CELLTHERM presents a world first at Chillventa

CELLTHERM will be presenting a revolutionary innovation at this year's Chillventa with the CElastik neo coldroom floor variant.

The tried and tested, only truly seamless and therefore unrivalled hygienic CElastik coldroom floor has been completely redesigned by CELLTHERM and significantly improved in terms of floor load-bearing capacity. CElastik neo is now approved by the manufacturer for use with hand pallet trucks.

CELLTHERM CElastik neo thus combines the previously mutually exclusive properties of absolute hygiene and high load-bearing capacity. The advantages of CElastik neo at a glance:

- Uniquely hygienic thanks to absolute freedom from joints
- High load-bearing capacity: suitable for hand pallet trucks
- No hidden germ centres
- 'Natural radius' without transverse joint at the transition between floor and wall
- No loss of insulation thickness in the floor panel
- Shelving systems can be installed directly on the wall without any problems
- Easy to clean

See for yourself and visit us from 8-10 October 2024 in Nuremberg on stand 9-312 in hall 9. We look forward to your visit.
