

FPG arms

Made in Czech Republic

Petr Fritz has been passionate about sport shooting for many years.

Through his companies **KovoFritz s.r.o.** and **Frelox s.r.o.**, based in the **Czech Republic**, he has spent years manufacturing high-precision firearm components and delivering advanced surface treatments for respected brands, always with a strong focus on quality, durability, and attention to detail.

After nearly two years of intensive development and design work, Petr decided to take his vision further. At the end of 2025, he founded **FPG arms (Fritz Petr Gun)** with a clear goal: *to bring his own PCP air rifle to life - a rifle that reflects his philosophy of clean design, uncompromising functionality, and mechanical precision.*

Petr was personally involved in every aspect of the development process, from airflow optimization and regulator tuning to the loading mechanism and ergonomics, ensuring that the rifle stands apart in both design and performance.

The first **FPG arms** model, **FG-10 Tactical**, is scheduled to enter the market in 2026, marking the beginning of a new chapter built on years of engineering experience, advanced surface technology, innovation, and a deep passion for shooting.

For Petr, **FPG arms** is more than a brand - *it is the result of dedication, craftsmanship, and a lifelong pursuit of technical perfection.*

FG 10 TACTICAL

Bullpup PCP Air Rifle - Made in Czech Republic

Innovation comes naturally

A unique one-hand loadable magazine featuring a proprietary internal reloading and feeding system, combining the advantages of a magazine and a single-shot feeder to ensure gentle pellet handling without marking or deformation.

FG 10 TACTICAL

Bullpup PCP Air Rifle - Made in Czech Republic

TECHNICAL SPECIFICATIONS

▪ Caliber	4,5 (.177), 5,5 (.22), 6,35 (.25)
▪ Magazine	4,5 (.177) 12 Shots 5,5 (.22) 12 Shots 6,35 (.25) 12 Shots
▪ Barrel	Lothar Walther
▪ Max Pressure	300 Bar (4350 psi)
▪ Safety	Manual
▪ Cocking System	Right Sidelever

▪ Barrel Length	4,5 (.177) 540 mm 5,5 (.22) 600 mm 6,35 (.25) 600 mm
▪ Overall length	940 mm
▪ Pressure gauges	Cartouche & Power plenum
▪ Air capacity	4,5 (.177) 320 cc 5,5 (.22) 320 cc 6,35 (.25) 320 cc
▪ Trigger	Two-stage adjustment

KEY FEATURES

- Shrouded barrel with moderator for extremely quiet operation
- Precision Air regulator ensuring consistent pressure and stable shot-to-shot performance
- Pellet-safe magazine with one-hand loading capability
- Accessory mounting system: Picatinny (left/right), 20 MOA Picatinny (top), M-LOK and ARCA-Swiss rail (bottom)
- Independent hammer spring preload and valve flow adjustment for precise performance tuning
- Adjustable butt-pad and cheek-piece
