounting accessories

PRESSURE

From low to high pressure, analogue to smart sensors, our range covers gauge, absolute and differential pressure solutions with fieldbus interfaces, valves and diaphragm seals.

TEMPERATURE

Our electrical temperature measurement solutions cover a range from -200 to +1,700 °C. Dial thermometers follow the bimetal, expansion or gas actuation principles for ranges of -200 to +700 °C.

Resistance thermometers

Thermocouples

Temperature switches

Thermometers
with switch contacts

Temperature transmitters

Dial thermometers

Digital indicators

Thermowells

Bypass level indicators

Float switches

Submersible pressure
sensors

Glass level gauges

Optoelectronic switches

Radar sensors

LEVEL

Our level measuring instruments serve power generation, chemical, machine-building, pharma and food industries, meeting diverse needs with custom designs for up to 450 °C, 500 bar and 400 kg/m³.

FORCE AND WEIGHING

WIKA force measuring instruments protect people, machines and goods using thin-film, strain gauge and hydraulic force transducers – ensuring safety in building and agricultural technologies, cranes and stage systems.

Tension links

Inclination sensors

Ring force transducers

Load cells

Tension/compression
force transducers

Bending beams,
shear beams

Load pins

Orifice plates

Meter runs

Flow nozzles

Restriction orifices

Venturi tubes

Averaging pitot tubes

Ultrasonic flow meters

FLOW

Our flow measurement solutions use the most advanced technologies on the market to provide accurate and efficient results – for piping ranging from 1/2" to 120" and temperatures exceeding 800 °C.

IIoT

WIKA IIoT solutions connect assets for real-time insights, boosting performance, enabling preventive maintenance and optimising resources with scalable, flexible tools for a future-proof business.

- Real-time monitoring
- Predictive maintenance
- Process optimisation
- Diagnostics
- Maintenance automation
- Wireless networking

Reference thermometers

Hand-helds

Pressure balances

Pressure controllers

Temperature calibrators

Resistance thermometry
bridges

Calibration baths

Calibrators

CALIBRATION

Strict regulations demand top measurement technology – met by our patented calibration instruments. Automation contributes to time and cost savings. Factory or ISO/IEC 17025 traceable calibrations are available.

SERVICES

We offer lifecycle management from installation, ISO/IEC 17025 calibrations, to system optimisations and analyses, including for SF₆ gas systems. Our global teams ensure safety, efficiency and compliance.

300 employees

15 mobile service vans

70 calibration laboratories

185 accreditations
